

# AquaSense® Series Smart Sensor Faucets

Touch-Free Detection. Real-Time Decisions.

Today, no space generates more attention than the restroom. Be confident in the guest experience and behind the scenes with touchless, smart solutions.

Zurn Smart Sensor Faucets combine precisely positioned sensors with IoT-enabled smart technology. That way, guests can go through the motions touch-free, while your staff has all the information they need in the palm of their hands.

Choose between hardwire for high-traffic environments or battery for a faster install.

## How It Works

Using sensors, Zurn Smart Sensor Faucets monitor performance and offer insights by gathering data, such as activations and water usage. The data collected gets communicated from the sensor to the Zurn Gateway. From there, the LAN or LTE\*\* connection transports the product data to a secure Zurn Cloud. The secure Zurn Cloud analyzes your data to deliver real-time insights to plumbSMART\*\*\*.

Facilities managers and maintenance personnel can receive alerts via email, text and/or push notifications based on their customizable parameters and permissions. The portal also reveals patterns and trends to allow for a deeper dive.

Install the Zurn Gateway within 1,000 feet from the smart product. Register the smart product in plumbSMART. The Zurn Gateway and plumbSMART can support your entire Zurn Touchless, Smart Solutions portfolio.

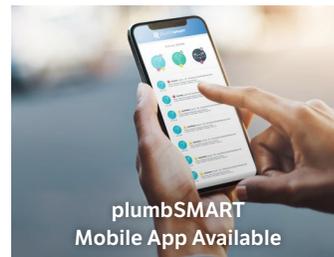

*\*This device is WaterSense® labeled when used with the appropriate flow rate and certified for residential and private restrooms*

*\*\*LTE charges will apply to basic plans*

*\*\*\*plumbSMART is free-to-connect to a basic plan with an option to upgrade to a premium plan*
