

Healthcare Building Solutions

New Construction and Retrofit

E M E R G

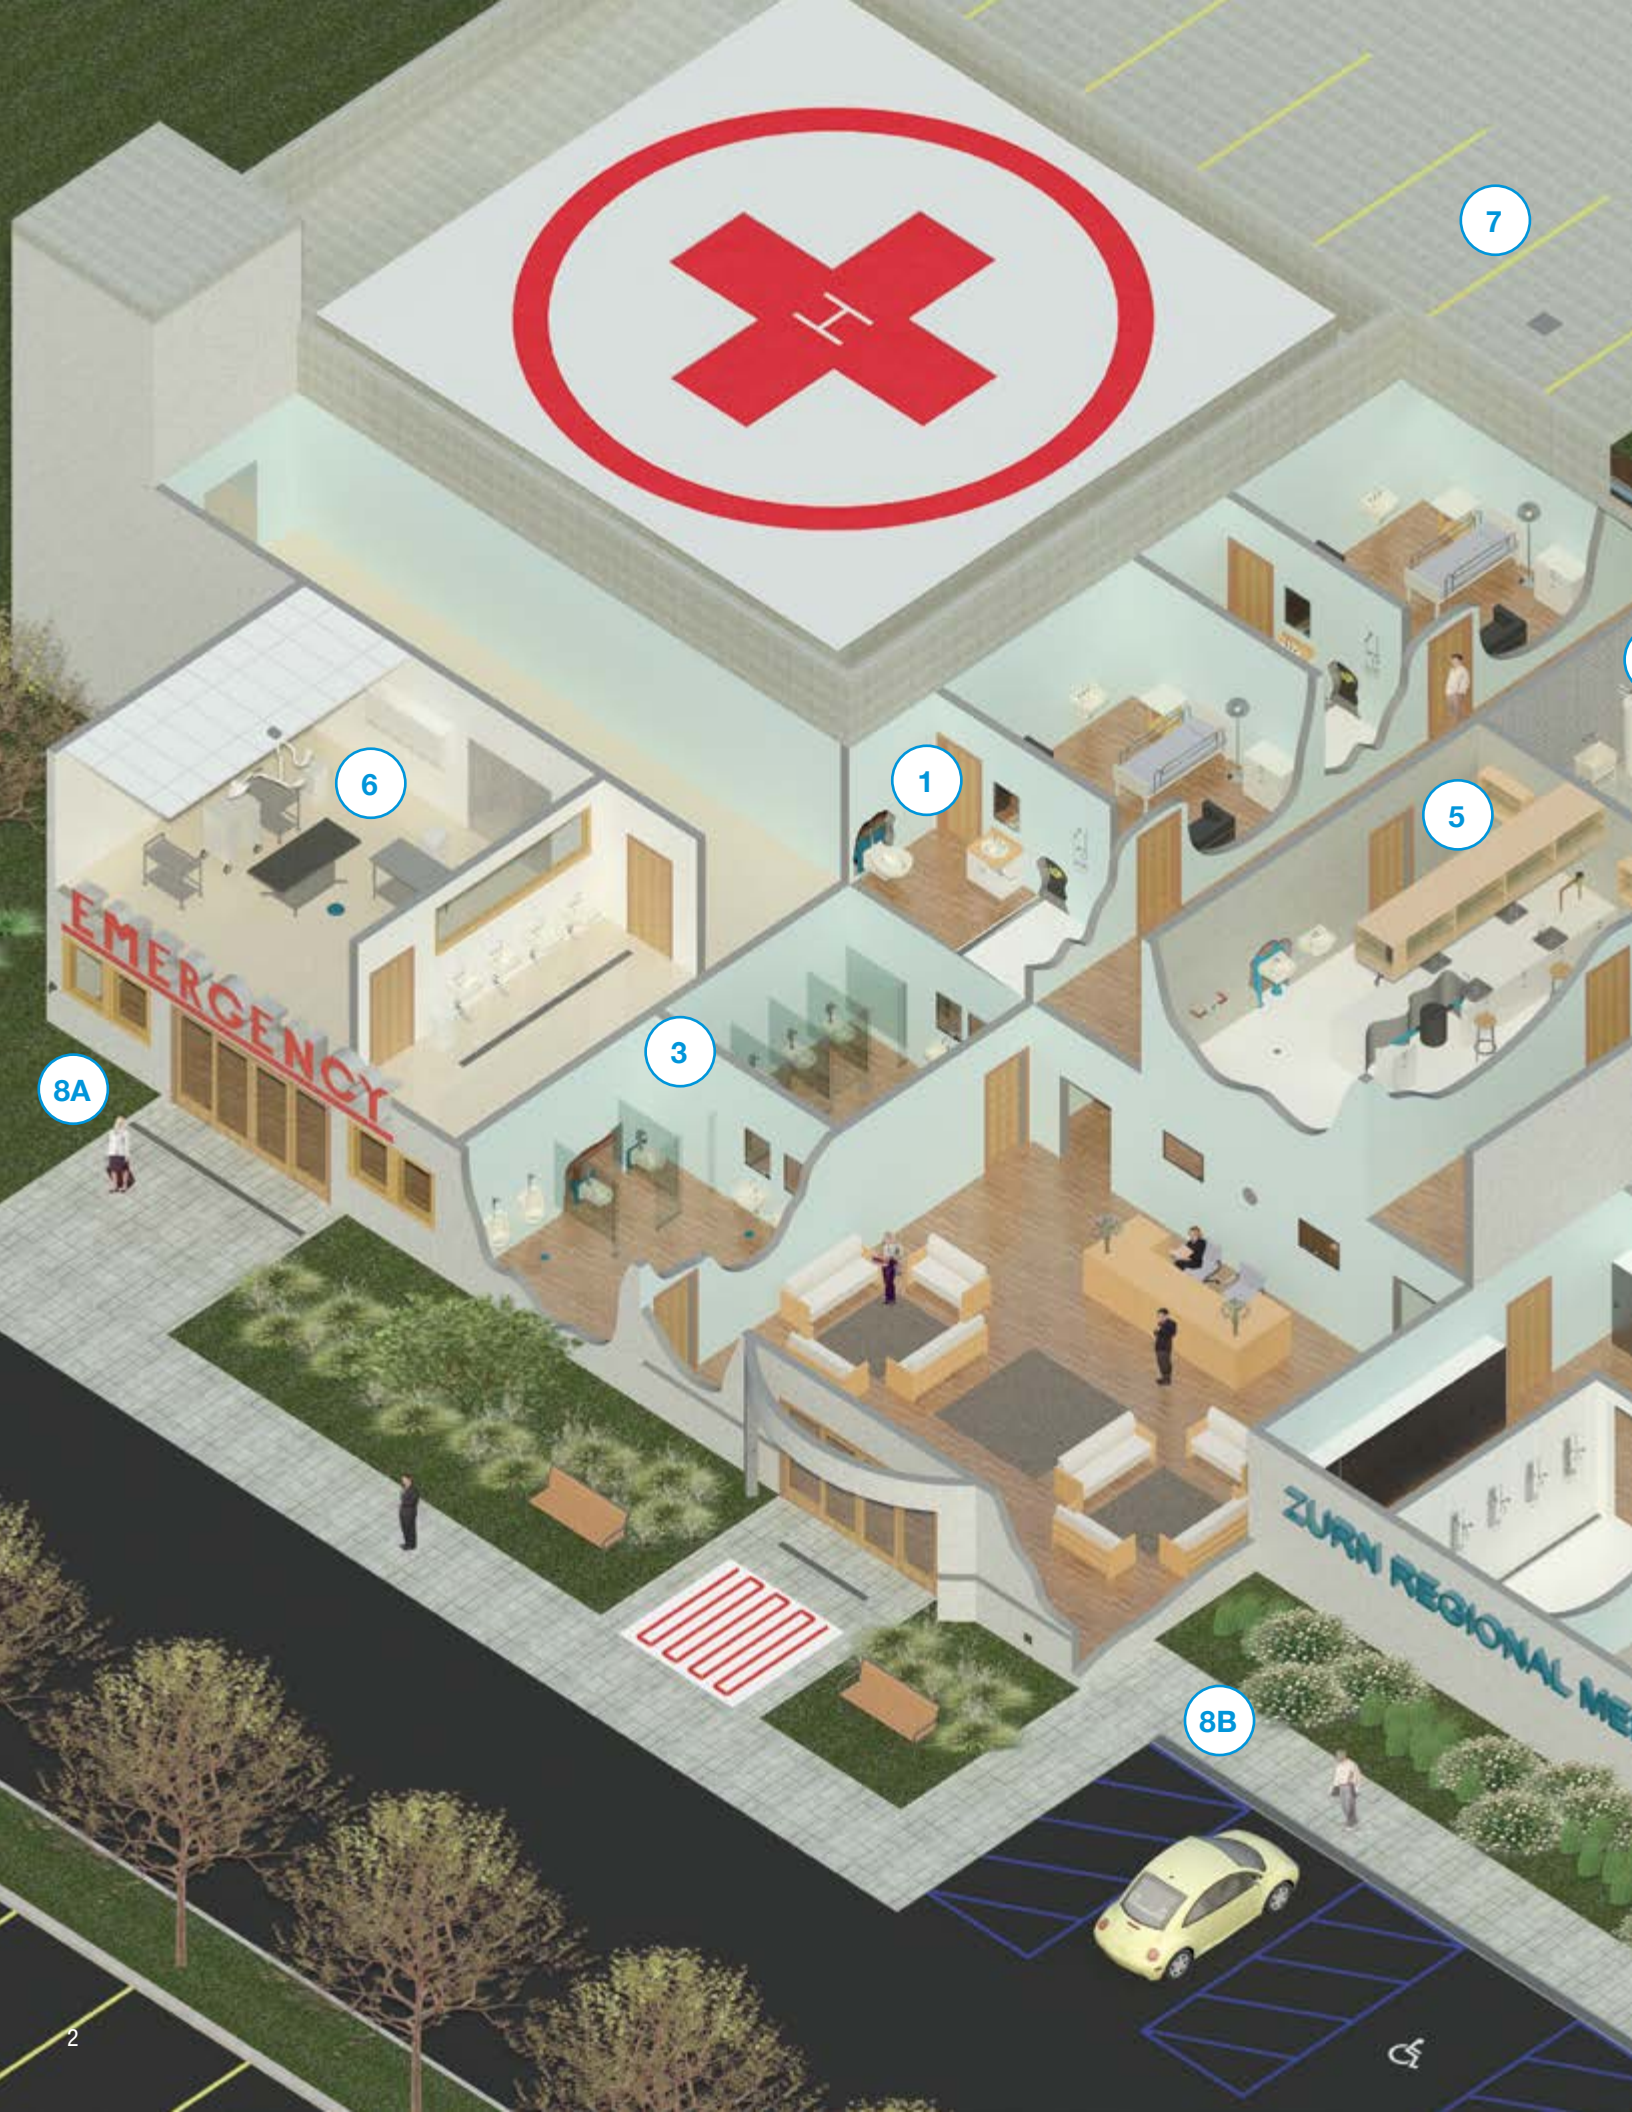

Zurn is redefining how healthcare facilities control the use of water and energy. Our innovative products are designed to deliver patient and staff comfort while increasing hygiene and reducing bacteria transfer.

At Zurn, we develop innovative and performance-driven products focused on water conservation, water control, water safety and hygiene, and water comfort. Our diverse portfolio of long lasting, trouble-free installations focuses on performance and reliability from the source of fresh water through the end stages of wastewater treatment.

Linear Trench Drainage, Backflow Preventer, Shower Fixture, Wall Hydrant, Water Cooler Carrier, Lavatory Carrier, Zurn PEX Plumbing System
- 10. Green Roof**
Roof Hydrant, Backflow Preventer, Fire Hose Valve, Siphonic Roof Drain, Green Roof Drain
- *A. Fire Protection Riser**
Building Riser Fitting, Pressure Reducing Fire Sprinkler Control Valve
- *B. Domestic Water Point of Connection**
Backflow Preventer, Pressure Regulator, Automatic Control Valve

This isometric building model was designed by a Zurn Engineer using BIM and 3D modeling.

BIM and 3D models are available online at www.zurn.com.

Patient Room and Standard Bariatric

Innovation.

The healthcare industry requires innovative and performance-driven products to support exceptional patient care. Zurn is committed to providing unique solutions that deliver superior water efficiency and safety. With over 100 patented designs, Zurn has a tradition of developing innovative solutions ideal for healthcare.

Zurn is the only manufacturer to offer a 1.1 gpf wall bowl system and a high efficiency carrier, providing a complete labor savings solution and added performance from rough-in through finish trim. This high efficiency restroom solution achieves industry leading line carry with the EZCarry® Carrier that no other manufacturer can provide.

Kitchen Food Preparation Area

Where food is prepared, proper grease capture and disposal, as well as clear and operational drains are of the utmost importance for the environment, the community and especially healthcare facilities.

The Zurn Green Turtle Proceptor® is designed to contain grease, oil and solids while preventing clogs and kitchen downtime. The Proceptor can be installed, cleaned and serviced outside the kitchen area; maintaining a sanitary environment.

Low Flow Consumption Urinal System

Public Restrooms

Retrofit and Replacement.

Zurn retrofit and replacement options enable you to meet your project needs - from code requirement updates - to aesthetic changes or reducing water and energy usage. Achieve an award-winning total restroom package with a wide selection of Zurn products featuring not only water efficiency, but also hands-free operation for increased hygiene and decreased bacteria transfer.

The Zurn Omni-Flo™ urinal and ZTR6203-ULF-LL 0.125 gpf sensor flush valve, delivers reduced splash-back and long life batteries allowing for a retrofit or replacement to flow rates of 1.0 gpf down to 0.125 gpf.

Wall Hung Lavatory with Aqua-FIT®
Battery-Powered Sensor Faucet

Boiler Room and Custodial Areas

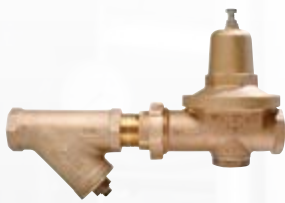

Building Life-Cycle.

Protecting a healthcare facility's water supply is critical to patient and staff safety, the facility's structure, as well as the environment. Proper backflow and pressure reducing equipment is necessary where potential hazards exist from chemicals and descaling agents, as well as water pressures from hot water systems.

The Zurn Wilkins ZW209 Automatic Control Valve reduces high water pressure to a constant set pressure, protecting downstream equipment throughout the facility. The ZW209 provides the lowest cost of ownership and includes everything needed for start up, troubleshooting, and maintenance as a standard, which shortens labor times and simplifies maintenance and repair.

ZW209

PHIX®
Acid Neutralization Cartridge

Laboratory and Research Areas

One Choice. One Zurn.

Research, testing, and development within a healthcare facility requires the latest technologies in place to process and safely discharge chemical waste water. From large capacity chemical drainage systems to point of use under-sink acid neutralization cartridges, Zurn provides a safe, efficient solution.

The Zurn PHIX acid neutralization cartridge is easily installed under a laboratory sink using existing plumbing. Perfect for areas with limited space, the PHIX cartridge neutralizes acid at the source, offering a reliable solution for removing acid waste water.

Safety and Hygiene.

Sanitation and bacteria prevention are critical throughout a healthcare facility. Zurn touch-free, sensor products and sanitized coatings help to maintain a safe, clean environment for patient and staff care.

SilverShield™ Antimicrobial Technology provides a permanent antimicrobial glazed ceramic surface that inhibits the growth of stain and odor causing bacteria, mold, and mildew.

Parking Decks, Garages, Driveways, and Helipads

Custom Engineered Solutions.

Transportation infrastructure within a healthcare facility may be exposed to weather extremes and potential chemical hazards. Drainage solutions are essential in removing demanding environmental waters combined with motor vehicle sediments. Zurn Engineered Water Solutions® exceed today's drainage requirements to meet the needs of common installations, as well as specialized designs for unique installations.

Zurn provides customizable systems like the Z882 linear trench drainage system which saves up to 75% installation time compared to cast in place systems while providing Class A to F loading capabilities and superior flow rates.

Emergency and Public Entrance Areas

Ease of Installation.

Effective safety measures are needed in emergency and public areas outside the healthcare facility, just as they are implemented inside to keep patients, staff, and visitors safe. Snow melt systems perform crucial safety functions that keep entrance areas, walk ways, and streets clear of potential icy hazards, reducing potential liability for the facility. They are the superior solution to this issue, avoiding the noise, mess, and congestion caused by conventional snow removal methods.

Zurn has the barrier tubing, manifolds, fluid management products, and controls to accommodate a wide variety of snow melt specifications. Zurn provides a full line of tools and accessories to ease and simplify installation. Ensure world-class system design and performance with our complimentary snow melt and radiant system layout and design services.

Wellness Center and Rehab Areas

Sustainability.

Zurn understands that Wellness Centers and Rehabilitation Areas have special accessibility needs. Zurn offers a wide variety of ADA compliant and barrier free products that not only allow accessibility but also offer high end style.

The ZS880 stainless steel shower drain brings luxury to your restroom space while providing a seamless transition from the drain to the floor allowing barrier free mobility. The Z880 offers five decorative grating options or a tile inlay to customize your space. Discover how easy it is to customize your space with Zurn products.

Green Roof

Conservation and Lower Costs.

Transform your roof to a serene oasis for your patients by installing Zurn's green roof system. Create a roof-top garden, recreational space or terrace while reducing noise, lowering heating and cooling costs and managing storm water. Zurn provides custom engineered solutions for the unique needs of a green roof system.

The Z150-DT 14" square top prom-deck drain has a rotatable frame with a heel proof grate ideal for use with garden paver systems. Create a pedestrian walk way through your roof top garden by using the Z150-DT decorative prom-deck drain and transform your roof to usable green space.
