

CUSTOM POND INSTALLATION Z1088 GATE TYPE BACKWATER VALVE

Dimensional Data (inches and [mm]) are Subject to Manufacturing Tolerances and Change Without Notice

Z1088 GATE TYPE BACKWATER VALVE

Zurn spade type backwater valve offers a manually operated gate valve that when closed provides positive shutoff. The O-ring on seat provides a positive seal. The provided flapper valve must be removed before installation to achieve proper drainage flow for this unique application. The Z1088 offers straight through connections (no offset - see Z1090, Z1095), which is extremely important for installation in existing drainage lines, or where minimal pitch is required.
