#### **TECHNICAL INFORMATION**

TECHNICAL INFO - ZURN OUTLET PIPE CONNECTIONS	366
TECHNICAL INFO - TOP LOADING CLASSIFICATION	367
TECHNICAL INFO - ZURN MATERIALS AND FINISHES	368
GENERAL TERMS AND CONDITIONS	376

**NOTE:** Items designated as best sellers are most specified and are generally in stock for shipment.

Items contained in the legacy configuration addendum are still available to support legacy specification but may be subject to longer lead-times. Call factory for availability or suggested substitution of a recommended best seller.

When your interceptor fails, you need a fast, easy solution to get your business operating again. The Z250H FOG-ceptor interceptor is cost-effective, easy to maintain and ships within 24-48 hours. Backed by a 30-year warranty, the FOG-ceptor is made of durable fiberglass, and provides superior performance with less maintenance. Choose Zurn for innovative product solutions; a name you can trust for all your commercial plumbing needs.

Versatile

- Reduces maintenance with smooth, fiberglass construction for fast, complete pump-outs and easy rinse down – SAVING TIME AND MONEY
- Replaces failed interceptors in buried and above ground applications including in-kitchen, exterior landscaped or traffic-rated areas, semi-recessed, and burial installations
- Retrofits fat, oil, or grease interceptors, with superior performance for the life of your building

#### Reliable

- Locally stocked for fast delivery- keeping your business running with minimal disruption
- Third-party certified to national performance standards PDI and UPC
- Reliable performance, backed by a 30-year guarantee

Total package shipped and ready for installation

Optional: Electronic monitoring Smartpro® wireless system monitors grease and sediment with the push of a button

### Introducing the EZ1™, It's About Time

Contractors have waited long enough for a floor drain that's easy to install and built for the long haul.

Zurn's EZ1-available in cast iron and plastic-comes out of the box as a complete system, allows for post-pour adjustment with an integrated strainer, provides job-site flexibility and maintains ongoing reliability.

Don't hesitate. Make the EZ choice. Learn more at zurn.com/ez1

# Installation Concerns

#### **Labor Savings**

- System secures drain to stub-out pipe, sub floor or structural deck to prevent movement during installation process
- Pre-assembly to rough-in height allows for quick and easy job site placement
- Stabilizing system keeps drain secured in concrete, eliminating the need for fire stop, drypack, and grout to hold the drain in place

#### Versatility

- Z400-SR Stabilizing Ring for 8-3/8. floor drain for stub out installation
- Z1035 Stabilizer Plate for 8-3/8" floor drain and Z1400-K cleanout for sub floor installation
- Z1035-Q Stabilizer Plate for 8-3/8" floor drain and Z1400-K cleanout for structural deck installation
- Z1036 Stabilizer Plate for 12" and 15" sub floor installation
- Z1903 Stabilizer Plate for Z1900 A.R.E floor sink and Z1750 stainless floor sinks for sub floor installation

The Erie County Medical Center (ECMC) in Buffalo, New York needed to replace the 80-year-old Erie County Nursing Home, formerly of Alden, New York, as the home was quickly running out of space to provide effective, long-term patient care. The original two-year construction plan was revised with an accelerated project completion of 15 months. ECMC needed a plumbing contractor who could provide a labor-saving solution to meet their aggressive deadline.

The Lavatory EZ Carriers (Z1231-EZ) were key labor-saving products installed at ECMC. These concealed arm lavatory carriers are assembled and prepackaged at the factory. Once on site, the scale on the adjusting bars lets you quickly set centerline dimensions. This allows for less work at the site, and a reduction in overall installation time.

"My workers in the field prefer to use Zurn products," says Chad Krajewski. "They're well made, reliable, sturdy, and are easy to assemble. It's also comforting to know that Zurn provides a variety of customizations which will help a product or installation meet specific site requirements." Krajewski added that these carriers were significant time savers that fit well into his construction plans.

"I chose Zurn products because
I was looking to save time...Many
construction projects now are 'hurryup,' and clients want them to be
completed in record time while still
significantly cutting labor costs. Today,
with tighter schedules and less room
to spend on construction projects,
Zurn solutions are a
great option for contractors."

CHAD KRAJEWSKI

Plumbing Foreman, MLP Plumbing.

Beauty Meets Function and Performance - Ideal for Residential, Health Care, and Hospitality Applications

Discover how easy it can be to create a barrier-free shower enclosure that delivers reliable performance and architectural design. The ZS880 eliminates the need to slope the finished flooring in multiple directions, allowing drainage of a substantially larger floor surface area than traditional shower drains. Instead, pitch the floor in one direction towards the linear shower drain, and finish the job in record time. A beautiful installation has never been so simple.

#### **Innovative**

- Patent pending frame and grate features allow effortless height and level adjustment, reducing pooling
- Barrier-free installation creates accessibility and freedom in applications requiring ADA compliance
- Performance engineered channel promotes superior water evacuation

#### **Labor Saving**

- Integral tiling edge reduces installation time while protecting flooring from damage
- Adjustable anchoring feet provide stability before and during the concrete pour
- Integral flange allows hassle-free membrane attachment
- Type 304 stainless steel construction provides corrosion resistance, durability, and low maintenance

#### Versatile

- Extensive grating design and decorative finish options enhance aesthetic appeal
- Low-profile design allows installation in 2" over pour
- Customization available to suit an array of project needs

The -DP Option is Top of Class, with a Proven Feature Set That Will Save Time and Money

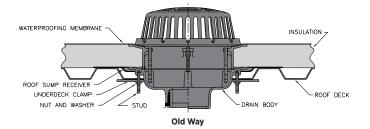

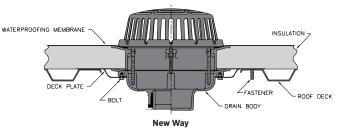

#### **Labor Saving**

- -DP option features ease of installation for quick job completion
- Entire roof drain assembly installed from topside of roof requiring only pipe connection installation underside roof
- Deck plate replaces the need for separate under deck clamps and roof-sump receivers
- Pipe connection is completed

#### Versatility

- Three size (-DP) for trouble-free fit 8", 12", and 15" diameter drains
- Multiple slot arrangements to accommodate a variety of roof decks
- Constructed of 14-guage steel with a corrosive-resistant finish

See (-DP) in the roof drain section for ordering information.

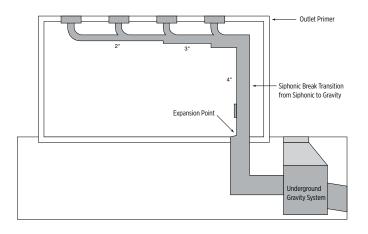

© This symbol denotes a product that is engineered to reduce installation and rework time.

For additional product information, please visit zurn.com/laborsavings

#### **O Z130 SIPHONIC ROOF DRAIN WITH DECK PLATE**

Full-Bore Flow Achieved Siphonic Technology Provides a Higher Velocity and Flow Volume

Siphonic Roof Drain System

#### **How It Works**

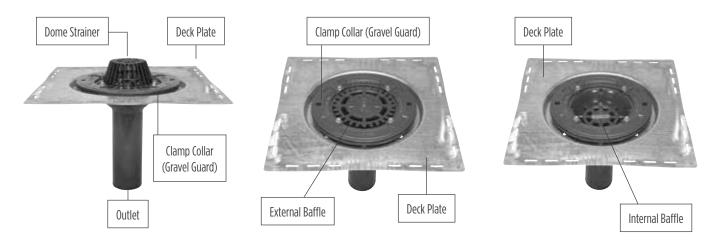

- Siphonic drainage can be achieved by adding/securing a highly engineered air baffle to the sump of a standard conventional drain
- This air baffle prevents vortex flow while restricting air from entering the vertical tailpipe and horizontal collector piping
- As water forces air out, a negative head pressure is created in the collector pipe and the water is sucked off the roof
- In a Zurn Siphonic Drain, full-bore flow occurs with 2" of water above the air baffle
- Multiple drains can flow into a common horizontal collector pipe.
   This pipe eventually turns downward into a vertical downspout and transfers to conventional gravity drainage when below grade.
- When not operating under full flow, the system drains like a gravity system

#### Benefit Summary of a Zurn Siphonic System

- No pitch requirement in piping to induce flow
- Smaller pipe diameters get equal flow rates
- Flow Rates of Zurn Siphonic:
   2" 149 gpm, 3" 380 gpm, 4" 704 gpm
- Vertical stack placement is flexible
- No cleanouts necessary in system. Higher flow velocities help to clean pipes
- · More efficient than conventional drainage
- Use of recycled materials

#### **9 Z130 SIPHONIC ROOF DRAIN WITH DECK PLATE**

#### **Components of a Siphonic System**

#### Plan a Custom Siphonic System

To determine the number of drains:

- 1. Select location of the drains on the roof.
- 2. Select the location of the down pipe.
- 3. Horizontal collector pipe length should not exceed 20 times the building height.
- Maximum distance between SDS drains with a common collector pipe is 65 feet.
- 5. Use the chart below to select the number of drains based on square feet and rainfall data.

Note: This tool can be used for a quick estimate for number of drains - must have system designed by Zurn for complete piping layout.

#### **Siphonic Design Questions**

Please fill out the questions below along with building plans including roof layout and building sections as a DWG file.

- 1. What kind of roof construction is it? (details, surface)
- 2. What are the measurements of the sections of the roof?
- 3. Is there a specific location the roofer would like the drains to be placed?
- 4. Will a rainwater harvesting system be used on this project?
- 5. What is the rainfall data for the area?
- 6. Do you have ground plans for the building sections?
- 7. Where do you want the down pipe located?
- 8. What material of piping are you using? (PVC, cast iron)
- 9. What is the minimum height of the horizontal drainage pipe?
- 10. Are there any specific areas where drains cannot be located?
- 11. Are overflow drains required?

#### SDS with Air Baffle, Machined Collar Clamp, and Zurn Dome

	ROOF DRAIN VERTICAL REQUIREMENT FOR HORIZONTAL ROOF AREAS AT VARIOUS RAINFALL RATES										
LEAD	DER SIZE		HOURLY RAINFALL IN INCHES								
		1	1.5	2	2.5	3	4	5	6	7	8
PIPE SIZE (IN.)	OPEN AREA (SQ. IN.)		TOTAL SQUARE FOOTAGE COVERED PER DRAIN*								
2	2.66	14,188	9,458	7,094	5,675	4,729	3,547	2,837	2,364	2,026	1,773

<sup>\*</sup>Theoretical value based on ideal condition of our tests in the University of Munich (without safety factor).

Having proper drainage on a green roof is a critical aspect of the system. If the system is not able to drain properly, it can negatively impact the vegetation due to over-saturation of the soil. As the soil takes on excessive amounts of water, it continues to add weight to the roofing structure. This added load has the potential to compromise the structural integrity of the roof. In order to prevent these situations from occurring, the roof drain must allow adequate flow through the drain at all times.

#### **Performance**

Stainless steel perforated extension allows for optimal flow into the roof drain while simultaneously keeping debris out.

#### **Ease of Maintenance**

Removable lid allows for easy routine maintenance.

#### Versatility

Customizable enclosures guarantee the roof drain aligns with the green roof surface and offer an aesthetically appealing finish to the roof environment.

#### **Flexibility**

Simplify the installation process by customizing the order to ship the perforated extension after the drain has been installed

# Discover the paired performance of the ZShield and EZ1™ Technology

The leading drain manufacturer now offers the easiest to install barrier trap, the ZShield minimizes evaporation, preventing odors, gases, and insects from entering up through the drain.

#### **Features and Benefits**

- Universally designed to easily be installed in almost any floor drain
- Designed for new construction and retrofit applications
- ASSE, ICC and IAPMO Approved

#### **Engineering Specification**

ZURN Z1072 Barrier trap seal device for use with floor drains to minimize trap evaporation. Product is comprised of an ABS rigid structure, silcone gasket and seal for 2" [51 mm], 3" [76 mm], 3-1/2" [89 mm], and 4" [102 mm] sizes. Device is engineered to comply with the performance requirements of ASSE 1072 standard and is third party listed with IAPMO (cUPC) and ICC (ICC cES PMG).

#### **ZShield Approvals**

ASSE® Listed 1072-2007, ICC, and IAPMO® Listed

**Z1072 ZShield Barrier Trap Seal** Available in 2", 3", 3-1/2", 4"

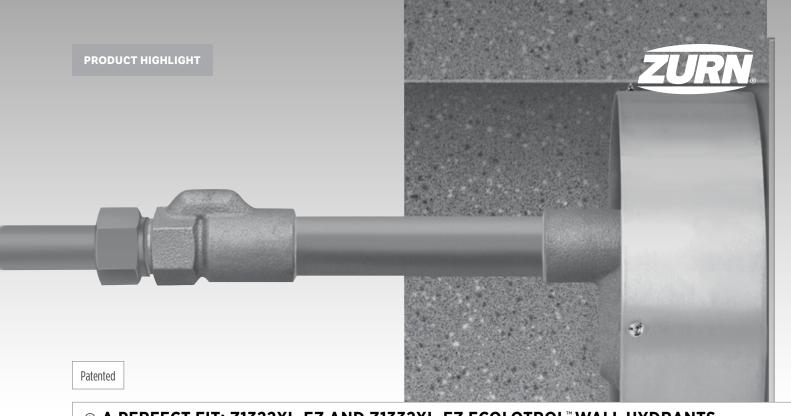

#### **Complete System Saving Time and Money**

Zurn Commercial Drainage takes pride in our effort to always bring the contractor new products that save time and allow for job site flexibility. Pairing the new ZShield for either new construction or retrofit application, allows for easy installation utilizing the neoprene gasket for a secure fit.

#### A Name You Can Trust

From the contractor to the building owner, Zurn has always provided products that provide a safe and effective solution. Pair your drain with a ZShield Barrier Trap for that extra security and aesthetics your building requires.

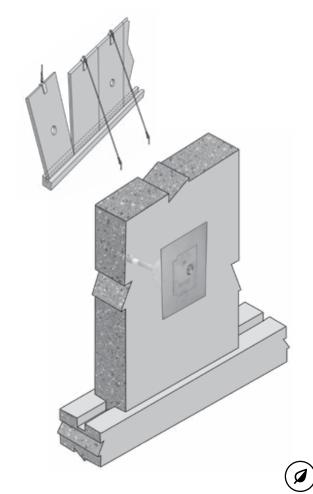

#### 

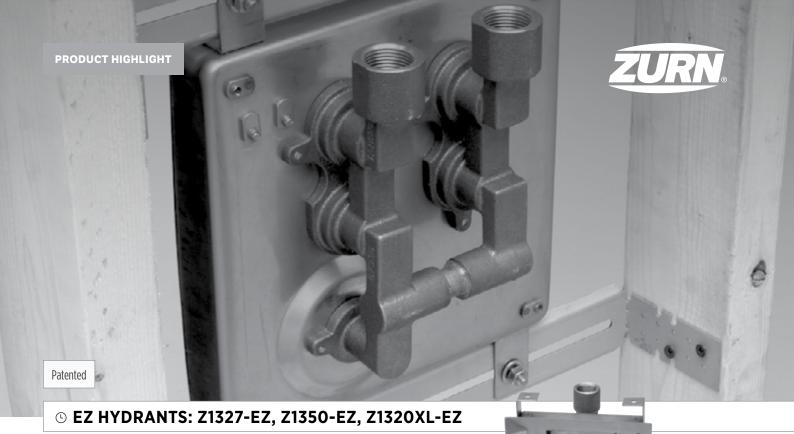

# For Installation in Tilt-Up Construction

The 7-7/8" diameter sleeve of the Zurn Z1322-EZ and Z1332-EZ Ecolotrol wall hydrants is designed exclusively for tilt-up installations. They have many benefits over square or rectangular hole type installations, including:

- Coring an 6" diameter hole in the wall results in time and labor savings over trying to hammer drill a square or rectangular hole
- Coring makes a smooth and clean cut opening without damaging the wall or chipping the interior wall surface, whereas a square or rectangular hole can crack or damage the precast wall during hammer drilling
- Smooth interior wall surface is easy to insulate (if required)
- No materials or labor are required to repair the interior wall surface
- Round sleeves have holes that allow the installer to secure them to the wall with hardware
- Wide box face fit flush with the wall surface and covers the 6" diameter hole
- Square box face flanges provide surface areas that seal and waterproof (if required)
- Tight, secure fit delivers vermin-proof installation

Z1322XL-EZ and Z1332XL-EZ Ecolotrol lead-free wall hydrants offer a safe, reliable solution that exceeds federal requirements.

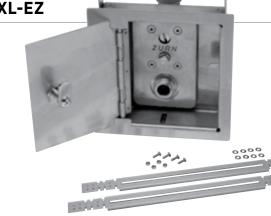

# Ease of Installation Paired with Excellent Durability

#### Z1327-EZ and Z1350-EZ

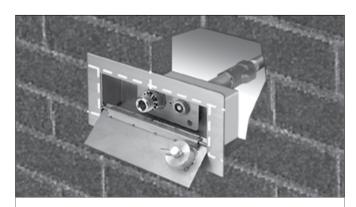

- All fabricated stainless steel constructed boxes provide a long-lasting finish
- Mounting braces provide fast, rigid installation of the hydrant box assembly
- Hydrant box and braces are designed to fit inside a standard 2" x 4" stud wall on 16" or 24" centers
- Mounting braces allow hydrant box assembly to be easily adjusted left or right to a desired location, and locked in place prior to finished wall placement
- Mounting braces eliminate the use of additional material on a job site to form and adjust the braces to fit within the wall and accommodate the hydrant

#### **Z1320XL-EZ**

- All fabricated stainless steel constructed box provides a long-lasting finish
- Hydrant box is designed to fit in one standard modular brick course
- Wide flange surface hides the wall rough-in opening after installation
- Hydrant cover opens downward with a full 180° rotation
- Optional wall clamp assembly provides rigidity and helps secure hydrant box to the wall
- Lead-free hydrant provides a safe, reliable solution that exceeds federal requirements

Z1350-EZ encased, moderate climate wall hydrant for narrow wall installation with mounting bracket hardware

Z1320XL-EZ encased Ecolotrol™ lead-free "anti-siphon," automatic draining wall hydrant installed in one standard masonry course

See pages 273, 276, and 279 for ordering information.

This symbol denotes a product that is engineered to reduce installation and rework time.

## Zurn Meets Health Care Challenges

Million of adults in the United States that are classified as overweight, with over half of that number being considered obese. Nine million are considered to be extremely obese or bariatric patients. Due to the increasing number of bariatric patients, there has been a spike in gastric bypasses, stomach reductions, and banding operations which has led to an increase in the amount of bariatric patients in hospitals.

In order to help meet the needs of special bariatric care, Zurn has developed both bariatric designed toilets and support carriers for hospital restrooms. With paired performance options available up to 1,000 pounds Zurn knows how support this growing concern.

Z5681 750 - 1,000 lb Elongated Wall Hung Water Closet

Z1201-XH and Z1202-XH Extra Heavy Carrier Systems Support up to 750 lb

Z5691 1,000 lb Rating Bariatric Wall Hung Water Closet

Z1201-XB and Z1202-XB Bariatric Carrier Systems Support up to 1000 lb

#### **ZURN BARIATRIC PROVIDES SUPERIOR PERFORMANCE**

#### **Z5681**

750 - 1,000 lb Elongated Wall Hung Water Closet

- Installation of the paired carrier and closet guarantee performance and safeguard against catastrophic failure from using different manufacturer's carrier and closet
- 3-year Zurn One System warranty
- 1.6 qpf, siphon jet type flush
- Full compliance with ASME/ANSI A112.19.2 flush performance testing
- 1,000 lb load rating in accordance with ASME/ANSI A112.19.2
- Manufactured of type 304 stainless steel (optional brushed stainless steel finish) seamless construction with antimicrobial powder-coated exterior surface
- 1-1/2" top inlet spud connection
- Antimicrobial polypropylene elongated, self-centering, non-shift seat design with integral molded bumpers

### Z1201-XH and Z1202-XH

Extra Heavy Carrier Systems Support up to 750 lb

- Provides paired performance up to 750 lb behind the wall and 500 lb at the closet fixture
- Maintains additional support and a degree of safety, regardless of the restroom location
- Wall hung closet fixture provides a sanitary environment by keeping the toilet fixture off the floor
- Designed for both new and retrofit applications and maintains the use of 5/8" studs that are standard for all wall hung fixture installations
- Specify the Z1201-XH for horizontal extra heavy-duty carrier needs and the Z1202-XH for vertical extra heavy-duty carrier requirements

#### **Z5691**

1,000 lb Rating Bariatric Wall Hung Water Closet

- Installation of the paired carrier and closet guarantee performance and safeguard against catastrophic failure from using different manufacturer's carrier and closet
- 3-year Zurn One System warranty
- Full compliance with ASME/ANSI A112.19.2 flush performance testing
- 1,000 lb load rating in accordance with ASME/ANSI A112.19.2
- 1.6 gpf, siphon jet type flush
- Extra large bariatric-sized seating area for enhanced patient comfort
- Manufactured of type 304 stainless steel (optional brushed stainless steel finish) seamless construction with antimicrobial powder-coated exterior surface
- 1-1/2" top inlet spud connection
- Antimicrobial polypropylene elongated, self-centering, non-shift seat design with integral molded bumpers

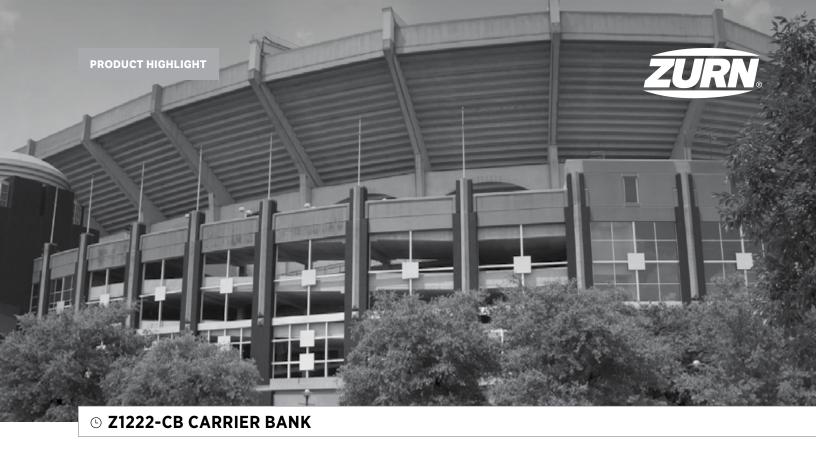

#### **Z1201-XB and Z1202-XB**

Bariatric Carrier Systems Support up to 1,000 lb

- The Bariatric Room Design Advisory Board (BRDAB), created by The Hill-Rom Company, has targeted bariatric room maximum design for 1,000 lb for chairs, beds, and toilet fixtures
- Wall hung closet fixture provides a sanitary environment by keeping the toilet fixture off the floor
- Designed for new and retrofit applications and maintain the use of 5/8" studs that are standard for all wall hung fixture installations
- Integral finishing frame provided to square up the finished wall, reduce installation time, and add support
- Specify the Z1201-XB for horizontal and the Z1202-XB for vertical Bariatric Carrier requirements

# Designed to Speed Up Your Installation

Multiple station plate system provides an extended length plate fabricated with exact center-to-center locations to accommodate a bank of multiple urinals. Custom-length plates are specific to job requirements and are provided with loose uprights and boxed mounting hardware and studs. Ideally suited for prefabricated applications.

The following information is necessary when specifying the carrier bank:

- Fixture manufacturer, model number, and quantity of fixtures
- Center-to-center spacing of urinals
- Handicap fixture quantity and location (if applicable)
- Wall thickness

Note: Custom carrier banks are available for all Zurn plate type systems.

See page 254 for ordering information.

#### **CUSTOMER GUIDE INSTRUCTIONS**

Each product section in this catalog is introduced by a cover page showing a representation of products. Additional information varies by product section, but generally consists of the following:

APPLICATION INDEX	General guide to the characteristics of the products and their design.
PRODUCT COMPLIANCE	List of standards and approvals that apply.
PRODUCT DESCRIPTIONS	Each product page contains a product photograph, engineering dimensional drawing, engineering specification, pricing chart, available outlet types and sizes, and the appropriate prefix and suffix options.
TECHNICAL DATA	General overview of product characteristics, assemblies, and installation data.

CLEANOUTS

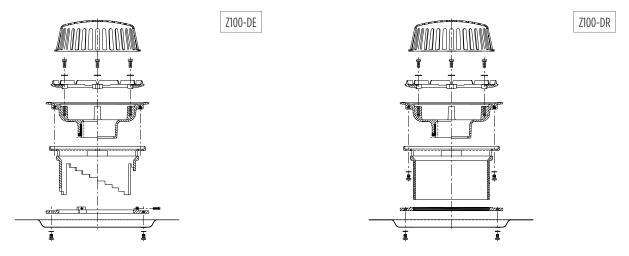

#### **ROOF DRAIN - PRODUCT COMPLIANCE**

Zurn roof drains are constructed of high quality materials and, in general, are designed to meet the requirements of ASME Standard A112.6.4 (revision and redesignation of ANSI A112.21.2M).

For verification of a selected roof drain, contact your local Zurn Sales Representative.

#### **ROOF DRAIN - GENERAL INFORMATION**

Zurn roof drains are comprised of three basic components: a body (sump), a combination membrane flashing clamp/gravel guard, and a dome strainer. Two of Zurn's roof drains are the Z100-DE and Z100-DR, shown below. These illustrate the basic components and options: the adjustable extension -DE (Deck Extension), -DR (Drain Riser), and Top-Set Roof Deck Plate (-DP).

**Note:** Neo-Loc outlets are not recommended for roof drain applications due to the watertight integrity of the Neo-Loc connection to the leader pipe being dependent upon adequate leader pipe support and accurate perpendicularity of leader pipe into Neo-Loc gasket.

#### **ROOF DRAIN - APPLICATION INDEX**

Roof drain selection should be made with a specific type of roof construction in mind. The many types and sizes of drains offered by Zurn, coupled with a wide array of available options, provide you with a roof drain for all applications.

APPLICATION	RECOMMENDED ROOF DRAIN
Main Roof	Z100, Z100-90, Z104, Z105, Z107, Z108
High Capacity	Z101

#### **Z105** CONTROL-FLO™ ROOF DRAIN WITH PARABOLIC WEIR

#### **ENGINEERING SPECIFICATION**

Zurn Z105 15" diameter Control-Flo roof drain for dead-level roof construction features Dura-Coated cast iron body. Control-Flo weir shall be linear functioning with integral membrane flashing clamp/gravel guard and polydome. All data shall be verified proportional to flow rates. Each notch will allow 10 GPM flow per inch of rain water buildup above the drain.

## FLOOR DRAINS - GENERAL INFORMATION

Zurn floor drains are generally made up of a body, combination frame/clamp collar and top grate. The assemblies shown below illustrate the more common components utilized in floor drains.

Zurn floor drains are available in 2" through 10" outlet sizes (and 12" for specific drains and outlet type) with Inside Caulk, Threaded, No-Hub and Neo-Loc connections.

Z415 "Type B" Illustrated

#### Z541 Illustrated

#### FLOOR DRAINS - APPLICATION INDEX

The Zurn floor drains below are recommended for the applications listed. Most Zurn floor drains can be readily adapted for use in finished areas by using bronze or nickel bronze grates and strainers. (Use Prefix "ZB" or "ZN" preceding the product number in place of the usual "Z" Prefix.)

APPLICATION	RECOMMENDED FLOOR DRAIN
Automobile Parking Area	Z533, Z534, Z535, Z536, Z537, Z541, Z546, Z547, Z662, Z662-HF, Z761
Basement and Subterranean Areas	Z566, Z730
Boiler House and Maintenance Areas	Z541-90, Z546, Z645, Z761
Clinical, Surgical, Detention Areas	Z300, Z310, Z315, Z319, Z461
Entrances and Concourses	Z587, Z664, Z665, Z667
Finished Area/Gutter	Z460B, Z575
Finished Interior Floor Areas Adjustable	Z415-BZ1, Z415-SZ1, Z415-BZ1-DP, Z415-SZ1-DP, Z415B-DP, Z415S-DP, ZN415, ZS415, ZN450, Z451B, ZN453, ZN455, ZN456, Z460B, Z461
Finished Interior Floor Areas Adjustable with EZI™ Technology (Post Pour Adjustment)	Z415-BZ1, Z415-SZ1, Z415-BZ1-DP, Z415-SZ1-DP
Food Preparation Areas	Z320, ZN610-SS (Also See Sani-Flor Receptors - Z1900 Series)
Garage, Hangar and Service Areas	Z546, Z664, Z665, Z667, Z673, Z675, Z676
Indirect Waste Area (Condensate and Drip)	Z325, Z326, Z328, Z329, Z566
Industrial Areas – Vertical Adjustment	Z520, Z521, Z526
Medium Duty	Z550, Z551, Z609, Z611, Z667, Z730
Heavy Duty	Z508, Z509, Z511, Z512, Z520, Z521, Z532, Z539, Z541, Z545, Z575
Extra Heavy Duty	Z546, Z503, Z512, Z541, Z610, Z645, Z662, Z664, Z668, Z673, Z675, Z676
Traps and Backwater Valves	Z730, Z761
Planting Area	Z349, Z350
Prison Cell (Multi-Purpose)	Z355
Roadways	Z546, Z610, Z668, Z673

VALVES

## **CAST IRON EZ1™ NOMENCLATURE DECODER**

#### SHIM KIT -----

Shims built into the rough-in cover for tilt adjustment, screws included.

#### ROUGH-IN COVER -----

Designed to stand up to rigourous jobsites with 3,000 lb load rating.

#### PROTECTIVE LABEL -----

Keeps grate/cover finish intact until the job is complete.

#### COVER OPTIONS -----

**BZ1** = Round with Post-Pour Adjustability

SZ1- Square with Post-Pour Adjustability

**ZN** = Polished Nickel Bronze Top\*

**ZB** = Polished Bronze Top

**ZS** = Polished Stainless Steel Top

#### **BODY OPTIONS**

IC = Inside Caulk

IG = Inside Gasket

IP = Threaded

 $\mathbf{NH} = \text{No-Hub}$ 

NL = Neo-Loc

# OUTLET SIZES -----

Available in outlet sizes ranging from 2" through 6"

#### A Whole Family of Product

- -BZ1 = Round cast iron floor drain or cleanout
- -SZ1 = Square cast iron floor drain or cleanout
- **-DP** = Cast iron deck plate floor drain or cleanout

#### **Model Number Example**

#### [ZN][415]-[3][NH]-[5][S][Z1]-[DP]

**ZN** = Denotes cover material

**415** or **1400** = Denotes floor drain or cleanout

3 = Denotes outlet size

**NH** = Denotes outlet type

**5**, **6**, or **8** = Denotes cover size

**S** = Denotes round or square

**Z1** = Denotes post-pour adjustability

**DP** = Denotes deck plate

 $^*$ Comes standard with nickel bronze unless otherwise noted.

## © **Z415-BZ1-DP** BODY ASSEMBLY W/ "TYPE B" STRAINER, DECK PLATE AND EZI™ TECHNOLOGY

Patent Pending

#### **ENGINEERING SPECIFICATION**

Zurn Z415-BZ1-DP floor and shower drain features Dura-Coated cast iron body with bottom outlet, stainless steel deck plate and top assembly. EZ1 drainage series is engineered to simplify product installation, comprised of concrete shield to provide up to 1-1/4" [32] of vertical post pour adjustment, pre-packaged shims for tilt correction, and integrated, self-contained "Type B" light duty strainer with rough-in cover for protection during concrete pour.

# **ENGINEERING SPECIFICATION**

Zurn Z1035 floor drain installation stabilizer features #20 gage, galvanized steel plate with variable pipe opening, four support stud holes, and four nail holes. Complete with hardware bag containing four 3/8"-16 x 12" long studs and eight 3/8"-16 flanged locknuts.

#### NOTE

- 7-5/8" diameter stud holes are used to accommodate 8-3/8" diameter drain body. (To be used with no-hub and Neo-Loc outlet connections only.)
- 2. For typical installation, see Form No. FD72.

# **INTERCEPTORS - GENERAL INFORMATION**

Zurn manufactures three types of interceptors to meet all your plumbing needs: grease interceptors, solids interceptors, and oil interceptors. Zurn interceptors are designed for use in plumbing wastewater systems to prevent harmful or undesirable substances from entering the wastewater control system. Note: Interceptors are not pressurized vessels and should not undergo pressure testing.

To obtain more detailed information on Zurn interceptors, phone 855-ONE-ZURN, or contact your local Zurn sales representative.

# **INTERCEPTORS - APPLICATION INDEX**

Product selection should be made with a specific application and the type of construction in mind. The varied types and sizes of Zurn interceptors, along with their options, offer a selection for all applications.

<sup>\*</sup>A Zurn Solids Interceptor is recommended to be used in conjunction with all grease interceptors. See product information for details.

# **GREASE INTERCEPTORS - PURPOSE**

For over a hundred years, grease interceptors have been used in plumbing wastewater systems to permit free flow of drainage from sinks and similar equipment. They have played an important role in preventing grease accumulations from clogging waste pipes and sewer lines. They also help to improve operations at wastewater treatment facilities and prevent environmental problems caused by grease.

Zurn engineers were part of the original team that developed the current Plumbing and Drainage Institute Standard PDI-G101, which was first issued in 1949. PDI-G101 is now cited in numerous codes, as well as in Military Specification MIL-T-18361. Many Zurn grease interceptors comply with PDI-G101 and carry the PDI label.

# WHY ARE GREASE INTERCEPTORS NEEDED?

- 1. To prevent waste pipes in buildings from becoming clogged.
- 2. To prevent sewer lines from clogging and improve operation of water treatment plants by reducing the wastewater grease load from entering the plant.
- 3. To prevent environmental problems caused by grease mixed with other debris at landfills and in waterways.
- 4. To promote the recycling of recovered clean grease.

Grease entering the wastewater collection system presents major problems from the moment of entry and continuing to the final stage in wastewater treatment. It is an expensive burden in sewer pipes due to blockage and reduced capacity, causing the need for frequent cleaning. In severe cases, entire lengths of sewer pipe must be replaced due to solidification of the grease and other debris. Grease also causes substantial problems in wastewater treatment facilities because of its detrimental effect on the bacterial process of wastewater treatment. Not only is there a grease removal problem, but large quantities of grease can overload and compromise the digestive process, adversely affecting the operation of the wastewater treatment plant.

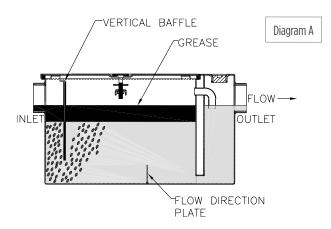

Another important reason for grease interception and recovery is for recycling. Grease, if recovered and purified (free of contaminants and water) can be turned into a valuable resource. Recovered grease can be used in the manufacturing of fertilizers, soaps, animal feed, cosmetics, and components of explosives such as nitroglycerine.

#### **DESIGN**

What makes Zurn interceptors most efficient are superior design characteristics (Diagram A).

Standard Zurn units are provided with a high inlet which allows all flow to empty into the interceptor. This keeps inlet lines from becoming clogged with grease buildup, which occurs with low inlet units and with large concrete separators buried outside. Because the static water level is maintained at the bottom of the outlet, any piping into the interceptor below this elevation will remain filled with water.

The Zurn solid vertical baffle plate immediately diffuses flow and channels the incoming fluids directly to the bottom of the separation chamber. A flow directing plate on the outlet side of the vertical baffle enhances flow in an upward direction and traps solids that may inadvertently enter the interceptor. This provides the maximum amount of time possible for separation to occur. Grease being approximately 90% of the weight of water, separates and floats to the top of the water under these conditions. The calming effect on the flow and the extended time sequence in the chamber allows for more efficient separation (Diagram A).

Zurn interceptors have an unobstructed separation chamber permitting the entire baffle to be lifted upward and removed. This provides for fast, easy cleaning which minimizes the amount of time the lid is off and the contents are exposed to the environment.

Odor from accumulated grease in an interceptor may pass back through the piping system and through the drain opening. An additional trap should be considered between the fixture and interceptor. Consult local codes.

Zurn interceptors are manufactured standard with a removable cleanout plug on the outlet side of the separation chamber, past the integral trap seal. This allows for quick, easy access to the outlet drainage pipe, should an obstruction or blockage occur downstream of the interceptor.

Zurn 1100 Series Interceptors are 100% steel construction, coated with a white acid-resisting epoxy (A.R.C.). Zurn Series Interceptors with flow rates from 4 to 50 GPM are certified by the Plumbing and Drainage Institute (PDI). Zurn Grease Interceptors with flow rates from 20 to 50 GPM are listed by the International Association of Plumbing and Mechanical Officials (IAPMO).

#### **SIZING**

The Plumbing and Drainage Institute (PDI) as well as some national and local codes have recognized different ways of sizing grease interceptors. It is advisable to check with local authorities for sizing requirements in your particular locality.

The following pages outline the most widely used sizing methods along with some common variables which, if present, could adversely affect the operation of your grease interceptor. If any of the following variables are present, added care should be taken to select the proper size interceptor with appropriate options to compensate for each irregularity.

# VARIABLES AFFECTING GREASE INTERCEPTOR PERFORMANCE

#### **VELOCITY OF INCOMING WATER**

A higher velocity of water will contribute to a more turbulent

mixture. This will slow the grease separation process, thereby reducing efficiency.

Recommended Solution – Maximize incoming pipe size to lower flow velocity or install additional flow control fittings at all sources of flow.

#### RATIO OF GREASE TO THE WATER

The higher the ratio of grease particles to the water, the lower the efficiency of the interceptor.

Recommended Solution – Increase the size of the interceptor.

# SPECIFIC GRAVITY (WEIGHT) OF THE FILTRATES

Grease has a lower specific gravity than water and will rise to the surface quickly. Grease-laden food particles, having a higher specific gravity than water, will linger and accumulate at the bottom, eventually passing out of the interceptor.

Recommended Solution – Install a solids interceptor at the source of solid particles, prior to the grease interceptor.

#### POSSIBLE PRESENCE OF DETERGENTS IN THE SYSTEM

Grease-cutting detergents will break the liquid grease into minute particles that can cause these liquids to pass through the interceptor.

Recommended Solution – Minimize the use of detergents, or increase the size of the interceptor.

# PERCENTAGE OF MAXIMUM FLOW CAPACITY

If the maximum recommended flow is exceeded, the efficiency of the interceptor will decrease considerably.

Recommended Solution – Increase size of the interceptor to accommodate the increased flow, or install additional flow control fittings at all sources of flow.

#### LOCATION OF GREASE INTERCEPTOR

The interceptor should be located as close as possible to the source of grease. Waste pipes leading to the grease interceptor may become clogged if liquid cools prior to entering the grease interceptor.

# **Z250H** FOG-CEPTOR® INTERCEPTOR

Patented

U.S. PATENT #5,746,912 CDN PATENT #2,195,822

**ENGINEERING SPECIFICATION** 

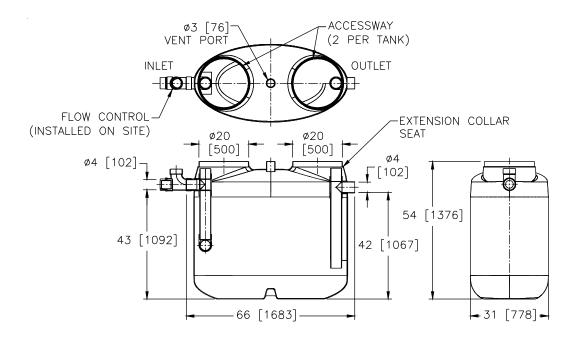

Zurn Z250H FOG-ceptor is engineered fiberglass, fats, oil, and grease interceptor, and dual manway interceptor with external flow control device. PDI and IAPMO rated at 100 gpm and 200 lb. Regularly furnished with 4" Schedule 40 PVC inlet and outlet. Includes two 20" diameter H-20 rated fiberglass bolted and gasketed frames and covers, four tubes of Sikaflex® bonding agent, one external flow control device, and two 3' high x 20" diameter extension collars.

# NOTES

Location of outlet from bottom of interceptor cannot be changed.

# **Z1165** 100 PPM GREASE INTERCEPTOR SYSTEM WITH SOLIDS INTERCEPTOR

Patented

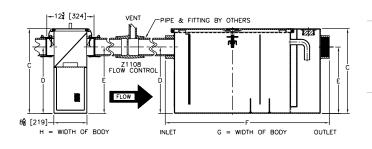

# **ENGINEERING SPECIFICATION**

Zurn Z1165 grease interceptor system features acid resistant coated interior and fabricated steel exterior, PDI rated at gpm and grease capacity, internal air relief bypass, bronze cleanout plug, removable pressure equalizing/ flow-diffusing inlet baffle, fixed bottom outlet baffle, and visible double wall trap seal. Gasketed, non-skid, secured cover completes tie down assembly with Z1108 flow control fitting. Includes acid resistant coated fabricated steel solids interceptor with replaceable filter bags, retainer plate, latched lid, and removable sediment basket. Grease interceptor effluent efficiency meets 100 parts per million when tested to EPA 1664 test method. Results based on the influent requirements in accordance with the maximum rated capacity given by Plumbing and Drainage Institute Standard PDI-G101. The presence of solids particles may cause results to vary per application.

# NOTES

Location of inlet and outlet from bottom of interceptor cannot be changed.

# **Z1170-UN** GREASE INTERCEPTOR WITH USER NOTIFICATION SYSTEM

# **ENGINEERING SPECIFICATION**

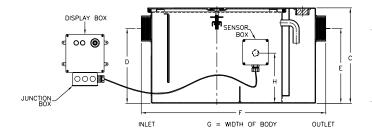

Zurn Z1170-UN grease interceptor features acid resistant coated interior and fabricated steel exterior, rated at \_\_\_\_gpm and \_\_\_\_lb grease capacity, internal air relief bypass, bronze cleanout plug, removable pressure equalizing/flow-diffusing inlet baffle, fixed bottom outlet baffle, and visible double wall trap seal. Gasketed, non-skid, secured cover comes complete with center tie down assembly and Z1108 flow control fitting. Includes encased fiberglass sensor box containing an electronic grease level sensor and a fiberglass display box with green power light, red grease level light, audio alarm, and junction box. Regularly furnished with a high inlet and outlet connection.

# **NOTES**

- 1. Location of outlet from bottom of interceptor cannot be changed.
- Factory installed sensor box is mounted on the left- or right-hand side of the unit when facing inlet (must be specified).
- 3. Power supply 120V GFCI.

# RECOMMENDED INSTALLATIONS

Sitting on the floor or recessed in a pit only. (A pit installation requires that a drain or sump pump be installed to keep the pit relatively dry.)

SS DRAINS

# **Z1171** LOW PROFILE GREASE INTERCEPTOR

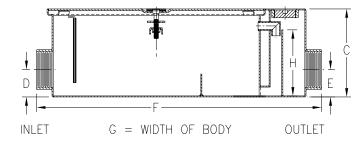

# **ENGINEERING SPECIFICATION**

Zurn Z1171 low profile grease interceptor features acid resistant coated interior and fabricated steel exterior, PDI rated at \_\_\_gpm and \_\_\_lb grease capacity, internal air relief bypass, bronze cleanout plug, removable pressure equalizing/flow-diffusing inlet baffle, fixed bottom outlet baffle, and visible double wall trap seal. Gasketed, non-skid, secured cover comes complete with center tie down assembly and Z1108 flow control fitting. Regularly furnished with 3" low inlet and outlet.\*

# CAUTION

Solids should not be permitted to enter a grease interceptor. Where solids are present, use a Zurn Z1183 or Z1183-DF solids interceptor (see pages 196 and 197). Installations using indirect piping to unit could result in standing water in floor sink or flooding if line blockage occurs. Interceptors must be maintained periodically in order to ensure proper operation of the system. Follow cleaning schedule based on usage.

## **Z1172-UN** LARGE CAPACITY GREASE INTERCEPTOR WITH USER NOTIFICATION SYSTEM

#### **ENGINEERING SPECIFICATION**

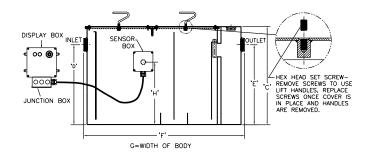

Zurn Z1172-UN Large capacity, Acid Resistant Coated interior and exterior fabricated steel grease interceptor, rated at \_\_\_gpm and \_\_\_l grease capacity, with internal air relief bypass, bronze cleanout plug, and visible double wall trap seal with removable pressure equalizing/ flow-diffusing baffle. Gasketed, non-skid, secured cover with removable lift handles complete with flow control fitting. Includes encased fiberglass sensor box containing an electronic grease level sensor (specify right or left side†), a fiberglass display box with one green power light, red grease level light, audio alarm, and junction box. Regularly furnished with inlet and outlet in high position.

#### **NOTES**

- 1. Location of inlet/outlet from bottom of interceptor cannot be changed. Power supply 120V GFCI.
- 2. †Sensor box is mounted on the left- or righthand side of the unit when facing inlet (must be specified).
- 3. Sizes 900 and 1000 require one cover.
- 4. Sizes 1100 and 1600 require two covers.
- 5. Sizes 1700 thru 1900 require three covers.

#### RECOMMENDED INSTALLATIONS

Sitting on the floor or recessed in a pit only. (A pit installation requires that a drain or sump pump be installed to keep the pit relatively dry.)

#### **Z1173** EJECTO-MATIC GREASE INTERCEPTOR

Sizes 1600-1900

Sizes 200-800

#### **ENGINEERING SPECIFICATION**

Zurn Z1173 ejecto-matic grease interceptor features acid resistant coated interior and fabricated steel exterior, PDI rated at \_\_\_gpm and \_\_\_lb grease capacity, internal air relief bypass, bronze cleanout plug, and visible double wall trap seal with removable combination pressure equalizing/flow-diffusing baffle and sediment tray and grease retention tray adjacent to grease draw-off valve. Gasketed, non-skid, secured cover comes complete with Z1108 flow control fitting. Regularly furnished with high inlet and outlet connection.

#### **NOTES**

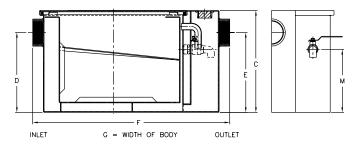

- Location of outlet from bottom of interceptor cannot be changed. Draw-off connection regularly furnished on outlet side.
- On sizes #200 and #300, the grease draw-off valve is located on the left-hand side of the trap when facing the inlet, instead of on the outlet side as shown.

#### **CAUTION**

Solids should not be permitted to enter a grease interceptor.

Where solids are present, use a Zurn Z1183 or Z1183-DF solids interceptor (see pages 196 and 197).

Installations using indirect piping to unit could result in standing water in floor sink or flooding if line blockage occurs.

# **Z1174** GREASE EATING BACTERIA DOSING UNIT AND SOLIDS INTERCEPTOR COMBINATION

ZS1174 Shown. Z is Standard.

#### **ENGINEERING SPECIFICATION**

Zurn Z1174 grease interceptor with automatic bacteria dosing unit features acid resistant coated interior and exterior fabricated steel exterior, rated at \_\_\_\_ gpm and \_\_\_ lb grease capacity, internal air relief bypass, bronze cleanout plug, and visible double wall trap seal with removable pressure equalizing/flow-diffusing inlet baffle and fixed bottom outlet baffle. Gasketed, non-skid, secured cover comes complete with center tie down assembly and Z1108 flow control fitting. Furnished with Z1183 ARC solids interceptor, 110 VAC pump, pump mounting hardware, 15 feet of poly tubing and 5 gallons of grease-eating bacteria. Regularly furnished with inlet and outlet in high position.

#### NOTES

Location of outlet from bottom for interceptor cannot be changed.

SANI-FLOR

## **SOLIDS INTERCEPTORS - GENERAL PRODUCT INFORMATION**

Zurn solids interceptors are specifically designed to capture and retain solid particles for a variety of different drain line applications. Units are available in Dura-Coated cast iron, bronze, Acid Resistant Coated steel and stainless steel, along with a multitude of screens designed for each application. If you require a solids interceptor not listed, phone 855-ONE-ZURN, or contact your local Zurn sales representative. Special screens and sizes are available to meet almost any need.

#### **SOLIDS INTERCEPTORS - APPLICATION INDEX**

Product selection should be made with a specific application and the type of construction in mind. The varied types and sizes of Zurn interceptors, along with their options, offer a selection for all applications.

APPLICATION	RECOMMENDED INTERCEPTOR
Food Preparation	Z1181, Z1182, Z1183, Z1183-DF, Z1183-FC
Hair Salons	Z1175, Z1176, Z1180, Z1184
Plaster	Z1180, Z1181
Barium	Z1180
Fish Scales	Z1181, Z1183, Z1183-FC, Z1185
Garbage Disposal	Z1181, Z1182, Z1183, Z1183-DF, Z1183-FC
Laundry, Clothes Washers	Z1185
With Z1170 and Z1173 Interceptors	Z1181, Z1182, Z1183, Z1183-DF, Z1183-FC

#### **SOLIDS INTERCEPTORS - SIZING**

All Zurn solids interceptors are designed for gravity flow where minimal head is expected. Zurn solids interceptors are designed to accommodate the flow rate of their inlet and outlet pipe size, provided they are maintained and kept clean.

Zurn solids interceptors should be sized by both expected flow rate and holding capacity. Z1185 lint interceptors must, however, be sized for the number of washing machines which they serve. Sizing for the Z1181 solids interceptor should be sized by the number and size of the sinks being served as is the case with the Z1170 grease interceptor.

			Recommended Size Solids interceptors		
Fixture Compartment Size (Inches)	Number of Compartments	Drainage Load (Gallons)	One-minute Drainage Period	Two-minute Drainage Period	
18 x 12 x 6	1	4.2	7	4

# -1

**Z1180** SOLIDS INTERCEPTOR

#### **ENGINEERING SPECIFICATION**

Zurn Z1180 solids interceptor works in lieu of fixture "P" trap. Features acid resistant composite, on-floor installation, removable PVC sediment bucket with a removable 3/32" diameter perforated flow defusing/intercepting PVC screen, top access, gasketed, secured cover, stainless steel draw latches and hardware with an ABS handle for easy removal of sediment bucket and screen.

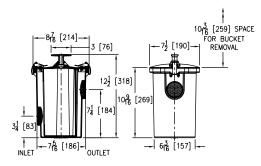

#### **NOTES**

†Regularly furnished with 2" threaded low inlet and high outlet.

#### **CAUTION**

Interceptors must be maintained periodically in order to ensure proper operation of the system. Follow cleaning schedule based on usage.

## **OIL INTERCEPTORS - GENERAL PRODUCT INFORMATION**

Zurn oil interceptors are designed to be similar to the grease interceptors. Both work on the principle that oils are lighter than water and thus gravity causes the oil to rise and the solids to fall. Zurn oil interceptors come equipped with a removable sediment bucket on the inlet to trap stones, grit and other substances. Their perforated, flow-diffusing baffle eliminates turbulence and allows for high efficiency of separation.

All Zurn Z1186 and Z1188 oil interceptors are supplied with a specific gravity oil draw-off tube assembly. This assembly is to be set 1/8 above the static water level, per standard installation instructions. Once oil builds down to this level, the oil draws off by gravity through the tube assembly.

All Zurn oil interceptors are of 100% steel construction coated with a blue acid resisting epoxy. All Zurn oil interceptors are listed by the IAPMO. If you require an oil interceptor not listed phone 855-ONE-ZURN, or contact your local Zurn sales representative.

## **OIL INTERCEPTORS - APPLICATION INDEX**

Product selection should be made with a specific application and the type of construction in mind. The varied types and sizes of Zurn interceptors, along with their options, offer a selection for all applications.

APPLICATION	RECOMMENDED INTERCEPTOR
Maintenance, Parking Garage, Oil Spill Areas	Z1186, Z1186-ST, Z1187, Z1187-SI, Z1188, Z1188-ST, Z1189, Z1196, Z1198, Z1198-ST

#### **ENGINEERING SPECIFICATION**

Zurn Z1186 oil interceptor features acid resistant coated interior and fabricated steel exterior, bronze cleanout plug and visible double wall trap seal, removable combination pressure equalizing/flow-diffusing baffle and sediment bucket, horizontal baffle, adjustable oil draw-off, and vent connections (either side). Gasketed, non-skid, secured cover comes complete with flow control fitting. Regularly furnished with inlet and outlet in high position.

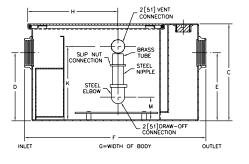

#### **NOTES**

Location of outlet from bottom of interceptor cannot be changed.

†Inlet and outlet sizes shown indicate standard operating sizes and flow control settings. Size #300 and #400 will have 3" connections reduced to 2" as standard. Size #700 and #800 will have 4" connections reduced to 3" as standard.

# **Z1188-ST** Large capacity oil interceptor with integral storage tank

#### **ENGINEERING SPECIFICATION**

Zurn Z1188-ST oil interceptor features acid resistant coated interior and fabricated steel exterior, bronze cleanout plug and visible double wall trap seal, removable combination pressure equalizing/flow-diffusing baffle and sediment bucket, horizontal baffle, adjustable oil draw-off, and vent connections. Secured, gasketed, non-skid cover comes complete with flow control fitting and left-hand integral storage tank. Regularly furnished with inlet and outlet in high position.

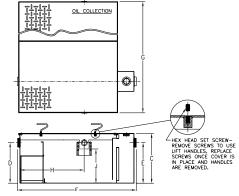

#### **NOTES**

Location of outlet from bottom of interceptor cannot be changed.

#### **CAUTION**

# **Z1194** OIL LEVEL SENSOR RETROFIT KIT

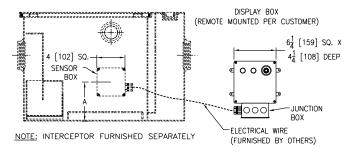

#### **ENGINEERING SPECIFICATION**

Zurn Z1194 oil level sensor retrofit kit features a fiberglass sensor box containing an electronic oil level sensor and a fiberglass display box with one green power light, red oil level light, audible alarm, and junction box. Intended use for retrofit applications on Z1186 and Z1188 oil interceptors. Power supply 100 to 240 VAC at 47 to 63 Hz, GFCI.

#### CALITION

Caution: Interceptor must be cleaned of solids and other debris and the sensors wiped off on a regular basis in order to ensure proper operation of the system. Z1194 TO BE USED WITH INTERCEPTORS FOR ON-THE-FLOOR INSTALLATION ONLY.

## **Z1196** OIL INTERCEPTOR WITH OIL LEVEL SENSOR

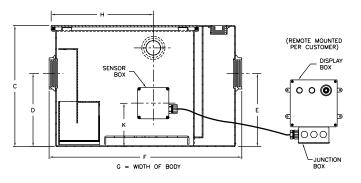

#### **ENGINEERING SPECIFICATION**

Zurn Z1196 oil interceptor features acid resistant coated interior and fabricated steel exterior with a fiberglass sensor box containing an electronic oil level sensor (specify right or left side<sup>†</sup>) and a fiberglass display box with one green power light, red oil level light, audible alarm and junction box. Includes bronze cleanout plug and visible double wall trap seal, removable combination pressure equalizing/flow-diffusing baffle and sediment bucket, horizontal baffle, and vent connections either side. Secured, gasketed, non-skid cover comes complete with flow control fitting. Regularly furnished with inlet and outlet in high position.

#### NOTES

- †Installed sensor box is mounted on the left- or right-hand side of the unit when facing inlet (must be specified).
- 2. ‡Inlet and outlet sizes shown indicate standard operating sizes and flow control settings. Size #300 and #400 will have 3" connections reduced to 2" as standard. Size #700 and #800 will have 4" connections reduced to 3" as standard. If changed, flow control must be adjusted accordingly.
- 3. Power supply 120V GFCI.
- 4. Recommended Installations: Sitting on the floor or recessed in a pit only. (A pit installation requires that a drain or sump pump be installed to keep the pit relatively dry.)
- 5. For pit installation, see Form No. IT66.

## **Z1198** LARGE CAPACITY OIL INTERCEPTOR WITH OIL LEVEL SENSOR

#### **ENGINEERING SPECIFICATION**

Zurn Z1198 oil interceptor with a fiberglass sensor box containing an electronic oil level sensor (specify right or left side†) features large capacity, acid resistant coated interior and fabricated steel exterior, and a fiberglass display box with one green power light, red oil level light, audible alarm and junction box. Includes bronze cleanout plug and visible double wall trap seal, removable combination pressure equalizing/flow-diffusing baffle and sediment bucket, horizontal baffle, and vent connections either side. Secured, gasketed, non-skid cover comes complete with flow control fitting. Regularly furnished with inlet and outlet in high position.

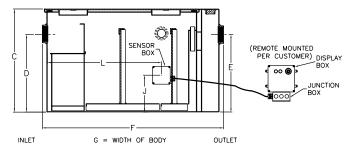

#### **NOTES**

- 1. †Installed sensor box is mounted on the left- or right-hand side of the unit when facing inlet (must be specified).
- 2. Power supply 120V GFCI.

#### RECOMMENDED INSTALLATIONS

Sitting on the floor or recessed in a pit only. (A pit installation requires that a drain or sump pump be installed to keep the pit relatively dry.) For pit installation, see Form No. IT62.

#### **CAUTION**

## Z1198-ST LARGE CAPACITY OIL INTERCEPTOR WITH INTEGRAL STORAGE TANK AND OIL LEVEL FLOAT SENSOR

#### **ENGINEERING SPECIFICATION**

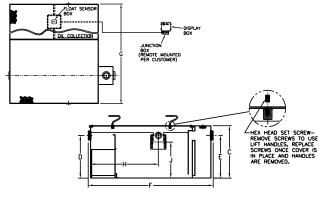

Zurn Z1198-ST oil interceptor features acid resistant coated interior and fabricated steel exterior, fiberglass sensor box containing an electronic oil level sensor, fiberglass display box with audio and visual alarms and junction box. Includes bronze cleanout plug and visible double wall trap seal, removable combination pressure equalizing/flow-diffusing baffle and sediment bucket, adjustable oil draw-off, and vent connections. Secured, gasketed, non-skid cover comes complete with flow control fitting and left hand integral storage tank. Regularly furnished with inlet and outlet in high position.

#### **NOTES**

Location of inlet and outlet from bottom of interceptor cannot be changed.

# **CARRIER - PRODUCT COMPLIANCE**

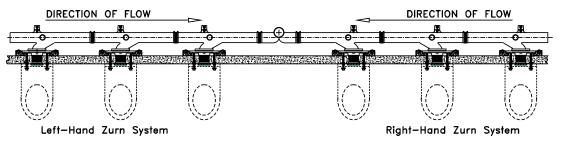

Zurn systems comply with ANSI A112.6.1M and are listed with IAPMO. For verification of a selected carrier, contact your local Zurn Sales Representative.

# **CARRIER - HOW TO SPECIFY**

## **CARRIER - TECHNICAL DATA**

#### **DETERMINATION OF RIGHT- AND LEFT-HAND SYSTEMS**

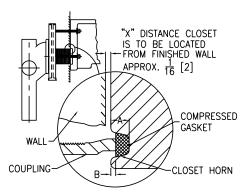

Stand facing the fixture.

If flow is from the right, Zurn System is righthand. If flow is from the left, Zurn System is left-hand.

# **CARRIER - TECHNICAL DATA**

#### **DETERMINATION OF COUPLING AND FIXTURE DISTANCES FROM FRONT OF WALL**

To ensure a tight seal at outlet of closet having a rectangular groove, the front end of the coupling should be located to compress the gasket adequately when the fixture is in the desired location. This dimension will vary depending on depth of recess (Dim. A) in closet. The following formula may be used to determine amount coupling should extend (Dim. B) in front of finished wall.

Inset illustrates depth of gasket recess in fixture and coupling with normal pressure on gasket.

A = depth of recess in closet

X = distance closet is to be located from finished wall

B = distance coupling should extend in front of finished wall.

Thus, A + X - 1/2" = B

With fixtures having vee-shaped grooves, coupling may have to extend an additional 1/8" or more. With any closet, the coupling must compress the gasket enough so that the adhesive-coated surfaces are in good contact with the china and the face of the coupling.

**IMPORTANT:** Bearing nuts and washers must be located properly to establish and maintain dimension "X."

#### DISTANCE FIXTURE BOLTS LOCATED IN FRONT OF WALL

To locate fixture bolts:

T = thickness of wall flange of closet

X = distance closet is to be located from finished wall

B = distance fixture studs should extend in front of finished wall.

Thus, T + X + 5/8'' = B

"Minimum 'P' Dimension" is the minimum dimension from front of faceplate to finished wall:

Z1201/Z1202/Z1203/Z1204	Z1208 thru Z1209	
1-3/4"	1"	

"Standard 'P' Dimension" which is regularly supplied unless otherwise specified, provides for the following dimensions from the front of the faceplate to finished wall:

Z1201/Z1202/Z1203/Z1204		Z1208 th	ru Z1209
MIN. MAX.		MIN.	MAX.
5"	6"	4"	5-1/8"

Longer 'P' dimensions (or shorter) with couplings up to, and including 12", are furnished at no extra charge. An additional charge will be made for greater 'P' dimensions (see Suffix -CL).

#### **ALLOWANCE FOR CONCEALED FLUSH VALVES**

When wall closets are installed with concealed flush valves having rear inlet supply, location of faceplate is important – for Siphon Jet bowls, it is not necessary to locate faceplate behind supply line, since supply line will clear top of faceplate and vent line. For Blow Out installations, however, faceplate must be located behind supply line to prevent interference of faceplate with supply line.

Dimensions below based on B = 3/8".

Z1201/Z1202/Z1203/Z1204					
'P' Dim	ension*				
Min.	Min. Max.		Stud Length		
1-3/4	2-3/4	2-3/4	6		
2-1/2	3-1/2	3-1/2	8		
3	4	4	8		
4	5	5	8		
5	6	6	9		
6	7	7	10		
7	8	8	11-1/4		
7-1/2	8-1/2	8-1/2	11-1/4		
8-1/4	9-1/4	9-1/4	12-3/4		
9	10	10	12-3/4		
10	11	11	15-3/4		
11	12	12	15-3/4		

Z1208 thru Z1209				
'P' Dim	ension*		Stud Length	
Min.	Max.	Coupling Length		
1	1-7/8	2-3/4	6

#### ○ Z12O1-N EZCARRY® ADJUSTABLE HORIZONTAL HIGH PERFORMANCE SIPHON JET – NO-HUB SERIES

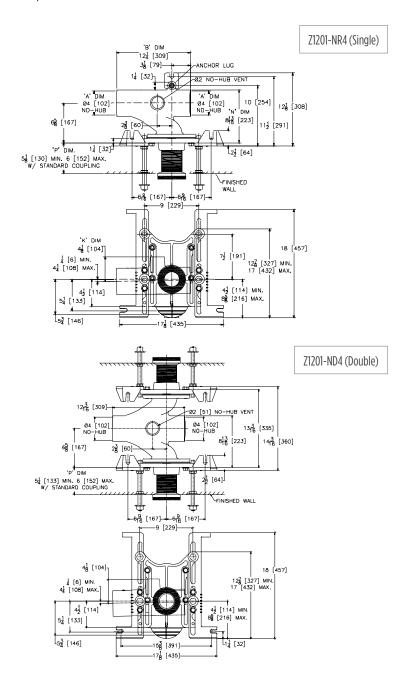

Patented

#### **ENGINEERING SPECIFICATION**

Zurn Z1201-N() EZCarry® horizontal siphon jet water closet carrier system features high performance waterway and () no-hub connections. System includes Dura-Coated cast iron right-hand, left-hand, or double main fitting with hydro-mechanically optimized sweep and extended 2" vent, adjustable gasketed faceplate, floor mounted pre-fab slotted foot supports with top anchoring pre-fab support base, heavy-duty 1/2" rear anchor tie down, fixture bolts, trim, stud protectors, bonded Neo-Seal gasket, and corrosion resistant adjustable 3" diameter x 6" coupling with integral test cap designed to increase flow velocity and line carry. EZCarry system complies with the requirements of ASME A112.6.1M, up to a 500 lb static load rate.

#### **NOTES**

- 1. Cut 4" adjustable coupling minimum "P" dimension obtainable = 2". EZ-Set™ coupling, minimum 'P' dimension obtainable = 4-1/4" or 2-1/16" for 12" NPT.
- 2. Feet bolted to floor using minimum 1/2" diameter anchors and back slots on carrier feet.
- 3. Rear anchor foot required for secure installation.

#### Z1201-N-XB EZCARRY® BARIATRIC CARRIER – 1000 LB ADJUSTABLE HORIZONTAL SIPHON JET – NO-HUB SERIES

Patented

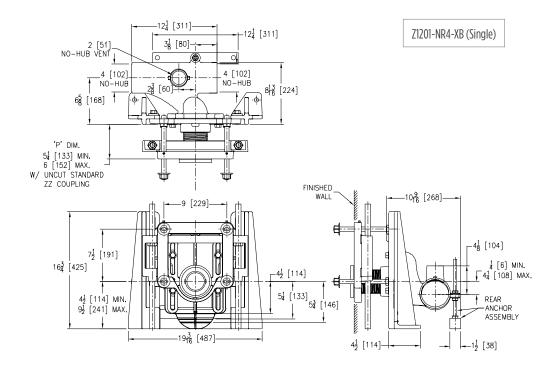

#### **ENGINEERING SPECIFICATION**

Zurn Z1201-N( )-XB EZCarry® bariatric horizontal siphon jet water closet carrier system features high performance Dura-Coated cast iron main fitting with hydromechanically optimized sweep, 4" no-hub connections, and extended 2" vent. Corrosion resistant adjustable cast iron coupling is designed to increase flow velocity and line carry. Labor saving Neo-Seal bonded gasket optimizes flow performance, while reducing installation steps. Complete system includes an adjustable, gasketed faceplate, floor mounted foot supports, rigid support frame assembly, extra heavy-duty 1/2" rear anchor tie down, fixture bolts, trim, and stud protectors. EZCarry® XB system complies with all applicable requirements of ASME A112.6.1M up to a 1000 lb maximum static load.

- 1. Cut 4" adjustable coupling minimum 'P' dimension obtainable = 3".
- 2. Feet bolted to floor using minimum 1/2" diameter anchors.
- 3. Rear anchor assembly required for secure installation.
- 4. Floor anchors must each be able to withstand a pull-out force of 748 lb.
- Pull-out forces are calculated values with standard coupling assembly. No safety factor has been applied. See Form #C38 for more information.

## **Z1201-N-XH** EZCARRY® EXTRA HEAVY-DUTY 750 LB ADJUSTABLE HORIZONTAL SIPHON JET – NO-HUB SERIES

Patented

#### **ENGINEERING SPECIFICATION**

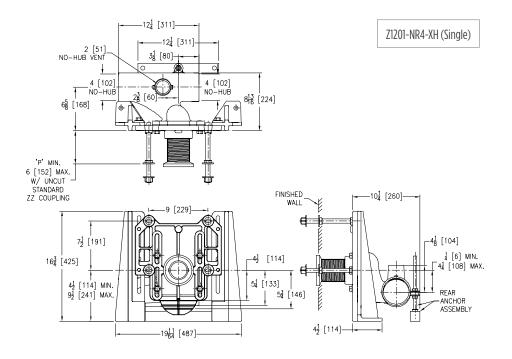

Zurn Z1201-N( )-XH EZCarry® extra heavy-duty horizontal siphon jet water closet carrier system features high performance Dura-Coated cast iron main fitting with hydro-mechanically optimized sweep, 4" no-hub connections, and extended 2" vent. Corrosion resistant adjustable 3" diameter x 6" coupling with integral test cap is designed to increase flow velocity and line carry. Labor saving Neo-Seal bonded gasket optimizes flow performance, while reducing installation steps. Complete system includes an adjustable, gasketed faceplate, floor mounted foot supports, extra heavy-duty 1/2" rear anchor tie down, fixture bolts, trim, and stud protectors. EZCarry® XH system complies with all applicable requirements of ASME A112.6.1M up to a 750 lb maximum static load

#### **NOTES**

- Cut 4" adjustable coupling minimum 'P' dimension obtainable = 2". Cut ZQ coupling minimum 'P' dimension obtainable = 5".
- 2. Feet bolted to floor using mininum 1/2" diameter anchors.
- 3. Rear anchor assembly required for secure installation.
- 4. Floor anchors must each be able to withstand a pull-out force of 820 lb.
- Pull-out forces are calculated values with standard coupling assembly. No safety factor has been applied. See Form #C38 for more information.

#### **ENGINEERING SPECIFICATION**

Zurn ZE1201-H() EZCarry® horizontal siphon jet water closet carrier system, with high performance Dura-Coated cast iron main fitting with hydromechanically optimized sweeps, 4'' Hub & Spigot connections, 38'' barrel for stall to stall direct connection, and extended 2'' vent. Corrosion resistant adjustable 3'' diameter x 6'' coupling with integral test cap, designed to increase flow velocity and line carry, and labor saving Neo-Seal bonded gasket optimize flow performance, while reducing installation steps. Complete system includes an adjustable, gasketed faceplate, floor mounted foot supports with top anchoring pre-fab support base, heavy-duty 1/2'' rear anchor tie down, fixture bolts, trim, and stud protectors. EZCarry® narrow wall system complies with all applicable requirements of ASME A112.6.1M up to a 500 lb. maximum static load.

- 4" adjustable coupling minimum "P" dimension obtainable = 2". EZ-Set™ coupling, minimum 'P' dimension obtainable = 4-1/4" or 2-1/16" for 12" NPT.
- 2. Feet bolted to floor using minimum 1/2" diameter anchors.
- 3. Rear anchor foot required for secure installation.

T, P, BW VALVES

## (9-3/8" DEPTH FRONT TO BACK) STANDARD EZCARRY® ADJUSTABLE HORIZONTAL SIPHON JET – NO-HUB NARROW WALL SYSTEM

Patent Pending

#### **ENGINEERING SPECIFICATION**

Zurn ZN1201-N()4 EZCarry® narrow wall horizontal siphon jet water closet carrier system features high performance Dura-Coated cast iron main fitting with hydro-mechanically optimized sweep, 4" no-hub connections, and extended 2" vent. Corrosion resistant adjustable 3" diameter x 6" coupling with integral test cap is designed to increase flow velocity and line carry. Labor saving Neo-Seal bonded gasket optimize flow performance while reducing installation steps. Complete system includes an adjustable, gasketed faceplate, floor mounted foot supports, fixture bolts, trim, and stud protectors. EZCarry® narrow wall system complies with all applicable requirements of ASME A112.6.1M up to a 500 lb maximum static load.

#### **NOTES**

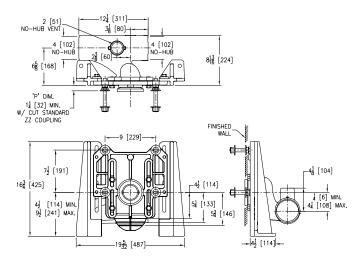

- 1. Cut 4" adjustable coupling minimum 'P' dimension obtainable = 1-1/4".
- 2. Carrier floor anchors must each be able to withstand a pull-out force of 1741 lb.
- 3. Pull-out forces are calculated values with standard coupling assembly. No safety factor has been applied. See Form #C38 for more information.

#### Z12O2-N-XB EZCARRY® BARIATRIC CARRIER – 1000 LB ADJUSTABLE VERTICAL SIPHON JET – NO-HUB SERIES

Patented

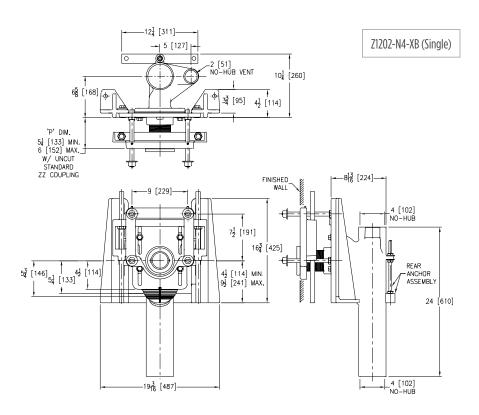

#### **ENGINEERING SPECIFICATION**

Zurn Z1202-N()-XB EZCarry® bariatric vertical siphon jet water closet carrier system features high performance Dura-Coated cast iron main fitting with hydromechanically optimized sweep, 4" no-hub connections, and extended 2" vent. Corrosion resistant adjustable cast iron coupling is designed to increase flow velocity and line carry. Labor saving Neo-Seal bonded gasket optimizes flow performance, while reducing installation steps. Complete system includes an adjustable, gasketed faceplate, floor mounted foot supports, rigid support frame assembly, extra heavy-duty 1/2" rear anchor tie down, fixture bolts, trim, and stud protectors. EZCarry® XB system complies with all applicable requirements of ASME A112.6.1M up to a 1000 lb maximum static load.

- 1. Cut 4" adjustable coupling minimum 'P' dimension obtainable = 3".
- 2. Feet bolted to floor using minimum 1/2" diameter anchors.
- 3. Rear anchor foot required for secure installation.
- 4. Floor anchors must each be able to withstand a pull-out force of 748 lb.
- Pull-out forces are calculated values with standard coupling assembly. No safety factor has been applied. See Form #C38 for more information
- 2" no-hub vent connection regularly furnished on right-hand side. Left hand available when specified (Suffix -VL).
- 7. Auxiliary inlet available right (-JR) or left (-JL) or both sides (-JJ) when specified.

#### **Z1202-N-XH** EZCARRY® EXTRA HEAVY-DUTY 750 LB ADJUSTABLE VERTICAL SIPHON JET – NO-HUB SERIES

Patented

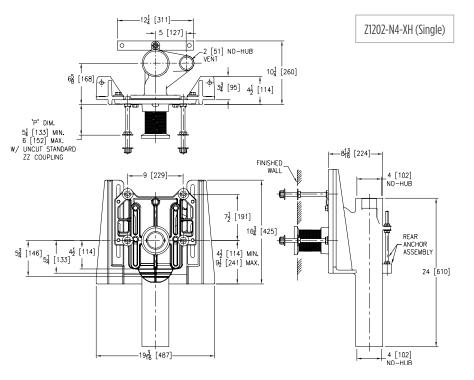

#### **ENGINEERING SPECIFICATION**

Zurn Z1202-N( )-XH EZCarry® extra heavy-duty vertical siphon jet water closet carrier system features high performance Dura-Coated cast iron main fitting with hydro-mechanically optimized sweep, 4" no-hub connections, and extended 2" vent. Corrosion resistant adjustable 3" diameter x 6" coupling with integral test cap is designed to increase flow velocity and line carry. Labor saving Neo-Seal bonded gasket optimizes flow performance, while reducing installation steps. Complete system includes an adjustable, gasketed faceplate, floor mounted foot supports, extra heavy-duty 1/2" rear anchor tie down, fixture bolts, trim, and stud protectors. EZCarry® XH system complies with all applicable requirements of ASME A112.6.1M up to a 750 lb maximum static load.

- Cut 4" adjustable coupling minimum 'P' dimension obtainable = 2". EZ-Set™ coupling, minimum 'P' dimension obtainable = 4-1/4" or 2-1/16" for 12" NPT.
- 2. Feet bolted to floor using minimum 1/2" diameter anchors.
- 3. Rear anchor assembly required for secure installation.
- 4. Floor anchors must each be able to withstand a pull-out force of 820 lb.
- Pull-out forces are calculated values with standard coupling assembly. No safety factor has been applied. See Form #C38 for more information.
- 2" no-hub vent connection regularly furnished on right-hand side. Left hand available when specified (Suffix -VL).
- 7. Auxiliary inlet available right (-JR) or left (-JL) or both sides (-JJ) when specified.

#### © **ZF12O2-N** EZCARRY® VERTICAL SIPHON JET ONE-PIECE CARRIER – NO-HUB SERIES

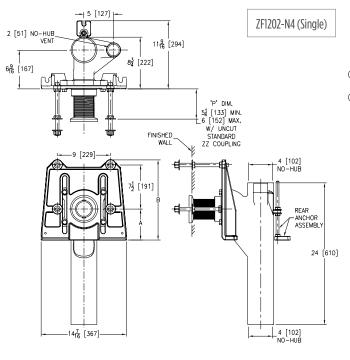

Patent Pending

#### **ENGINEERING SPECIFICATION**

Zurn ZF1202-N() EZCarry® one-piece combination floor mounted foot/faceplate horizontal siphon jet water closet carrier system, supplied for ( ) roughin height, features high performance Dura-Coated cast iron main fitting with hydro-mechanically optimized sweep, 4" no-hub connections, and extended 2" vent. Corrosion resistant adjustable 3" diameter x 6" coupling with integral test cap is designed to increase flow velocity and line carry. Labor saving Neo-Seal bonded gasket optimizes flow performance, while reducing installation steps. Complete system includes one-piece combination foot/faceplate, heavy-duty 1/2" rear anchor tie down, fixture bolts, trim, and stud protectors. EZCarry® one-piece combination floor mounted foot/faceplate system complies with all applicable requirements of ASME A112.6.1M up to a 500 lb maximum static load.

#### **NOTES**

- 1. Cut 4" adjustable coupling minimum 'P' dimension obtainable = 2". EZ-Set™ coupling, minimum 'P' dimension obtainable = 4-1/4" or 2-1/16" for 12" NPT.
- 2. Feet bolted to floor using minimum 1/2" diameter anchors.
- 3. Rear anchor assembly required for secure installation (not on ND4).
- 4. 2" no-hub vent conection regularly furnished on right-hand side. Left-hand available when specified (Suffix -VL).
- 5. Auxiliary inlet available right (-JR) or left (-JL) or both sides (-JJ).

#### **Z1203-N** ADJUSTABLE HORIZONTAL SIPHON JET – NO-HUB SERIES

#### **ENGINEERING SPECIFICATION**

Zurn Z1203-N() adjustable, horizontal siphon jet water closet provides a rigid system with () size no-hub connections. Comes complete with Dura-Coated cast iron right-hand, left-hand, or double main fitting, 2" vent adjustable gasketed faceplate, universal floor mounted foot supports, corrosion resistant adjustable polymer icoupling with integral test cap, fixture bolts, trim, and stud protectors. Includes rear anchor tie down and bonded Neo-Seal gasket.

- 1. Minimum "P" dimension attainable = 2".
- 2. Feet anchored to floor using minimum 1/2" diameter bolts through rear slots on carrier feet.
- 3. Rear anchor foot required for secure installation.
- 4. When used with Z1204 vertical fitting, and the centerline of the fitting to the finished wall exceeds 11-3/4", a 7" or longer, coupling is needed.

#### **Z1203-H** ADJUSTABLE HORIZONTAL SIPHON JET – HUB AND SPIGOT SERIES

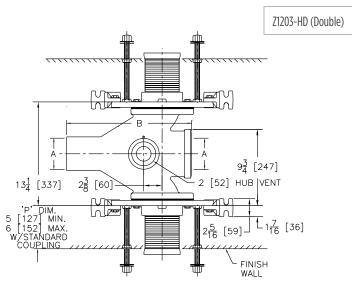

#### **ENGINEERING SPECIFICATION**

Zurn Z1203-H() adjustable, horizontal siphon jet water closet provides a rigid system with () size hub and spigot connections. Comes complete with Dura-Coated cast iron right-hand, left-hand, or double main fitting, 2" vent adjustable gasketed faceplate, universal floor mounted foot supports, corrosion resistant adjustable polymer coupling with integral test cap, fixture bolts, trim, and stud protectors. Includes rear anchor tie down and bonded Neo-Seal gasket.

- 1. Minimum "P" dimension attainable = 2".
- 2. Feet anchored to floor using minimum 1/2" diameter bolts through rear slots on carrier feet.
- 3. Rear anchor foot required for secure installation (not on HD series).

## **Z1207-N** ADJUSTABLE HORIZONTAL HIGH ROUGH-IN SIPHON JET – NO-HUB

#### **ENGINEERING SPECIFICATION**

Zurn Z1207-N() adjustable, horizontal, high rough-in siphon jet water closet provides a rigid system with 4" size no-hub connections. Comes complete with Dura-Coated cast iron right-hand, left-hand, or double main fitting, with 2" vent, adjustable gasketed faceplate, universal floor mounted foot supports, corrosion resistant adjustable ABS coupling with integral test cap, fixture bolts, trim, and stud protectors. Rear anchor tie down and bonded "Neo-Seal" gasket.

#### **NOTES**

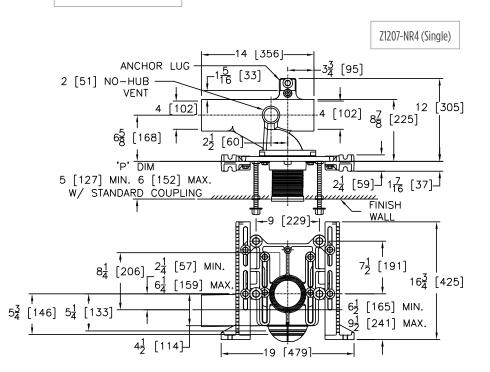

- 13-1/2" minimum space required between front of foot and rear of anchor to install Z1207-N4 Series.
- 2. Minimum "P" dimension obtainable = 2".
- Feet anchored to floor using minimum 1/2" diameter anchors through rear slots on carrier feet
- 4. Rear anchor foot required for secure installation.

#### Z1231-EZR CONCEALED ARM SYSTEM – FOR WALL LAVATORIES WITH ADJUSTABLE UPRIGHTS AND HEADER PLATES

Patented

#### **ENGINEERING SPECIFICATION**

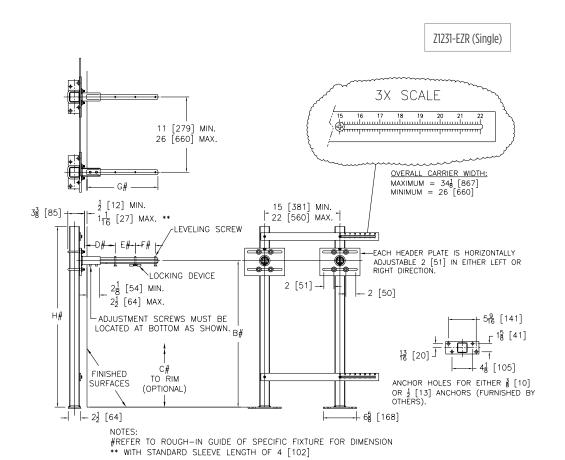

Zurn Z1231-EZR wall lavatory support system comes complete with Dura-Coated carbon structural steel rectangular tubing uprights, conforming to ASTM A500 Grade C, with welded base feet having slotted floor anchor holes. Lower and upper labor-saving plates are marked with an indexed ruler guide for accurate adjustability of upright spacing from 15" to 22". Individual slotted header plates provide 2" of additional horizontal adjustment per plate, allowing for a total horizontal adjustment range of 11" to 26". Includes Dura-Coated steel sleeves and cast iron concealed arms with leveling screws and soft set elastomeric locking devices. Uprights, labor-saver plates, and header plates are factory assembled for easy installation. Carrier system exceeds load and deflection requirements as outlined in ASME Standard A112.6.1M at all adjustment positions of the uprights and header plates.

#### **NOTES**

Two diagonally spaced anchors per foot are required for correct installation.

#### **Z1290** EASTERN STYLE WATER CLOSET

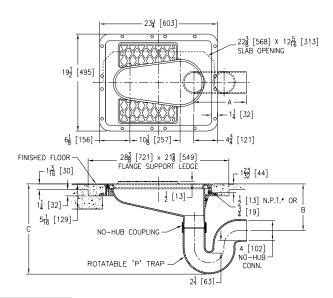

#### **ENGINEERING SPECIFICATION**

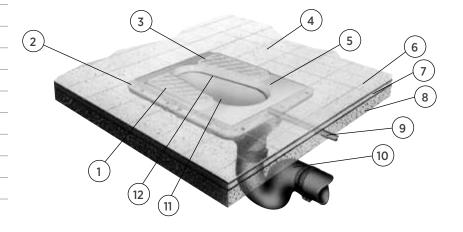

Zurn Z1290 acid resisting, porcelain enameled, cast iron water closet comes complete with rotating 4" no-hub "P" trap and no-hub coupling to meet various piping requirements, including connection to plastic piping systems where required. Water closet is furnished with integral non-skid foot pads and bowl wash down, non-splashing flushing rim. The water closet is completely self-supporting, requiring no external mounting hardware and is flush with finished floor, providing complete floor drainage into bowl and incorporates waterproofing membrane flashing flange for multiple story installations. Flushing connection is available in 1/2" and 3/4" NPT. Recommended to be used with Zurn flush valve models Z6096AV or Z6196AV with either 2.4, 3.5, or 4.5 gallons per flush. Brackish or sea water may also be used for efficient flushing of entire bowl. For storage and handling, installation, care, and cleaning. (See Form #0F53)

#### **Z1360XL** GROUND HYDRANT – ENCASED, FLUSH TYPE, NON-FREEZE

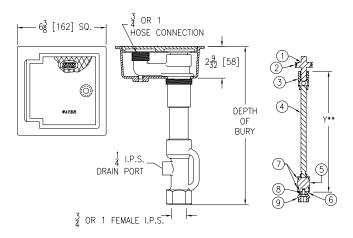

#### **ENGINEERING SPECIFICATION**

Zurn Z1360-XL encased, lead-free<sup>†</sup>, non-freeze ground hydrant is designed for flush with grade or finished (non-traffic) floor installation. Features galvanized steel casing, bronze and stainless steel interior components, bronze seat and replaceable seat washer, non-turning operating rod, and free-floating compression closure valve with 3/4" or 1" inlet connection with 1/4" tapped drainage port on housing, and 3/4" or 1" male hose connection. Includes plain bronze box and locking, hinged, scoriated cover stamped "WATER" and operating key.

#### **NOTES**

‡Non-Freeze feature will not automatically function when (-VB suffix) vacuum breaker is specified. The vacuum breaker must be manually tripped to facilitate drainage of hydrant.

#### **Z1365** GROUND HYDRANT – ENCASED, FLUSH TYPE, NON-FREEZE

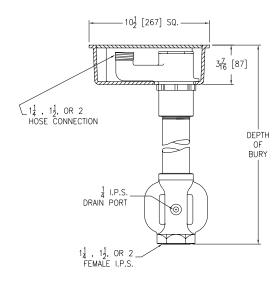

#### **ENGINEERING SPECIFICATION**

Zurn Z1365 encased, non-freeze ground hydrant is designed for flush with grade or finished floor installation. Features galvanized steel casing, all bronze interior parts, bronze seat and replaceable seat washer, and non-turning operating rod with free-floating compression closure valve with 1-1/4", 1-1/2", or 2" connection. Includes Dura-Coated cast iron box and hinged scoriated cover with operating "T" handle key lock and "WATER" cast on cover. Hydrant is equipped with a tapped 1/4" NPT drain port in valve housing.

#### **NOTES**

Important: Hydrant must be opened one turn minimum to seal drain port during use.

## 

PATENT PENDING

## **ENGINEERING SPECIFICATION**

Zurn Z1400-BZ1 cleanout features Dura-Coated cast iron body with bottom outlet, gas and water tight threaded ABS tapered plug, and top assembly. EZ1 drainage series is engineered to simplify product installation. Rough-in adapter provides up to 1-1/4" [32] of vertical post pour adjustment, pre-packaged shims for tilt correction, and integrated, self-contained Type B light duty scoriated cover with rough-in cover for protection during concrete pour. Cleanout is designed in accordance with ASME A112.36.2M.

## © **Z1400-SZ1** BODY ASSEMBLY W/ "TYPE S" COVER AND EZ1™ TECHNOLOGY

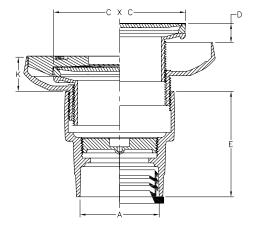

## PATENT PENDING

## **ENGINEERING SPECIFICATION**

Zurn Z1400-SZ1 cleanout features Dura-Coated cast iron body, bottom outlet, gas and water tight threaded ABS tapered plug, and top assembly. EZ1 drainage series is engineered to simplify product installation. Concrete shield provides up to 1-1/4" [32] of vertical post pour adjustment, pre-packaged shims for tilt correction, and integrated, self-contained Type S light duty scoriated cover with rough-in cover for protection during concrete pour. Cleanout is designed in accordance with ASME A112.36.2M.

## **Z1712** ACCUMUTROL

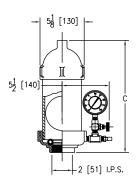

## **ENGINEERING SPECIFICATION**

Shock associated with solenoid or other quickclosing valves serving heavy equipment, such as laundry machines, dishwashers, etc., shall be controlled by installation of Zurn Z1712 Accumutrol. Comes complete with floating stainless steel spherical piston, surge chamber, valve and gauge assembly. Specify size and location.

## NOTE:

Maximum temperature 500°F. Maximum pressure 200 PSI residual.

## STAINLESS STEEL DRAINS - APPLICATION INDEX

Product selection should be made with a specific application and the type of construction in mind. The varied types and sizes of Zurn drainage products, together with their options, offer a drain selection for all applications.

APPLICATION	RECOMMENDED DRAINAGE PRODUCT
Main Roof Drain	Z1715
Wall or Scupper Drain	Z1717
Food Service Floor Drain	Z1749, Z1750, Z1751, Z1752, Z1761, Z1762, Z1763
Indirect Waste Floor Receptor	Z1720, Z1721, Z1750-1, Z1751-1, Z1752-1
Heavy-Duty Floor Drain	Z1730, Z1731, Z1732, Z1735, Z1737
Adjustable Floor Drain	Z1726, Z1727, Z1732
Extra-Heavy-Duty Floor Drain	Z1736, Z1737
Wall of Pitt Drain	Z1739
Backwater Valve	Z1740
Sanitary Floor Cleanout	Z1745
Pool Deck Drain	Z1723

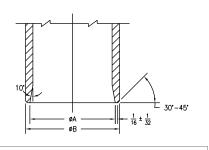

## STAINLESS STEEL DRAINS - BUTT-WELD ENGINEERING DATA

## **Butt-Welding Casting Outlets**

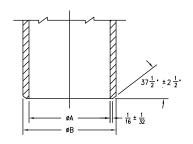

The outlet sections of all cast carbon steel or cast stainless steel products as specified from this brochure shall conform to ANSI-B36.10M-85 and ANSI-B36.19M-85 standards for pipe wall thicknesses for Schedule 10, Schedule 40, or Schedule 80 as specified.

Butt-welding ends of the above mentioned sections shall conform to ANSI B16.25-86 standard for plain welding bevel of  $37-1/2^{\circ} + 2-1/2^{\circ}$  and root face (land) of 1/16'' + 1/32''.

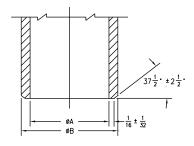

All outlet requirements must be specified and made known to the manufacturer prior to quotation of prices of products applicable to the project.

SANI-FLOR

# **SANI-FLOR RECEPTORS - MATERIAL SELECTION**

- A.R.C. Acid Resisting Epoxy Coating is a baked-on powder coating which produces a smooth, hard, high gloss finish. This epoxy based coating offers high impact resistance and excellent life expectancy in all drainage applications.
- A.R.E. Acid Resisting Porcelain Enamel is a substantially vitreous inorganic coating bonded to metal by fusion at a high temperature above 800°F. This coating offers excellent acid, abrasion, and wear resistance. The coating is extremely hard and is the ultimate for sanitation in drainage application.

# SANI-FLOR RECEPTORS - OPTIONS AND VARIATIONS

Zurn Sani-Flor Receptor options are specified as a PREFIX and/or SUFFIX letter or number added to the series designation. Each floor sink in the catalog is listed with its individual Prefix/Suffix variation.

Ρ			

- Z Cast iron body with white acid resisting porcelain enamel (A.R.E.) interior
- Cast iron body with white acid resisting porcelain enamel (A.R.E.) interior ΖN and nickel bronze top.

c	П	Е	В	IV	ES

- Clamp Collar -C
- Dex-O-Tex Flange -DX
- Stainless Steel Frame with Extra-Heavy-Duty Stainless Steel Grate Specify in -HD areas where working load exceeds 2000 pounds or where extreme chemical resistance properties are required.
- -HP Heel-Proof Grate
- Anchor Flange -K
- Anchor Flange with Seepage Holes and Clamp Collar -KC
- Less Internal Bottom Dome Strainer -LD
- -LS Less Secondary Strainer
- -P 1/2" Threaded Trap Primer Connection (See Z1023)
- Secondary Strainer -S
- Square Nickel Bronze Top -T
- Neo-Loc Test Cap Gasket 2"-4" NL Bottom Outlet Only -TC
- Vandal-Proof Strainer -VPS
- Water Supply Control Box -WB
- -1 Less Grate - Receives multiple indirect wastes from either condensate lines, air conditioners or other indirect drainage equipment specifically located in
- Half Grate Receives indirect waste as with Suffix -1, but with 1/2 grate -2 opening to easily accept waste from a single direction while providing a finished floor drain top on the opposite side.
- Three-Quarter Grate Receives indirect waste as with Suffix -1, but with -3 3/4 grate and 1/4 opening to easily accept waste from a single source.
- -4 Full Grate with Center Opening - Receives indirect waste as with Suffix -1, but with square center opening to accept waste from multiple directions.
- Grate with 4" Diameter x 3-3/4" High Funnel -5
- Grate with 6" Diameter x 6" High Funnel Receives indirect waste from -6 single pipe using round funnel which is centrally located on grate. Prevents splashing of waste around entire receptor. Can be relocated at job site to meet project requirements.
- Grate with 6-3/4" x 3" x 1" High Oval Funnel -7
- Grate with 8-7/8" x 3-5/8" x 3-3/4" High Oval Funnel Receives indirect -8 waste from a series of pipe discharges using oval funnel which is centrally located on grate. Can be relocated at job site to meet project requirements.
- -9 Angle Frame and Grate - Used in food handling facilities incorporating a two-fold purpose. An angle drain provides a sanitary floor drain in an open service area where open half of grate is hidden inside cabinetry to receive an indirect waste discharge. Two-piece construction further enhances the ultimate in sanitation standards.
- -11 Vandal-Proof Secured Grate - Prevents removal of grate by unauthorized individuals.
- Depressed Aluminum Grate Specified for areas in restaurants, food -12 markets, taverns, and many non-traffic areas. Grate recess accumulates food particles rather than let them fall into receptor.
- Solid Loose Set Cover Specified when receptor is to be inactive a majority -15 of the time.
- -16 Half Solid Loose Set Cover - Same as Suffix -15, but with 1/2 cover open to accept indirect waste

# SUFFIXES

- -17 Three-Quarter Solid Loose Set Cover - Same as Suffix -16, but with 3/4
- Solid Loose Set Cover with Square Center Opening Same as Suffix -16, but -18 with center opening and balance of cover inactive.
- Full Hinged Grate Specified in light traffic areas where grate removal is -19 prohibited for any length of time.
- Aluminum Sediment Bucket Specified when interception and retention of -23 solids is necessary. Used in food preparation areas.
- White Acid Resisting Sediment Bucket Same as Suffix -23, but with acid -25 resisting finish.
- -31 Stainless Mesh Liner for Sediment Bucket - Specified when retention of fine particles is required. Provided with screen having 331 holes per square inch.
- Aluminum Dome Strainer -32
- White Acid Resisting Anti-Splash Dome Strainer Use in areas where harsh -33chemicals or substances enter receptor.
- -34 Nickel Bronze Anti-Splash Dome Strainer

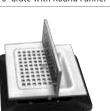

-1 Less Grate

-3 Three-Quarter Grate

-5, -6 Grate with Round Funnel

-9 Angle Frame and Grate

-2 Half Grate

-4 Full Grate with Center Opening

-7, -8 Grate with Oval Funnel

-12 Depressed Aluminum Grate

# © **Z1903** SANI-FLOR RECEPTOR INSTALLATION STABILIZER

Patented

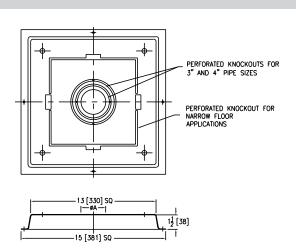

# **ENGINEERING SPECIFICATION**

Zurn Z1903 Sani-Flor receptor installation stabilizer features a 16-gage, galvanized steel plate with variable pipe opening, four support stud holes, and four nail holes. Comes complete with hardware bag containing four 3/8"-16 x 12" long studs, eight 3/8"-16 flange locknuts and coverplate with hole for standard 2" pipe size and perforated knockouts for 3" and 4" pipe connections. (For use with Z1900, Z1901, and Z1902 Sani-Flor receptors.)

### NOTE

Stabilizer plate may be used without coverplate for narrow floor applications where the drain body will be recessed into stabilizer plate.

TECHNICAL INFO - ZURN MATERIALS AND FINISHES	368
GENERAL TERMS AND CONDITIONS	376

CLEANOUTS

#### **TECHNICAL INFO - ZURN OUTLET PIPE CONNECTIONS**

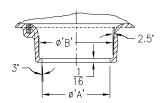

#### **INSIDE CAULK (IC)**

Often specified where drain body is positioned on pipe, bottom of outlet is sealed with oakum and connection is then completed according to local plumbing codes.

#### **INSIDE GASKET (IG)**

The IG connections utilize an inside caulk drain body and a Zurn "Sealtrol" gasket. This connection is only recommended for basement or ground floor applications.

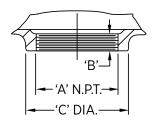

I.C. with Sealtrol Gasket (IG) Inside Caulk (IC)

OUTLETS	'A'	'B'	'C'
2. [51] I.C. Outlet	2-5/8 [67]	3-1/16 [78]	_
3. [76] I.C. Outlet	3-3/4 [95]	4-3/16 [106]	_
4. [102] I.C. Outlet	4-3/4 [121]	5-3/16 [132]	-
5. [127] I.C. Outlet	5-3/4 [146]	6-3/16 [157]	_
6. [152] I.C. Outlet	6-3/4 [172]	7-3/16 [183]	_
8. [203] I.C. Outlet	8-7/8 [226]	9-1/2 [241]	_

#### **IRON PIPE (IP)**

Zurn Iron Pipe Threaded connection is an old industry standard. The female (NPT) threaded outlet is often specified on industrial and institutional applications.

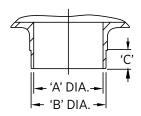

I.P. (Threaded/N.P.T.)

OUTLETS	'A'	′B′	'C'
2. [51] N.P.T. Outlet	2 [51]	9/16 [14]	3-1/4 [83]
3. [76] N.P.T. Outlet	3 [76]	3/4 [19]	4-1/2 [114]
4. [102] N.P.T. Outlet	4 [102]	15/16 [24]	5-5/8 [143]
5. [127] N.P.T. Outlet	5 [127]	15/16 [24]	6-11/16 [170]

8. [203] N.P.T. Outlet	8 [203]	1-1/8 [29]	9-3/8 [238]

#### NO-HUB (NH)

The most widely used connection. A No-Hub connection is achieved by butting No-Hub soil pipe or plastic pipe to the bottom of drain and securing it with a NH joint clamp. (Clamp furnished by others.)

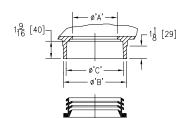

No-Hub (NH)

OUTLETS	'A'	′B′	'C'
2. [51] No-Hub Outlet	2 [51]	2-3/8 [60]	1-9/16 [40]
3. [76] No-Hub Outlet	3 [76]	3-3/8 [86]	1-9/16 [40]
4. [102] No-Hub Outlet	4 [102]	4-3/8 [111]	1-9/16 [40]
5. [127] No-Hub Outlet	4-15/16 [126]	5-5/16 [135]	2-1/16 [52]
6. [152] No-Hub Outlet	5-15/16 [151]	6-5/16 [160]	2-1/16 [52]
8. [203] No-Hub Outlet	8 [203]	8-3/8 [213]	2-1/16 [52]
10. [254] No-Hub Outlet	10 [254]	10-9/16 [268]	2-1/16 [52]
12. [305] No-Hub Outlet	12 [305]	12-9/16 [319]	2-1/16 [52]

#### **NEO-LOC (NL)**

Zurn Neo-Loc is a unique labor-saving compression gasketed connection designed to simply push on the stub end of the pipe. The Neo-Loc drain body and gasket can be utilized with plastic, steel, No-Hub and service weight soil pipe. A unique pipe stop cast in each Zurn Neo-Loc drain body ensures a proper fit.

**Note:** Not recommended for roof drain applications due to the watertight integrity of the Neo-Loc connection to the leader pipe being dependent upon adequate leader pipe support and accurate perpendicularity of leader pipe into Neo-Loc gasket.

"Neo-Loc" (NL)

OUTLETS	'A'	'B'	'C'
2. [51] Neo-Loc Outlet	2 [51]	3-3/8 [86]	3 [76]
3. [76] Neo-Loc Outlet	3 [76]	4-3/8 [111]	4 [102]
4. [102] Neo-Loc Outlet	4 [102]	5-1/2 [140]	5-1/8 [130]
2. [51] NL w/-TC	2 [51]	3-3/8 [86]	3 [76]
3. [76] NL w/-TC	3 [76]	4-3/8 [111]	4 [102]
4. [102] NL w/-TC	4 [102]	5-1/2 [140]	5-1/8 [130]

**Special Note:** Zurn "Neo-Loc" and "Sealtrol" gaskets are designed for use exclusively with Zurn drainage products. They are not sold separately and all warranties either expressed or implied would be forfeited if used in other than a Zurn drainage product.

**FAB SS DRAINS** 

#### **TECHNICAL INFO - TOP LOADING CLASSIFICATION**

Selection of a Zurn Floor Drain should be based on the load factor and the anticipated traffic. Many of Zurn's cast iron grates may be furnished in Duresist iron when increased working load requirements are necessary. Specify Duresist grate (-DG) when required or contact your Zurn representative when special applications are necessary.

Zurn drains are rated as follows: (Reference ASME Standard A112.6.3M)

#### 6.1 - LOADING CLASSIFICATIONS

Grates and top rims shall be designed to meet the following loading classifications.

#### **6.1.1 - LIGHT DUTY**

All grates having safe live load (as calculated in para. 6.2.5) under 2000 lb. [900 kg].

#### 6.1.2 - MEDIUM DUTY

All grates having safe live load (as calculated in para. 6.2.5) between 2000 lb. [900 kg] and 4999 lb. [2250 kg].

#### 6.1.3 - HEAVY DUTY

All grates having safe live load (as calculated in para. 6.2.5) between 5000 lb. [2250 kg] and 7499 lb. [3375 kg].

#### 6.1.4 - EXTRA HEAVY DUTY

All grates having safe live load (as calculated in para. 6.2.5) between 7500 lb. [3375 kg] and 10,000 lb. [4500 kg].

#### 6.1.5 - SPECIAL DUTY

Grates having safe live load (as calculated in para. 6.2.5) over 10,000 lb. [4500 kg] shall be considered special and treated accordingly.

#### 6.2 - TEST PROCEDURE FOR GRATE LOADING

Live Load – Requirements listed in 6.1 through 6.1.5 shall be determined as follows:

<sup>†</sup>Safe live load rating of grates is for general classification purposes only. For the actual safe live load of any given grate, contact your Zurn representative.

Note: ZB and ZN 400 Series drain head assemblies are rated for light-duty applications only.

#### 6.2.1 - LOAD CLASSIFICATIONS

Load classifications as stated in 6.1 shall be determined by laboratory tests.

#### 6.2.2 - PLATEN SIZE

A 3.5 in. [89 mm] diameter platen shall be applied to the center of the grate specimen.

#### **6.2.3 - LOADING**

Loading shall be applied slowly so that point of failure can be observed.

#### 6.2.4 - POINT OF FAILURE

(a) Brittle Materials (Cast Iron). The load (in pounds or kilograms) at which the first fracture on any part of the specimen appears.

(b) Ductile Material. The load which the permanent set (at the point of loading) is greater than 2% of the longest transverse dimension of the specimen.

#### 6.2.5 - GRATE CLASSIFICATION

The maximum safe live load is computed by dividing the load at failure by two.

#### **TECHNICAL INFO - ZURN MATERIALS AND FINISHES**

#### **ZURN CAST IRON**

Conforms to ASTM Specification for Gray Iron Castings A48, Class 25. It is produced utilizing the latest equipment and newest developed foundry techniques. Zurn cast iron castings are characterized by a high degree of strength, corrosion-resistance, workmanship, and finish.

#### **ZURN DURESIST**

A ductile iron complying with ASTM Specification A536, Grade 60-45-10. Its physical properties make it ideal for grates and drain components that are subjected to severe and heavy duty service. Its chemical characteristics make possible a degree of corrosion-resistance far superior to that of cast iron. Zurn Duresist exhibits remarkable stress qualities, possessing a yield strength in the same range as that of cast carbon steel, while its ability to absorb the shock loading of traffic areas is unequalled, making its use ideal for all areas where extra heavy duty service is a requirement – whether indoors or outdoors – in chemical and metal processing plants or other industrial applications.

#### **ZURN DURA-COAT**

A specially formulated paint designed to resist cracking and chipping. Dura-Coat is a latex-based coating developed to be used with cast iron substrate. Dura-Coat is designed, per ASME standards, to protect the product "during normal handling and warehousing prior to installation".

#### **ZURN GALVANIZED CAST IRON**

A process of applying heavy zinc coating to a thoroughly cleaned iron casting. This coating contains 95% zinc. Zurn galvanizing can be supplied on all cast iron parts. It increases longevity and is recommended wherever the discoloration caused by oxidation of cast iron is objectionable. Galvanize should be used in industrial areas where corrosive atmosphere may be encountered.

#### **CADMIUM PLATED CAST IRON**

A process of applying a heavy cadmium coating to a thoroughly cleaned iron casting. This coating contains 95% cadmium in a cold applied process. Cadmium plating can be supplied on all cast iron parts. It increases longevity and is recommended wherever the discoloration caused by oxidation of cast iron is objectionable.

# PROPERTIES OF BASIC DUCTILE VERSUS CAST IRON

METAL	CAST IRON	DUCTILE IRON
Specification	Class 25	60-45-10
Tensile Strength (PSI)	25/30,000	60/80,000
Yield Strength (PSI)	NIL	45/60,000
Elongation	NIL	10% to 25%
Modules of Elasticity	16 x 10	24 x 10

#### **ZURN BRONZE**

A semi-red brass conforming to ASTM Specification for Copper Alloy Sand Casting B584, Copper Alloy No. 844. The exposed surface is normally supplied possessing a satin sheen texture which allows it to blend unobtrusively with surrounding finishes. When the application requires, Zurn Bronze can be polished to a high gloss.

#### **ZURN NICKEL BRONZE**

A unique material that is ideally suited to traffic-bearing grates and strainers in finished floor areas. It affords the combined advantage of greater strength, better appearance, and longer service life at the same price as chrome plated brass. Superior ductility and shock resistance are the result of a copper nickel alloy (Copper Alloy 997) having a wearing surface similar in appearance to satin chrome plate; however, because it does not have a plated surface it cannot chip, peel, crack, or wear off. It is highly resistant to corrosion; however, the process of oxidation will naturally occur over time with most metals. Methods have been developed to prevent, preserve, and restore metals affected by oxidation.

#### **CHROME PLATED BRONZE**

Ideal for installation in walls, gutters, and other areas where a bright decorative finish is desired, and is not subject to the abrasive action of foot and other traffic. It is not recommended for installations where the abrasion will eventually wear through and cause peeling. It should always be specified for swimming pool fittings due to its high resistance to the halogens (chlorine, etc.), encountered in swimming pool sanitation.

#### **ALUMINUM**

Casting grade 319. This is an alloy containing both silicon and copper. It is a solid cast metal in a pleasing light gray color. The light weight, coupled with its exceptional strength and corrosion resistance, makes it ideal for drain components such as sediment buckets and strainers. When used with acid-resisting porcelain enamel coated drains, the possibility of chipping is minimized.

#### **ZURN STAINLESS STEEL**

Castings are normally produced in Type CF8 (304) which is an 18-8 Austenitic Stainless possessing excellent corrosion resistant qualities. For some applications where conditions demand, Type CF8M (316) stainless steel can be supplied. Items formed from stainless steel sheet and other stainless steel products are regularly furnished in Type 304 with 316 as an optional material.

#### A.R.C.

Acid Resisting Epoxy Coating is a baked-on powder coating, which produces a smooth, hard, high gloss finish. This epoxy based coating offers high impact resistance and excellent life expectancy in all drainage applications.

#### A.R.E.

Acid Resisting Porcelain Enamel is a substantially vitreous or glassy inorganic coating bonded to metal by fusion at a high temperature above 800°F. This coating offers excellent acid, abrasion, and wear resistance. The coating is extremely hard and is the ultimate for sanitation in drainage applications. Zurn A.R.E. coating conforms to the requirements of F.D.A. (Food and Drug Administration) Regulation 21-CFR5 117.1360.

#### **GENERAL TERMS AND CONDITIONS**

#### PRICE AND TERMS OF PAYMENT

Terms are net, payable 30 days from date of invoice. All pricing in U.S. currency. The Buyer shall pay all sales, consumers, or other applicable taxes. A 1-1/2% monthly (18% annual) service charge will be added to the outstanding balance of all past due invoices.

Minimum invoice \$100.00. Zurn Industries, LLC ("Zurn") reserves the right to apply a minimum order charge in order to meet the \$100.00 minimum invoice requirement. All orders are subject to credit approval by the Zurn Credit Department prior to the acceptance of an order. Orders may be refused, delivery may be withheld, or shipment stopped in transit without any liability on Zurn's part at Zurn's sole discretion based upon Buyer's credit worthiness as determined by Zurn.

#### **FREIGHT**

Zurn is pleased to provide an industry-leading \$3,500 combined freight rate. Please see below for specific policy details.

All sales are F.O.B. seller's location. Zurn will allow full freight allowance when any of the following conditions are met: 1) any combination of Specification Drainage, Commercial Drainage, Finish Plumbing or Zurn Wilkins orders of \$3,500 or more; 2) Linear Drainage and Chemical Drainage, orders of \$5,000 or more; 3) any Combination of Specification Drainage, Commercial Drainage, Finish Plumbing, Zurn Wilkins, Linear Drainage and Chemical Drainage orders of \$5,000 or more; 4) Zurn One Systems orders of \$7,500 or more; 5) fixture only orders totaling \$10,000 or more. This full freight allowance applies when the shipment is within the continental United States and has a single destination of a buyer's standard address or job location. Routing of shipment shall be determined at the sole direction of Zurn. Shipping dates are estimates and time of delivery shall not be of the essence of this sale contract. Under no circumstances will the Seller have any responsibility on account of any delays in manufacture, transportation, or otherwise. Terms of Export Shipment on application.

**NOTE:** Any product dimension larger than 92" or any single item weighing more than 3,500 pounds, shall be defined as an oversized and/ or overweight product and Zurn's standard FFA terms may not apply. Please contact our customer service department for guidance on potential additional shipping charges.

These charges and restrictions apply in addition to Zurn standard terms and conditions for sale unless otherwise agreed upon by the parties.

#### LIMITED WARRANTY

Zurn goods sold hereunder are warranted to be free from defects in material and factory workmanship for the period of time from the date of purchase: AquaVantage® Flush Valves, AquaFlush® Flush Valves, Commercial Fixtures, Faucets, Showers, and Tubular Brass three years; Chemical Drainage, Linear Drainage, Commercial Drainage, Specification Drainage, Zurn Wilkins, and Flush Valve, Faucets, and Tubular Brass decorative finishes one year, PHIX® Cartridge ten years, FOG-ceptor™ thirty years. Where permitted by law,

# THE IMPLIED WARRANTY OF MERCHANTABILITY IS LIMITED TO THE ABOVE IDENTIFIED PERIOD OF TIME AND SHALL BE LIMITED SOLELY TO THE REPLACEMENT OF THE DEFECTIVE GOODS. A

damaged/broken test cock or ball valve is not considered defective. Please contact Zurn Customer Care for assistance.

Zurn will replace goods at no cost that prove defective provided Zurn is notified in writing of such defect and the goods are returned prepaid at the specified Zurn location with evidence that they have been properly maintained and used in accordance with instructions. **ZURN SHALL** 

NOT BE RESPONSIBLE FOR ANY LABOR CHARGES OR ANY LOSS, INJURY, OR DAMAGES WHATSOEVER, INCLUDING, BUT NOT LIMITED TO, INCIDENTAL OR CONSEQUENTIAL DAMAGES. The sole

and exclusive remedy shall be limited to the replacement of the defective goods. Before installation and use, the purchaser shall determine the suitability of the product for his intended use and the purchaser assumes all risk and liability whatever in the connection therewith. All weights stated in Zurn catalogs and lists are approximate and are not guaranteed.

#### **RETURNED GOODS**

Standard cataloged material may be returned only with written permission of Zurn. Returned goods are subject to a 25% restocking charge of total saleable material returned, plus cost of reconditioning, if necessary, to make material sellable. Transportation charges are the responsibility of the Buyer. Credit allowance will be in the form of merchandise credit only - not cash credit. The value of the return must total at least \$100.00 to qualify for credit allowance. No credit will be allowed for parts unless originally ordered and invoiced as parts. No credit will be allowed for discontinued or made-toorder items. Items that have been specially made are not subject to return or cancellation except by special negotiation. Material must be returned within one year of invoice date for credit to be issued for Chemical Drainage, Linear Drainage, and Commercial Drainage. Material must be returned within two years of invoice date for credit to be issued for Commercial Fixtures, Flush Valve Products, Specification Drainage, Tubular Brass, and Zurn Wilkins. No credit is allowed for Linear Drainage products that have been cut and Specification Drainage product with auxiliary tappings. Flush Valve material over two years old will be subject to a 50% handling charge. Flush Valve material over five years old will not be accepted. Commercial Drainage and Specification Drainage galvanized material will be credited at value of Dura-Coated cast iron, and chrome plated at value of bronze. Zurn Wilkins damaged/broken test cocks or ball valves are not considered defective.

#### ILLUSTRATIONS OF TYPICAL INSTALLATIONS

The typical installations for various products found in each product section are intended to illustrate the products and potential options for the use of these products. Under no circumstances are they to be construed as recommended installation procedures. Consult local codes and project specifications for proper installation instructions.

#### SHORTAGE/DAMAGE CLAIMS

Notification of material shortages or incorrect filling of orders must be made to Zurn within 10 days of receipt. No claims over three months old will be honored. Buyer agrees to make all complaints for damage in transit or "short count" directly to the carrier; before the contents are unloaded have the carrier agent's acknowledgment of such damage noted on the bill of lading and to present to the carrier its agent's acknowledgment of such damaged material with formal claim covering said damage.

#### **GENERAL**

Zurn reserves the right to make changes in design or equipment of any item or product without incurring any obligation on previously sold items, and to discontinue items at any time, without notice. Possession of this Catalog or other sales literature is not to be construed as an offer to sell. All orders are subject to acceptance by Zurn. Catalog printed in U.S.A.

Zurn flush valves are designed to comply with Army Corp of Engineers and Naval guide specifications, Military Specification MIL.V.29193 and Federal Specification WWP541.

Zurn flush valves comply with the following standards: ASME A112.18.1/CSA B125.1, A112.19.5, A112.19.2, A112.19.6, ASSE 1037 and 101 are listed by the following agencies: Canadian Standards, IAPMO/UPC/CUPC, and CSA 125.3. Zurn flush valves are manufactured from dezincification resistant alloys. For additional compliances, contact Zurn Industries, LLC, Finish Plumbing Operation, or 1-800-997-3876.

Zurn is not responsible for typographical errors. The contents of this guide are subject to revision without notice.
