

ZW4000 Series Fire Valve

Part Number Assistant

Check off the boxes that match the choices you want. If the choice is blank, this is standard and you add nothing to the part number. If there are letters after the check box, then you add those letters to the part number in that order from left to right.

A bonnet setting has to be part of the part number since the ZW4000 series valves are factory set and not field adjustable. The flow curves **Must** be used by the system designer to select the correct bonnet setting.

Example

2-1/2" ZW4004 Sprinkler Floor Control Valve (Factory Set)
