#### © Z100F FLOFORCE™

## There Is No Equal

Z100F FloForce High Performance Roof Drain was designed to promote flow efficiency. The efficiency of this new drain is realized through a redesigned system, which optimizes the flow, at lower head depths.

To develop FloForce, we stepped back to the very beginning. Our engineers collaborated with industry partners, calculated possible enhancements, prototyped model after model, and tested and validated each iteration in our US-based facility.

The FloForce parabolical design and enhancements are engineered to flow at a lower head depth. The new drain was designed with the engineer, contractor, building owner, and roofer in mind. Beyond quick and effective evacuation, the unique dome and gravel guard limit debris and roof damage.

Reach your roof's flow potential, from install through torrential rainfall.

## Reach Your Roof's Flow Potential

#### Up to Code

With emerging codes, engineers require real data for every roof drain. So, we determined the ideal specs and demonstrated the data for our go-to-market model.

- Over 2 years of prototypes paved the way to our FloForce today.
- Authentic flow data allows engineers to meet IPC code requirements during specification.
- Flow Curves provide the data Engineers need to calculate roof specification.
- Testing process adheres with ASME A112.6.4 testing criteria.

#### Easy Install

We solved for our contractor customers too. The labor-saving design eliminates pains and costs during installation.

- Optimized storm evacuation that may result in fewer systems required on each roof.
- Membrane-cut ridge and site holes ensures proper installation without hindering future performance.
- No sharp corners reduce risk of injury on the job.
- One-person installation saving time and money on the jobsite.

#### **Superior Performance**

A lot happens on a roof that we don't see. Debris, standing water, unpredictable weather—FloForce keeps up by design, so building owners can have peace of mind.

- Parabolic design creates laminar flow and evacuates water off the roof at lower head depths to create safer environment.
- Improved flow performance provides a more efficient system
- Unique dome and gravel guard design increase open area to maximize water drainage while limiting debris.
- Lean body and ladder pattern inhibit obstructions to slow things down.

- Partially recessed installation depth
- Sculpted waterfall shape
- Bosses moved outside of flow path
- Added circular-cut edge
- Teardrop-shaped gravel guard
- Smooth V-notch openings more than tripled the quantity of openings compared to a traditional design

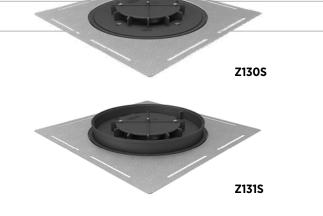

- Staggered horizontal ribs which reduce isolated flow restrictions
- Greater open area per inch of dome height

FloForce sets the new standard in roof drainage. Visit *zurn.com/floforce*, and never drain the same.

#### ③ Z130S AND Z131S SIPHONIC ROOF DRAINS

Custom Engineered To Meet the Needs of Your Building

Let Zurn<sup>®</sup> help you design the ideal siphonic drain system for your facility. Our systems result in more usable building space due to no-slope, horizontal piping that takes up less space running below the roof as compared to a gravity roof drain system. And our siphonic drains also utilize smaller pipe diameters which translates to lower building costs.

#### **Reduced Building Cost**

System uses smaller pipe diameters between 3"-6" versus traditional-sized pipes of 8"-12" used in other designs.

#### Less Maintenance

Higher flow velocities make the system self-cleaning so there's no need for additional cleanouts.

#### Quiet Operation

Near silent operation when siphonic roof drain is under full bore flow condition.

#### Flexible Installation

System design allows for flexible vertical stack placement based on individual architectural needs.

#### **Quicker Installation**

Integrated deck plate cuts roof drain installation time in half, compared to traditional installation methods.

#### Earn LEED Credits

Unique design can help earn credits for materials, innovation, sustainable sites, water efficiency, regional priority and atmosphere.

#### Contact your Zurn Elkay Sales Representative today to learn more.

© EZ1<sup>™</sup> TECHNOLOGY

#### A SPEEDY SETUP

Sold complete and ready to install, EZ1 is an intuitive product that saves contractors time and money.

#### LONG-TERM DURABILITY

Whether cast iron or plastic, EZ1 is crafted to stand up against wear and tear over the product's lifecycle.

#### DESIGNED TO RUN LIKE CLOCKWORK

EZ1's integrated engineering, which includes an easy postpour adjustment and tilt accessory package, delivers high-level functionality and requires minimal skill to install or maintain.

## Introducing the EZ1<sup>™</sup>, It's About Time

Contractors have waited long enough for a floor drain that's easy to install and built for the long haul. Zurn's EZ1—available in cast iron and plastic—comes out of the box as a complete system, allows for post-pour adjustment with an integrated strainer, provides job-site flexibility and maintains ongoing reliability. Don't hesitate. Make the EZ choice. *Learn more at zurn.com/ez1*

## Leave Your Carrier Code Book Behind

Whether you're a prefab contractor or the project engineer, our EZ Lavatory Carrier easily adapts to any application on the jobsite.

The carrier features universal arms, an independent horizontal and vertical bracket system, and only two anchors per upright foot. You'll save steps without sacrificing strength behind the wall or compliance down the line.

#### **Meet All Project Requirements**

No more paging through codes for compatibility or upfront staging. The carrier's universal arms allow contractors to adjust height in the field and assemble with virtually any sink application.

#### Set Up Horizontally or Vertically

This is the only carrier on the market with an independent bracket system you can position horizontally or vertically. The intuitive, flexible connection system works with the site's configuration—not the other way around.

#### Save Steps with Less Foot Anchors

Cut your install time and costs in half. Instead of four foot anchors, this carrier secures in place with two. The anchors support up to 250 lbs, while limiting floor penetrations and eliminating the need for relegging.

Take the labor out of your next lavatory installation. Specify your next project at inspec.zurn.com.

#### © ZURN TOP-SET® DECK PLATE

The -DP Option Is Top of Class, With a Proven Feature Set That Will Save Time and Money

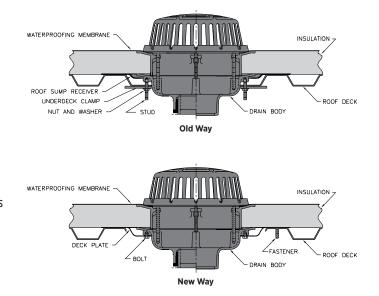

#### Labor Saving

- -DP option features ease of installation for quick job completion
- Entire roof drain assembly installed from topside of roof requiring only pipe connection installation underside roof
- Deck plate replaces the need for separate under deck clamps and roof-sump receivers
- Pipe connection is completed

#### Versatility

- Three size (-DP) for trouble-free fit 8", 12", and 15" diameter drains
- Multiple slot arrangements to accommodate a variety of roof decks
- Constructed of 14-gauge steel with a corrosive-resistant finish

PRODUCT HIGHLIGHT

#### GREEN ROOFING DRAINAGE SOLUTIONS

## It's Easy Being Green

Having proper drainage on a green roof is a critical aspect of the system. If the system is not able to drain properly, it can negatively impact the vegetation due to over-saturation of the soil. As the soil takes on excessive amounts of water, it continues to add weight to the roofing structure. This added load has the potential to compromise the structural integrity of the roof. In order to prevent these situations from occurring, the roof drain must allow adequate flow through the drain at all times.

#### Performance

Stainless steel perforated extension allows for optimal flow into the roof drain while simultaneously keeping debris out.

#### **Ease of Maintenance**

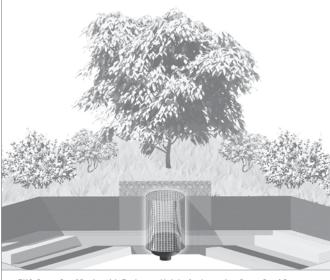

Removable lid allows for easy routine maintenance.

#### Versatility

Customizable enclosures guarantee the roof drain aligns with the green roof surface and offer an aesthetically appealing finish to the roof environment.

#### Flexibility

Simplify the installation process by customizing the order to ship the perforated extension after the drain has been installed

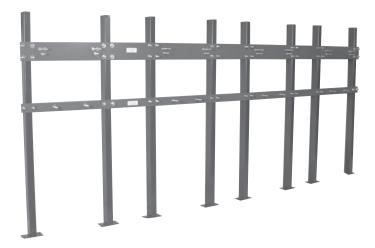

Z110 Green Roof Drain with Enclosure Height for Intensive Green Roof Systems

#### S Z1222-CB CARRIER BANK

## Designed To Speed Up Your Installation

Multiple station plate system provides an extended length plate fabricated with exact center-to-center locations to accommodate a bank of multiple urinals. Custom-length plates are specific to job requirements and are provided with loose uprights and boxed mounting hardware and studs. Ideally suited for prefabricated applications.

The following information is necessary when specifying the carrier bank:

- Fixture manufacturer, model number, and quantity of fixtures
- Center-to-center spacing of urinals
- Handicap fixture quantity and location (if applicable)
- Wall thickness

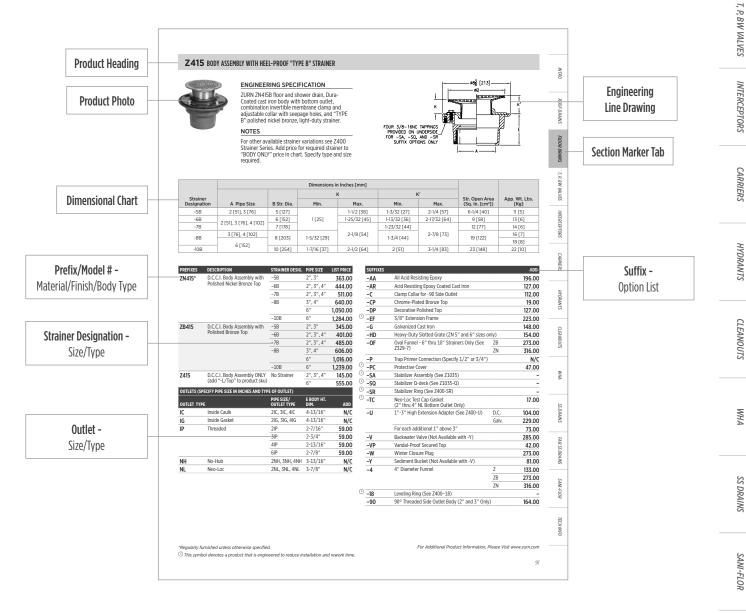

Note: Custom carrier banks are available for all Zurn plate type systems.

#### **CUSTOMER GUIDE INSTRUCTIONS**

Each product section in this catalog is introduced by a cover page showing a representation of products. Additional information varies by product section, but generally consists of the following:

APPLICATION INDEX	General guide to the characteristics of the products and their design.
PRODUCT COMPLIANCE	List of standards and approvals that apply.
PRODUCT DESCRIPTIONS	Each product page contains a product photograph, engineering dimensional drawing, engineering specification, pricing chart, available outlet types and sizes, and the appropriate prefix and suffix options.
TECHNICAL DATA	General overview of product characteristics, assemblies, and installation data.

#### **ROOF DRAIN - PRODUCT COMPLIANCE**

Zurn roof drains are constructed of high quality materials and, in general, are designed to meet the requirements of ASME Standard A112.6.4 (revision and redesignation of ANSI A112.21.2M).

For verification of a selected roof drain, contact your local Zurn Sales Representative.

#### **ROOF DRAIN - GENERAL INFORMATION**

Zurn roof drains are comprised of three basic components: a body (sump), a combination membrane flashing clamp/gravel guard, and a dome strainer. Two of Zurn's roof drains are the Z100-DE and Z100-DR, shown below. These illustrate the basic components and options: the adjustable extension -DE (Deck Extension), -DR (Drain Riser), and Top-Set Roof Deck Plate (-DP).

**Note:** Neo-Loc outlets are not recommended for roof drain applications due to the watertight integrity of the Neo-Loc connection to the leader pipe being dependent upon adequate leader pipe support and accurate perpendicularity of leader pipe into Neo-Loc gasket.

#### **ROOF DRAIN - APPLICATION INDEX**

Roof drain selection should be made with a specific type of roof construction in mind. The many types and sizes of drains offered by Zurn, coupled with a wide array of available options, provide you with a roof drain for all applications.

APPLICATION	RECOMMENDED ROOF DRAIN
Main Roof	Z100F, Z100, Z100-90, Z104, Z105, Z107, Z108
High Capacity	Z101
Water Insulated Main Roof	Z100-AW, Z100-W, Z100-89
Green Roof	Z110, Z110-AI
Medium Area	Z111, Z121, Z121-90, Z122
Inverted Membrane Roof Deck	Z100-85, Z121-85, Z125-85
Overflow	Z108, Z122, Z127, Z163, Z164, Z165
Penthouse and Small Area	Z125, Z125-90, Z127
Promenade and Patio	Z150, Z154, Z158
Parapet Scupper	Z160, Z161, Z187, Z189
Canopy and Terrace	Z180, Z181, Z182, Z185
Expansion Joints	Z190
Downspout Boot	Z191, Z191-RD, Z192
Vent Cap	Z193
Flashing Sleeves and Scupper Sleeves	Z195, Z196, Z197, Z198
Downspout Nozzle	Z199, Z199-DC

FLOFORCE™ High efficient flow performing roof drain that is engineered to evacuate water off of roof structure by incorporating a smooth funnel shaped interior surface, providing a seamless transition to outlet connection and eliminating internal obstructions. Complete with Dura-Coated cast iron body with combination membrane flashing clamp/gravel guard and low silhouette Poly-Dome. Flashing clamp/gravel guard provided to prevent debris from entering the drain while allowing water to immediately pass through at zero head level. Poly-dome designed to maximize effective open area and promote efficient flow. (Refer to www.zurn.com for flow curves)

## **ZF7000** FLOW SENSOR

#### ENGINEERING SPECIFICATION

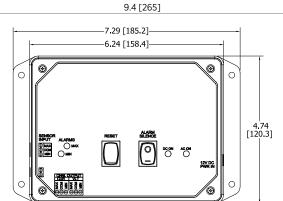

Froet<sup>™</sup> flow sensor. Indication of a primary system blockage or excessive flow through the outlet pipe. Outputs are current or voltage that will provide for connection to building management systems or control valve actuators. Power is supplied to the unit from a 120 volt to 12 volt plug in transformer included with the sensor.

For additional product information, please visit www.zurn.com. Patent zurn.com/patents

## **FLOOR DRAINS - GENERAL INFORMATION**

Zurn floor drains are generally made up of a body, combination frame/clamp collar and top grate. The assemblies shown below illustrate the more common components utilized in floor drains.

Zurn floor drains are available in 2" through 10" outlet sizes (and 12" for specific drains and outlet type) with Inside Caulk, Threaded, No-Hub and Neo-Loc connections.

## FLOOR DRAINS - APPLICATION INDEX

The Zurn floor drains below are recommended for the applications listed. Most Zurn floor drains can be readily adapted for use in finished areas by using bronze or nickel bronze grates and strainers. (Use Prefix "ZB" or "ZN" preceding the product number in place of the usual "Z" Prefix.)

APPLICATION	RECOMMENDED FLOOR DRAIN	
Automobile Parking Area	Z533, Z534, Z535, Z536, Z537, Z541, Z546, Z547, Z662, Z662-HF	CLE
Basement and Subterranean Areas	Z566, Z730	CLEANOUTS
Boiler House and Maintenance Areas	Z541-90, Z546, Z645	UTS
Clinical, Surgical, Detention Areas	Z300, Z310, Z315, Z319, Z461	
Entrances and Concourses	Z664, Z665, Z667	
Finished Area/Gutter	Z460B, Z575	_

CARRIERS

SHIM KIT ..... Shims built into the rough-in cover for tilt adjustment, screws included.

ROUGH-IN COVER Designed to stand up to rigorous jobsites with 3,000 lb load rating.

Keeps grate/cover finish intact until the job is complete.

### COVER OPTIONS ------

BODY OPTIONS -----

IC = Inside Caulk IG = Inside Gasket IP = Threaded

NH = No-Hub NL = Neo-Loc

Available in outlet sizes ranging from 2" through 6"

- BZ1 = Round with Post-Pour Adjustability SZ1- Square with Post-Pour Adjustability **ZN** = Polished Nickel Bronze Top **ZB** = Polished Bronze Top **ZS** = Polished Stainless Steel Top
- **HYDRANTS**

# CLEANOUTS

#### A Whole Family of Product

-BZ1 = Round cast iron floor drain or cleanout -SZ1 = Square cast iron floor drain or cleanout -DP = Stainless steel deck plate for a cast iron floor drain or cleanout

#### Model Number Example

#### [ZN][415]-[3][NH]-[5][S][Z1]-[DP]

**ZN** = Denotes cover material 415 or 1400 = Denotes floor drain or cleanout **3** = Denotes outlet size NH = Denotes outlet type

- 5, 6, or 8 = Denotes cover size **S** = Denotes round or square Z1 = Denotes post-pour adjustability
- **DP** = Denotes deck plate

## \*Comes standard with nickel bronze unless otherwise noted.

APPLICATION	RECOMMENDED DRAINAGE PRODUCT
Deep Seal Trap	Z1000, Z1019, Z1021
Trap Primer	Z1020, Z1021, Z1022
Trap Primer Connection Adapter	Z1023
Fixed Air Gap	Z1024, Z1025
Pipe Thread to Hub Adapter	Z1030
Inside Caulk Reducing Ring	Z1032
Iron Pipe Flush Bushing	Z1033
Eccentric Iron Pipe Threaded Bushing	Z1034
Floor Drain Stabilizer Plate	Z1035, Z1035-Q, Z1036
Pipe Thread to 90° No-Hub Adapter	Z1040
Pipe Thread to 90° No-Hub Elbow Adapter	Z1042
Gate Type Sanitary Sewer Backwater Valve	Z1088
Storm Sewer Backwater Valve	Z1088, Z1090, Z1091, Z1095
Bottom Outlet Floor Drain Backwater Valve	Z1099

# TRAPS, PRIMERS, AND BACKWATER VALVES - OPTIONS AND VARIATIONS

All Zurn backwater valve and trap optional variations are specified as a prefix and/or suffix letter or number added to the series designation. Below are the available options.

PREFIXES	DESCRIPTION	SUFFIXES	DESCRIPTION
Z	Standard Assembly or D.C.C.I. Body	-DU3	3-Outlet Distribution Unit
ZAB	Bronze Body with Polished Bronze Top	-DU4	4-Outlet Distribution Unit
ZABN	Bronze Body with Polished Nickel Bronze Top	-FC	Adjustable Floor Cleanout (See Z1400)
ZARB	All Plain Bronze Body	-FL	Flushing Connection
ΖB	D.C.C.I. Body with Polished Bronze Top	-F6	6" Diameter Funnel
ZN	D.C.C.I. Body with Polished Nickel Bronze Top	-G	Galvanized Cast Iron
	DECODIDION	-LC	Less Cleanout and Plug
UFFIXES	DESCRIPTION	P	Trap Primer Connection (1/2" or 3/4")
-AR	Acid Resisting Epoxy Coated Finish	V	Backwater Valve
-BP	Bronze Threaded Plug Cover		
-BC	Bolted Cover	-WH	Wheel Handle
-BV	Bronze Flapper Valve	-WL	One-Piece Waste Elbow
		-3	3/4" Connection
-C	Clamping Collar	-7	7" Long Adapter
-CP	Chrome-Plated Finish		
-DS	Dome Strainer	-12	12" Extension
-DU	Additional Distribution Units	-24	24" Extension
-DU2	2-Outlet Distribution Unit

# **INTERCEPTORS – GENERAL INFORMATION**

Zurn manufactures three types of interceptors to meet all your plumbing needs: grease interceptors, solids interceptors, and oil interceptors. Zurn interceptors are designed for use in plumbing wastewater systems to prevent harmful or undesirable substances from entering the wastewater control system. Note: Interceptors are not pressurized vessels and should not undergo pressure testing.

To obtain more detailed information on Zurn interceptors, phone 855-ONE-ZURN, or contact your local Zurn sales representative.

# **INTERCEPTORS – APPLICATION INDEX**

Product selection should be made with a specific application and the type of construction in mind. The varied types and sizes of Zurn interceptors, along with their options, offer a selection for all applications.

APPLICATION	RECOMMENDED INTERCEPTOR				
Cooking and Processing Kettles*; Pot, Pan, and Scullery Sinks	Z250H, Z1165, Z1170, Z1170-UN, ZS1170, Z1171, Z1171-TD, Z1172, Z1172-UN, Z1173, Z1173-TD, Z1174				
Soup Kettles*	Z1165, Z1170, Z1170-UN, ZS1170, Z1171, Z1171-TD, Z1173, Z1173-TD, Z1174				
Dishwashing Machines*	Z250H, Z1165, Z1170, Z1170-UN, ZS1170, Z1172, Z1172-UN, Z1173, Z1173-TD, Z1174				
Grease Draw-off Units	Z250H, Z1171-TD, Z1173, Z1173-TD				
Miscellaneous Equipment Holding*, Grease-Laden Water	Z250H, Z1165, Z1170, Z1170-UN, ZS1170, Z1171, Z1171-TD, Z1172, Z1172-UN, Z1173, Z1173- Z1174				

\*A Zurn Solids Interceptor is recommended to be used in conjunction with all grease interceptors. See product information for details.

# **GREASE INTERCEPTORS – PURPOSE**

For over a hundred years, grease interceptors have been used in plumbing wastewater systems to permit free flow of drainage from sinks and similar equipment. They have played an important role in preventing grease accumulations from clogging waste pipes and sewer lines. They also help to improve operations at wastewater treatment facilities and prevent environmental problems caused by grease.

Zurn engineers were part of the original team that developed the current Plumbing and Drainage Institute Standard PDI-G101, which was first issued in 1949. PDI-G101 is now cited in numerous codes, as well as in Military Specification MIL-T-18361. Many Zurn grease interceptors comply with PDI-G101 and carry the PDI label.

# WHY ARE GREASE INTERCEPTORS NEEDED?

- 1. To prevent waste pipes in buildings from becoming clogged.
- 2. To prevent sewer lines from clogging and improve operation of water treatment plants by reducing the wastewater grease load from entering the plant.
- 3. To prevent environmental problems caused by grease mixed with other debris at landfills and in waterways.
- 4. To promote the recycling of recovered clean grease.

Grease entering the wastewater collection system presents major problems from the moment of entry and continuing to the final stage in wastewater treatment. It is an expensive burden in sewer pipes due to blockage and reduced capacity, causing the need for frequent cleaning. In severe cases, entire lengths of sewer pipe must be replaced due to solidification of the grease and other debris. Grease also causes substantial problems in wastewater treatment facilities because of its detrimental effect on the bacterial process of wastewater treatment. Not only is there a grease removal problem, but large quantities of grease can overload and compromise the digestive process, adversely affecting the operation of the wastewater treatment plant.

Another important reason for grease interception and recovery is for recycling. Grease, if recovered and purified (free of contaminants and water) can be turned into a valuable resource. Recovered grease can be used in the manufacturing of fertilizers, soaps, animal feed, cosmetics, and components of explosives such as nitroglycerine.

WHA

# **GREASE INTERCEPTORS - OPERATION**

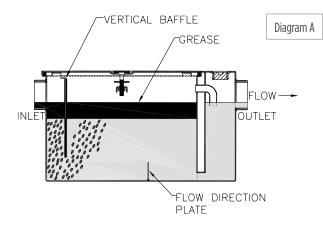

Four factors are critical to the proper operation of a grease interceptor: design, sizing, proper installation, and maintenance.

#### DESIGN

What makes Zurn interceptors most efficient are superior design characteristics (Diagram A).

Standard Zurn units are provided with a high inlet which allows all flow to empty into the interceptor. This keeps inlet lines from becoming clogged with grease buildup, which occurs with low inlet units and with large concrete separators buried outside. Because the static water level is maintained at the bottom of the outlet, any piping into the interceptor below this elevation will remain filled with water.

The Zurn solid vertical baffle plate immediately diffuses flow and channels the incoming fluids directly to the bottom of the separation chamber. A flow directing plate on the outlet side of the vertical baffle enhances flow in an upward direction and traps solids that may inadvertently enter the interceptor. This provides the maximum amount of time possible for separation to occur. Grease being approximately 90% of the weight of water, separates and floats to the top of the water under these conditions. The calming effect on the flow and the extended time sequence in the chamber allows for more efficient separation (Diagram A).

Zurn interceptors have an unobstructed separation chamber permitting the entire baffle to be lifted upward and removed. This provides for fast, easy cleaning which minimizes the amount of time the lid is off and the contents are exposed to the environment.

Odor from accumulated grease in an interceptor may pass back through the piping system and through the drain opening. An additional trap should be considered between the fixture and interceptor. Consult local codes.

Zurn interceptors are manufactured standard with a removable cleanout plug on the outlet side of the separation chamber, past the integral trap seal. This allows for quick, easy access to the outlet drainage pipe, should an obstruction or blockage occur downstream of the interceptor.

Zurn 1100 Series Interceptors are 100% steel construction, coated with a white acid-resisting epoxy (A.R.C.). Zurn Series Interceptors with flow rates from 4 to 50 GPM are certified by the Plumbing and Drainage Institute (PDI). Zurn Grease Interceptors with flow rates from 20 to 50 GPM are listed by the International Association of Plumbing and Mechanical Officials (IAPMO).

# SIZING

The Plumbing and Drainage Institute (PDI) as well as some national and local codes have recognized different ways of sizing grease interceptors. It is advisable to check with local authorities for sizing requirements in your particular locality.

The following pages outline the most widely used sizing methods along with some common variables which, if present, could adversely affect the operation of your grease interceptor. If any of the following variables are present, added care should be taken to select the proper size interceptor with appropriate options to compensate for each irregularity.

#### VARIABLES AFFECTING GREASE INTERCEPTOR PERFORMANCE

#### VELOCITY OF INCOMING WATER

A higher velocity of water will contribute to a more turbulent mixture. This will slow the grease separation process, thereby reducing efficiency.

Recommended Solution – Maximize incoming pipe size to lower flow velocity or install additional flow control fittings at all sources of flow.

#### RATIO OF GREASE TO THE WATER

The higher the ratio of grease particles to the water, the lower the efficiency of the interceptor.

Recommended Solution – Increase the size of the interceptor.

#### SPECIFIC GRAVITY (WEIGHT) OF THE FILTRATES

Grease has a lower specific gravity than water and will rise to the surface quickly. Grease-laden food particles, having a higher specific gravity than water, will linger and accumulate at the bottom, eventually passing out of the interceptor.

Recommended Solution – Install a solids interceptor at the source of solid particles, prior to the grease interceptor.

#### POSSIBLE PRESENCE OF DETERGENTS IN THE SYSTEM

Grease-cutting detergents will break the liquid grease into minute particles that can cause these liquids to pass through the interceptor.

Recommended Solution – Minimize the use of detergents, or increase the size of the interceptor.

#### PERCENTAGE OF MAXIMUM FLOW CAPACITY

If the maximum recommended flow is exceeded, the efficiency of the interceptor will decrease considerably.

Recommended Solution – Increase size of the interceptor to accommodate the increased flow, or install additional flow control fittings at all sources of flow.

#### LOCATION OF GREASE INTERCEPTOR

The interceptor should be located as close as possible to the source of grease. Waste pipes leading to the grease interceptor may become clogged if liquid cools prior to entering the grease interceptor. WHA

#### **Z250H** FOG-CEPTOR® INTERCEPTOR

NOTES

cannot be changed.

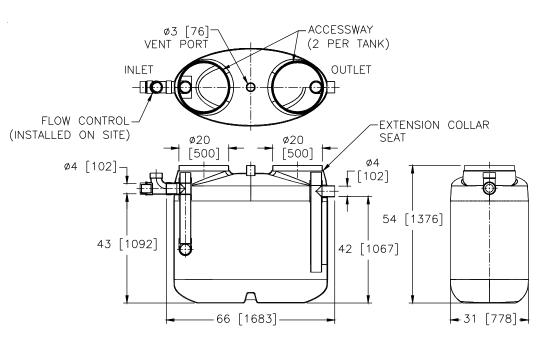

#### ENGINEERING SPECIFICATION

Zurn Z250H FOG-ceptor is engineered fiberglass, fats, oil, and grease interceptor, and dual manway interceptor with external flow control device. PDI and IAPMO rated at 100 gpm and 200 lb. Regularly furnished with 4" Schedule 40 PVC inlet and outlet. Includes two 20" diameter H-20 rated fiberglass bolted and gasketed frames and covers, four tubes of Sikaflex<sup>®</sup> bonding agent, one external flow control device, and two 3' high x 20" diameter autoprior pollare. diameter extension collars.

Zurn Z1165 grease interceptor system features acid resistant coated interior and fabricated steel exterior, PDI rated at gpm and lb grease capacity, internal air relief bypass, bronze cleanout plug, removable pressure equalizing/ flow-diffusing inlet baffle, fixed bottom outlet baffle, and visible double wall trap seal. Gasketed, non-skid, secured cover completes tie down assembly with Z1108 flow control fitting. Includes acid resistant coated fabricated steel solids interceptor with replaceable filter bags, retainer plate, latched lid, and removable sediment basket. Grease interceptor effluent efficiency meets 100 parts per million when tested to EPA 1664 test method. Results based on the influent requirements in accordance with the maximum rated capacity given by Plumbing and Drainage Institute Standard PDI-G101. The presence of solids particles may cause results to vary per application.

#### NOTES

Location of inlet and outlet from bottom of interceptor cannot be changed. For the Z1165 size 700, the Miami-Dade DERM label is located under the cover of the grease interceptor and solid interceptor.

# **Z117O-UN** GREASE INTERCEPTOR WITH USER NOTIFICATION SYSTEM

#### ENGINEERING SPECIFICATION

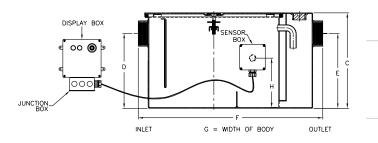

Zurn Z1170-UN grease interceptor features acid resistant coated interior and fabricated steel exterior, rated at \_\_\_\_\_gpm and \_\_\_\_lb grease capacity, internal air relief bypass, bronze cleanout plug, removable pressure equalizing/ flow-diffusing inlet baffle, fixed bottom outlet baffle, and visible double wall trap seal. Gasketed, non-skid, secured cover comes complete with center tie down assembly and Z1108 flow control fitting. Includes encased fiberglass sensor box containing an electronic grease level sensor and a fiberglass display box with green power light, red grease level light, audio alarm, and junction box. Regularly furnished with a high inlet and outlet connection.

#### NOTES

- 1. Location of outlet from bottom of interceptor cannot be changed.
- 2. Factory installed sensor box is mounted on the left- or right-hand side of the unit when facing inlet (must be specified).
- 3. Power supply 120V GFCI.

#### **RECOMMENDED INSTALLATIONS**

Sitting on the floor or recessed in a pit only. (A pit installation requires that a drain or sump pump be installed to keep the pit relatively dry.)

Zurn Z1171 low profile grease interceptor features acid resistant coated interior and fabricated steel exterior, PDI rated at \_\_\_gpm and \_\_\_lb grease capacity, internal air relief bypass, bronze cleanout plug, removable pressure equalizing/ flow-diffusing inlet baffle, fixed bottom outlet baffle, and visible double wall trap seal. Gasketed, non-skid, secured cover comes complete with center tie down assembly and Z1108 flow control fitting. Regularly furnished with 3" low inlet and outlet.\*

#### CAUTION

Solids should not be permitted to enter a grease interceptor. Where solids are present, use a Zurn Z1183 or Z1183-DF solids interceptor (see pages 183 and 184). Installations using indirect piping to unit could result in standing water in floor sink or flooding if line blockage occurs. Interceptors must be maintained periodically in order to ensure proper operation of the system. Follow cleaning schedule based on usage.

# **Z1172-UN** LARGE CAPACITY GREASE INTERCEPTOR WITH USER NOTIFICATION SYSTEM

#### ENGINEERING SPECIFICATION

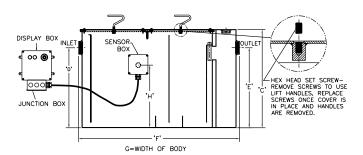

Zurn Z1172-UN Large capacity, Acid Resistant Coated interior and exterior fabricated steel grease interceptor, rated at \_\_\_\_gpm and \_\_\_\_lbs. grease capacity, with internal air relief bypass, bronze cleanout plug, and visible double wall trap seal with removable pressure equalizing/ flow-diffusing baffle. Gasketed, non-skid, secured cover with removable lift handles complete with flow control fitting. Includes encased fiberglass sensor box containing an electronic grease level sensor (specify right or left side<sup>+</sup>), a fiberglass display box with one green power light, red grease level light, audio alarm, and junction box. Regularly furnished with inlet and outlet in high position.

#### NOTES

- Location of inlet/outlet from bottom of interceptor cannot be changed. Power supply 120V GFCI.
- 2. <sup>†</sup>Sensor box is mounted on the left- or righthand side of the unit when facing inlet (must be specified).
- 3. Sizes 900 and 1000 require one cover.
- 4. Sizes 1100 and 1600 require two covers.
- 5. Sizes 1700 thru 1900 require three covers.

#### **RECOMMENDED INSTALLATIONS**

Sitting on the floor or recessed in a pit only. (A pit installation requires that a drain or sump pump be installed to keep the pit relatively dry.)

#### ENGINEERING SPECIFICATION

Zurn Z1173 ejecto-matic grease interceptor features acid resistant coated interior and fabricated steel exterior, PDI rated at \_\_\_\_gpm and \_\_\_\_lb grease capacity, internal air relief bypass, bronze cleanout plug, and visible double wall trap seal with removable combination pressure equalizing/flow-diffusing baffle and sediment tray and grease retention tray adjacent to grease draw-off valve. Gasketed, non-skid, secured cover comes complete with Z1108 flow control fitting. Regularly furnished with high inlet and outlet connection.

- 1. Location of outlet from bottom of interceptor cannot be changed. Draw-off connection regularly furnished on outlet side.
- On sizes #200 and #300, the grease draw-off valve is located on the left-hand side of the trap when facing the inlet, instead of on the outlet side as shown.

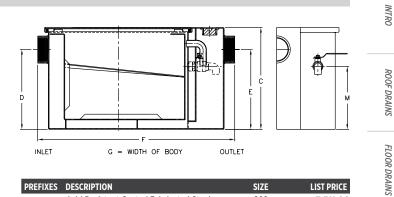

#### CAUTION

Solids should not be permitted to enter a grease interceptor.

Where solids are present, use a Zurn Z1183 or Z1183-DF solids interceptor (see pages 183 and 184).

Installations using indirect piping to unit could result in standing water in floor sink or flooding if line blockage occurs.

Interceptors must be maintained periodically in order to ensure proper operation of the system. Follow cleaning schedule based on usage.

# **Z1174** GREASE EATING BACTERIA DOSING UNIT AND SOLIDS INTERCEPTOR COMBINATION

ZS1174 Shown. Z is Standard.

#### ENGINEERING SPECIFICATION

Zurn Z1174 grease interceptor with automatic bacteria dosing unit features acid resistant coated interior and exterior fabricated steel exterior, Ib grease capacity, gpm and rated at internal air relief bypass, bronze cleanout plug, and visible double wall trap seal with removable pressure equalizing/flow-diffusing inlet baffle and fixed bottom outlet baffle. Gasketed, non-skid, secured cover comes complete with center tie down assembly and Z1108 flow control fitting. Furnished with Z1183 ARC solids interceptor, 110 VAC pump, pump mounting hardware, 15 feet of poly tubing and 5 gallons of grease-eating bacteria. Regularly furnished with inlet and outlet in high position.

#### NOTES Location

Location of outlet from bottom for interceptor cannot be changed.

# **SOLIDS INTERCEPTORS - GENERAL PRODUCT INFORMATION**

Zurn solids interceptors are specifically designed to capture and retain solid particles for a variety of different drain line applications. Units are available in Dura-Coated cast iron, bronze, Acid Resistant Coated steel and stainless steel, along with a multitude of screens designed for each application. If you require a solids interceptor not listed, phone 855-ONE-ZURN, or contact your local Zurn sales representative. Special screens and sizes are available to meet almost any need.

# **SOLIDS INTERCEPTORS - APPLICATION INDEX**

Product selection should be made with a specific application and the type of construction in mind. The varied types and sizes of Zurn interceptors, along with their options, offer a selection for all applications.

APPLICATION	RECOMMENDED INTERCEPTOR
Food Preparation	Z1181, Z1182, Z1183, Z1183-DF, Z1183-FC
Hair Salons	Z1175, Z1176, Z1180, Z1184
Plaster	Z1180, Z1181
Barium	Z1180
Fish Scales	Z1181, Z1183, Z1183-FC, Z1185
Garbage Disposal	Z1181, Z1182, Z1183, Z1183-DF, Z1183-FC
Laundry, Clothes Washers	Z1185
With Z1170 and Z1173 Interceptors	Z1181, Z1182, Z1183, Z1183-DF, Z1183-FC

# **SOLIDS INTERCEPTORS – SIZING**

All Zurn solids interceptors are designed for gravity flow where minimal head is expected. Zurn solids interceptors are designed to accommodate the flow rate of their inlet and outlet pipe size, provided they are maintained and kept clean.

Zurn solids interceptors should be sized by both expected flow rate and holding capacity. Z1185 lint interceptors must, however, be sized for the number of washing machines which they serve. Sizing for the Z1181 solids interceptor should be sized by the number and size of the sinks being served as is the case with the Z1170 grease interceptor.

			Recommended Size	Solids interceptors
Fixture Compartment Size (Inches)	Number of Compartments	Drainage Load (Gallons)	One-minute Drainage Period	Two-minute Drainage Period
18 x 12 x 6	1	4.2	7	4
16 x 14 x 8	1	5.8	7	4
20 x 18 x 8	1	9.4	10	7

# **Z1180** SOLIDS INTERCEPTOR

#### ENGINEERING SPECIFICATION

Zurn Z1180 solids interceptor works in lieu of fixture "P" trap. Features acid resistant composite, on-floor installation, removable PVC sediment bucket with a removable 3/32" diameter perforated flow defusing/intercepting PVC screen, top access, gasketed, secured cover, stainless steel draw latches and hardware with an ABS handle for easy removal of sediment bucket and screen.

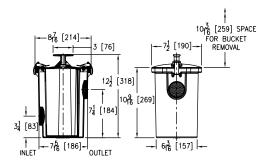

#### NOTES

<sup>+</sup>Regularly furnished with 2" threaded low inlet and high outlet.

#### CAUTION

Interceptors must be maintained periodically in order to ensure proper operation of the system. Follow cleaning schedule based on usage.

## **OIL INTERCEPTORS – GENERAL PRODUCT INFORMATION**

Zurn oil interceptors are designed to be similar to the grease interceptors. Both work on the principle that oils are lighter than water and thus gravity causes the oil to rise and the solids to fall. Zurn oil interceptors come equipped with a removable sediment bucket on the inlet to trap stones, grit and other substances. Their perforated, flow-diffusing baffle eliminates turbulence and allows for high efficiency of separation.

All Zurn Z1186 and Z1188 oil interceptors are supplied with a specific gravity oil draw-off tube assembly. This assembly is to be set 1/8 above the static water level, per standard installation instructions. Once oil builds down to this level, the oil draws off by gravity through the tube assembly.

All Zurn oil interceptors are of 100% steel construction coated with a blue acid resisting epoxy. All Zurn oil interceptors are listed by the IAPMO. If you require an oil interceptor not listed phone 855-ONE-ZURN, or contact your local Zurn sales representative.

## **OIL INTERCEPTORS – APPLICATION INDEX**

Product selection should be made with a specific application and the type of construction in mind. The varied types and sizes of Zurn interceptors, along with their options, offer a selection for all applications.

APPLICATION	RECOMMENDED INTERCEPTOR
Maintenance, Parking Garage, Oil Spill Areas	Z1186, Z1186-ST, Z1187, Z1187-SI, Z1188, Z1188-ST, Z1189, Z1196, Z1198, Z1198-ST

## ENGINEERING SPECIFICATION

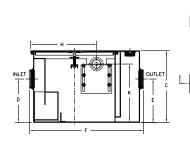

Zurn Z1186-ST oil interceptor features acid resistant coated interior and fabricated steel exterior, bronze cleanout plug and visible double wall trap seal, removable combination pressure equalizing/flow-diffusing baffle and sediment bucket, oil draw-off, and vent connections. Secured, gasketed, non-skid cover comes complete with flow control fitting and left-hand integral storage tank. Regularly furnished with inlet and outlet in high position.

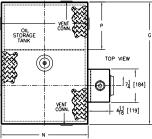

## NOTES

Location of outlet from bottom of interceptor cannot be changed. Regularly furnished with lefthand side storage tank.

\*Inlet and outlet sizes shown indicate standard operating sizes and flow control settings. Size #300 and #400 will have 3" connections reduced to 2" as standard. Size #700 and #800 will have 4" connections reduced to 3" as standard.

## **Z1188-ST** LARGE CAPACITY OIL INTERCEPTOR WITH INTEGRAL STORAGE TANK

## **ENGINEERING SPECIFICATION**

Zurn Z1188-ST oil interceptor features acid resistant coated interior and fabricated steel exterior, bronze cleanout plug and visible double wall trap seal, removable combination pressure equalizing/flow-diffusing baffle and sediment bucket, horizontal baffle, adjustable oil drawoff, and vent connections. Secured, gasketed, non-skid cover comes complete with flow control fitting and left-hand integral storage tank. Regularly furnished with inlet and outlet in high position.

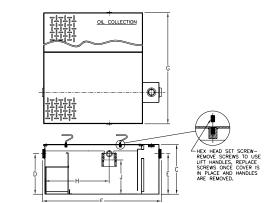

#### NOTES

Location of outlet from bottom of interceptor cannot be changed.

#### CAUTION

Interceptors must be maintained periodically in order to ensure proper operation of the system. Follow cleaning schedule based on usage.

## **Z1194** OIL LEVEL SENSOR RETROFIT KIT

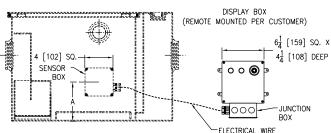

#### ENGINEERING SPECIFICATION

Zurn Z1194 oil level sensor retrofit kit features a fiberglass sensor box containing an electronic oil level sensor and a fiberglass display box with one green power light, red oil level light, audible alarm, and junction box. Intended use for retrofit applications on Z1186 and Z1188 oil interceptors. Power supply 100 to 240 VAC at 47 to 63 Hz, GFCI.

## CAUTION

Caution: Interceptor must be cleaned of solids and other debris and the sensors wiped off on a regular basis in order to ensure proper operation of the system. Z1194 TO BE USED WITH INTERCEPTORS FOR ON-THE-FLOOR INSTALLATION ONLY.

PREFIXES	DESCRIPTION	LIST PRICE

Zurn Z1196 oil interceptor features acid resistant coated interior and fabricated steel exterior with a fiberglass sensor box containing an electronic oil level sensor (specify right or left side<sup>†</sup>) and a fiberglass display box with one green power light, red oil level light, audible alarm and junction box. Includes bronze cleanout plug and visible double wall trap seal, removable combination pressure equalizing/flow-diffusing baffle and sediment bucket, horizontal baffle, and vent connections either side. Secured, gasketed, non-skid cover comes complete with flow control fitting. Regularly furnished with inlet and outlet in high position.

#### NOTES

- 1. †Installed sensor box is mounted on the left- or right-hand side of the unit when facing inlet (must be specified).
- 2. ‡Inlet and outlet sizes shown indicate standard operating sizes and flow control settings. Size #300 and #400 will have 3" connections reduced to 2" as standard. Size #700 and #800 will have 4" connections reduced to 3" as standard. If changed, flow control must be adjusted accordingly.
- 3. Power supply 120V GFCI.
- 4. Recommended Installations: Sitting on the floor or recessed in a pit only. (A pit installation requires that a drain or sump pump be installed to keep the pit relatively dry.)
- 5. For pit installation, see Form No. IT66.

## CAUTION

Interceptors must be maintained periodically in order to ensure proper operation of the system. Follow cleaning schedule based on usage.

Zurn Z1198-ST oil interceptor features acid resistant coated interior and fabricated steel exterior, fiberglass sensor box containing an electronic oil level sensor, fiberglass display box with audio and visual alarms and junction box. Includes bronze cleanout plug and visible double wall trap seal, removable combination pressure equalizing/flow-diffusing baffle and sediment bucket, adjustable oil draw-off, and vent connections. Secured, gasketed, non-skid cover comes complete with flow control fitting and left hand integral storage tank. Regularly furnished with inlet and outlet in high position.

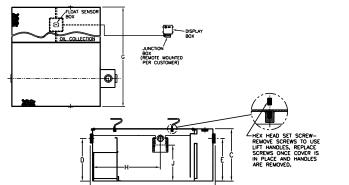

### NOTES

Location of inlet and outlet from bottom of interceptor cannot be changed.

#### CAUTION

Interceptors must be maintained periodically in order to ensure proper operation of the system. Follow cleaning schedule based on usage.

## **Z9A-PHIX** UNDER SINK ACID NEUTRALIZATION CARTRIDGE SYSTEM

## ENGINEERING SPECIFICATION

Point of use application, replacing standard P-trap. Includes industrial strength glass-filled polypropylene body with a 1-1/2" [38mm] compression fitting inlet and 1-1/2" [38mm] no-hub outlet, removable upper neutralization chamber, and lower sediment collection chamber.

MODEL NO.	INLET	OUTLET	LIST PRICE
Z9A-PHIX	1-1/2"	1-1/2"	3,567.00

The PHIX Cartridge System includes the cartridge, brass nut and compression ring, siphon, hose, support bracket, drainage pail, two bags of PHIX Media and a 10 year warranty.

## **Z9-PHIX-MEDIA** PHIX MEDIA 5 GALLON PAIL

## ENGINEERING SPECIFICATION

PHIX Media is a non-hazardous, non-WHIMIS material used to neutralize acid in the PHIX cartridge and can be used to replace limestone in existing neutralization tanks. PHIX Media is a safe alternative to limestone and does not require special handling or storage.

# DETERMINATION OF COUPLING AND FIXTURE DISTANCES FROM FRONT OF WALL

To ensure a tight seal at outlet of closet having a rectangular groove, the front end of the coupling should be located to compress the gasket adequately when the fixture is in the desired location. This dimension will vary depending on depth of recess (Dim. A) in closet. The following formula may be used to determine amount coupling should extend (Dim. B) in front of finished wall.

Inset illustrates depth of gasket recess in fixture and coupling with normal pressure on gasket.

## A = depth of recess in closet

X = distance closet is to be located from finished wall

B = distance coupling should extend in front of finished wall.

Thus, A + X - 1/2" = B

With fixtures having vee-shaped grooves, coupling may have to extend an additional 1/8" or more. With any closet, the coupling must compress the gasket enough so that the adhesive-coated surfaces are in good contact with the china and the face of the coupling.

**IMPORTANT:** Bearing nuts and washers must be located properly to establish and maintain dimension "X."

## DISTANCE FIXTURE BOLTS LOCATED IN FRONT OF WALL

To locate fixture bolts:

T =	thickness	of wall	flange	of closet	
-----	-----------	---------	--------	-----------	--

X = distance closet is to be located from finished wall

B = distance fixture studs should extend in front of finished wall.

Thus, T + X + 5/8" = B

"Minimum 'P' Dimension" is the minimum dimension from front of faceplate to finished wall:

Z1201/Z1202/Z1203/Z1204	Z1208 thru Z1209
1-3/4"	1″

"Standard 'P' Dimension" which is regularly supplied unless otherwise specified, provides for the following dimensions from the front of the faceplate to finished wall:

Z1201/Z1202/Z1203/Z1204		Z1208 thru Z1209		
MIN.	MIN. MAX.		MAX.	
5″	6″	4"	5-1/8″	

Longer 'P' dimensions (or shorter) with couplings up to, and including 12", are furnished at no extra charge. An additional charge will be made for greater 'P' dimensions (see Suffix -CL).

## ALLOWANCE FOR CONCEALED FLUSH VALVES

When wall closets are installed with concealed flush valves having rear inlet supply, location of faceplate is important – for Siphon Jet bowls, it is not necessary to locate faceplate behind supply line, since supply line will clear top of faceplate and vent line. For Blow Out installations, however, faceplate must be located behind supply line to prevent interference of faceplate with supply line.

## Dimensions below based on B = 3/8".

	Z1201/Z1202/Z1203/Z1204				
'P' Dim	ension*				
Min.	Min. Max.		Stud Length		
1-3/4	2-3/4	2-3/4	6		
2-1/2	3-1/2	3-1/2	8

## © Z1201-N EZCARRY® ADJUSTABLE HORIZONTAL HIGH PERFORMANCE SIPHON JET NO-HUB WATER CLOSET CARRIER SYSTEM

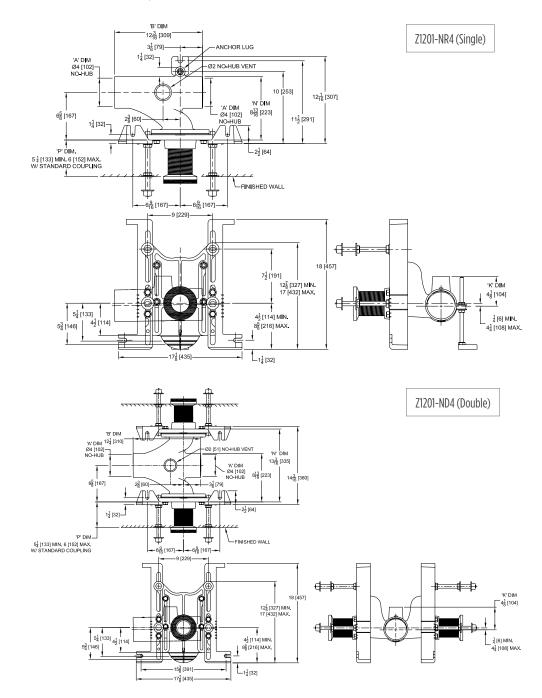

## ENGINEERING SPECIFICATION

Zurn Z1201-N() EZCarry<sup>®</sup> horizontal siphon jet water closet carrier system features high performance waterway and () no-hub connections. System includes Dura-Coated cast iron right-hand, left-hand, or double main fitting with hydro-mechanically optimized sweep and extended 2" vent, adjustable faceplate, QuickFit<sup>™</sup> faceplate gasket, floor mounted pre-fab slotted foot supports with top anchoring pre-fab support base, heavy-duty 1/2" rear anchor tie down, fixture bolts, trim, stud protectors, bonded Neo-Seal gasket, and corrosion resistant adjustable 3" diameter x 6" coupling with integral test cap designed to increase flow velocity and line carry. EZCarry system complies with the requirements of ASME A112.6.1M, up to a 500 lb static load rate.

## NOTES

- 1. Cut 4" adjustable coupling minimum "P" dimension obtainable = 2". EZ-Set™ coupling, minimum 'P' dimension obtainable = 4-1/4" or 2-1/16" for 12" NPT.
- 2. Feet bolted to floor using minimum 1/2" diameter anchors and back slots on carrier feet.
- 3. Rear anchor foot required for secure installation.

Zurn Z1201-N()-XB EZCarry® bariatric horizontal siphon jet water closet carrier system features high performance Dura-Coated cast iron main fitting with hydromechanically optimized sweep, 4" no-hub connections, and extended 2" vent. Corrosion resistant adjustable cast iron coupling is designed to increase flow velocity and line carry. Labor saving Neo-Seal bonded gasket optimizes flow performance, while reducing installation steps. Complete system includes an adjustable faceplate, QuickFit<sup>™</sup> faceplate gasket, floor mounted foot supports, rigid support frame assembly, extra heavy-duty 1/2" rear anchor tie down, fixture bolts, trim, and stud protectors. EZCarry® XB system complies with all applicable requirements of ASME A112.6.1M up to a 1000 lb maximum static load.

#### NOTES

- 1. Cut 4" adjustable coupling minimum 'P' dimension obtainable = 3".
- 2. Feet bolted to floor using minimum 1/2" diameter anchors.
- 3. Rear anchor assembly required for secure installation.
- Floor anchors must each be able to withstand a pull-out force of 748 lb.
- 5. Pull-out forces are calculated values with standard coupling assembly. No safety factor has been applied. See Form #C38 for more information.

Labor saving Neo-Seal bonded gasket optimizes flow performance, while reducing installation steps. Complete system includes an adjustable faceplate, QuickFit<sup>™</sup> faceplate gasket, floor mounted foot supports, extra heavy-duty 1/2" rear anchor tie down, fixture bolts, trim, and stud protectors. EZCarry® XH system complies with all applicable requirements of ASME A112.6.1M up to a 750 lb maximum static load.

#### NOTES

- Cut 4" adjustable coupling minimum 'P' dimension obtainable = 2". Cut ZQ coupling minimum 'P' dimension obtainable = 5".
- Feet bolted to floor using minimum 1/2" diameter anchors.
- 3. Rear anchor assembly required for secure installation.
- Floor anchors must each be able to withstand a pull-out force of 820 lb.
- Pull-out forces are calculated values with standard coupling assembly. No safety factor has been applied. See Form #C38 for more information.

ZF1201-U EZCarry® one-piece combination floor mounted foot/faceplate horizontal siphon jet system supplied for () rough-in height features high performance Dura-Coated cast iron main fitting with hydro-mechanically optimized sweep, 3" [76mm] or 4" [102mm] no-hub connections, and extended 2" [51mm] vent. Faceplate enables prefabrication with strut channel or angle iron. Corrosion resistant adjustable 3" [76mm] diameter x 6" [152mm] coupling with integral test cap is designed to increase flow velocity and line carry. Labor saving Neo-Seal bonded gasket optimizes flow performace while reducing installation steps. Complete system includes one-piece combination foot/faceplate, heavyduty 1/2" [13mm] rear anchor tie own (optional dependent on installation method, see intallation instructions), fixture bolts, trim and stud protectors. EZCarry® one-piece combination floor mounted foot/faceplate system complies with all applicable requirements of ASME A112.6.1M up to a 500 lb maximum static load.

#### NOTES

- Cut 6 [152] adjustable coupling minimum "P" dimension obtainable = 2 [51]. EZSet™ coupling, minimum 'P' dimension obtainable = 4-1/4 [108] or 1-1/16 [27] for 12 [305] NPT.
- 2. For floor mounting, faceplate bolted to floor using 1/2 [13] diameter anchors.
- 3. For unistrut attachment, 3/8 [10] bolts recommended.
- 4. Rear anchor requirement is dependent on installation type. See installation instructions.

## © ZN1201-N EZCARRY® ADJUSTABLE HORIZONTAL SIPHON JET – NO-HUB NARROW WALL SYSTEM (9-3/8" DEPTH FRONT TO BACK)

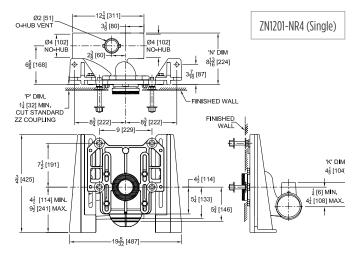

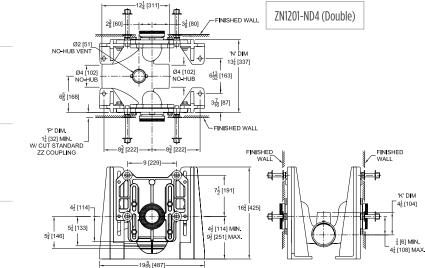

## **ENGINEERING SPECIFICATION**

Zurn ZN1201-N()4 EZCarry® narrow wall horizontal siphon jet water closet carrier system features high performance Dura-Coated cast iron main fitting with hydro-mechanically optimized sweep, 4" no-hub connections, and extended 2" vent. Corrosion resistant adjustable 3" diameter x 6" coupling with integral test cap is designed to increase flow velocity and line carry. Labor saving Neo-Seal bonded gasket optimize flow performance while reducing installation steps. Complete system includes an adjustable faceplate, QuickFit<sup>™</sup> faceplate gasket, floor mounted foot supports, fixture bolts, trim, and stud protectors. EZCarry® narrow wall system complies with all applicable requirements of ASME A112.6.1M up to a 500 lb maximum static load.

#### NOTES

- 1. Cut 4" adjustable coupling minimum 'P' dimension obtainable = 1-1/4''.
- 2. Carrier floor anchors must each be able to withstand a pull-out force of 1741 lb.
- 3. Pull-out forces are calculated values with standard coupling assembly. No safety factor has been applied. See Form #C38 for more information.

Zurn Z1202-()N EZCarry<sup>®</sup> vertical siphon jet water closet carrier system features high performance waterway and 4" no-hub connections. System includes Dura-Coated cast iron right-hand, left-hand, or double main fitting with hydro-mechanically optimized sweep and extended 2" vent, adjustable faceplate, QuickFit<sup>™</sup> faceplate gasket, floor mounted pre-fab slotted foot supports with top anchoring pre-fab support base, heavy-duty 1/2" rear anchor tie down, fixture bolts, trim, stud protectors, bonded Neo-Seal gasket, and corrosion resistant adjustable 3" diameter x 6" coupling with integral test cap designed to increase flow velocity and line carry. EZCarry system complies with the requirements of ASME A112.6.1M, up to a 500 lb static load rating.

## NOTES

- 1. Cut 4" adjustable coupling minimum "P" dimension obtainable = 2". EZ-Set™ coupling, minimum 'P' dimension obtainable = 4-1/4" or 2-1/16" for 12" NPT.
- 2. Feet bolted to floor using minimum 1/2" diameter anchors and back slots on carrier feet.
- 3. Rear anchor foot required for secure installation.
- 4. 2" no-hub vent connection regularly furnished on right-hand side. Left-hand available when specified (Suffix -VL).
- 5. Auxiliary inlet available right (-JR) or left (-JL) or both sides (-JJ) when specified.

Items designated as Best Sellers are most specified and are generally in stock for shipment. ① This symbol denotes a product that is engineered to reduce installation and rework time. For Additional System Tools See "Z1200 Carrier Tools and Accessories" on page 196

Zurn Z1202-N()-XB EZCarry® bariatric vertical siphon jet water closet carrier system features high performance Dura-Coated cast iron main fitting with hydromechanically optimized sweep, 4" no-hub connections, and extended 2" vent. Corrosion resistant adjustable cast iron coupling is designed to increase flow velocity and line carry. Labor saving Neo-Seal bonded gasket optimizes flow performance, while reducing installation steps. Complete system includes an adjustable faceplate, QuickFit<sup>™</sup> faceplate gasket, floor mounted foot supports, rigid support frame assembly, extra heavy-duty 1/2" rear anchor tie down, fixture bolts, trim, and stud protectors. EZCarry® XB system complies with all applicable requirements of ASME A112.6.1M up to a 1000 lb maximum static load.

### NOTES

- Cut 4" adjustable coupling minimum 'P' dimension obtainable = 3".
- 2. Feet bolted to floor using minimum 1/2" diameter anchors.
- 3. Rear anchor foot required for secure installation.
- 4. Floor anchors must each be able to withstand a pull-out force of 748 lb.
- 5. Pull-out forces are calculated values with standard coupling assembly. No safety factor has been applied. See Form #C38 for more information.
- 2" no-hub vent connection regularly furnished on right-hand side. Left hand available when specified (Suffix -VL).
- 7. Auxiliary inlet available right (-JR) or left (-JL) or both sides (-JJ) when specified.

### ENGINEERING SPECIFICATION

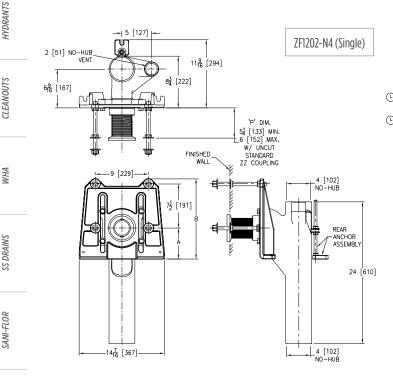

Zurn ZF1202-N() EZCarry® one-piece combination floor mounted foot/faceplate horizontal siphon jet water closet carrier system, supplied for () roughin height, features high performance Dura-Coated cast iron main fitting with hydro-mechanically optimized sweep, 4" no-hub connections, and extended 2" vent. Corrosion resistant adjustable 3" diameter x 6" coupling with integral test cap is designed to increase flow velocity and line carry. Labor saving Neo-Seal bonded gasket optimizes flow performance, while reducing installation steps. Complete system includes one-piece combination foot/faceplate, heavy-duty 1/2" rear anchor tie down, fixture bolts, trim, and stud protectors. EZCarry® one-piece combination floor mounted foot/faceplate system complies with all applicable requirements of ASME A112.6.1M up to a 500 lb maximum static load.

### NOTES

- Cut 4" adjustable coupling minimum 'P' dimension obtainable = 2". EZ-Set™ coupling, minimum 'P' dimension obtainable = 4-1/4" or 2-1/16" for 12" NPT.
- 2. Feet bolted to floor using minimum 1/2" diameter anchors.
- 3. Rear anchor assembly required for secure installation (not on ND4).
- 2" no-hub vent connection regularly furnished on right-hand side. Left-hand available when specified (Suffix -VL).
- 5. Auxiliary inlet available right (-JR) or left (-JL) or both sides (-JJ).

Items designated as Best Sellers are most specified and are generally in stock for shipment. This symbol denotes a product that is engineered to reduce installation and rework time. For Additional System Tools See "Z1200 Carrier Tools and Accessories" on page 196

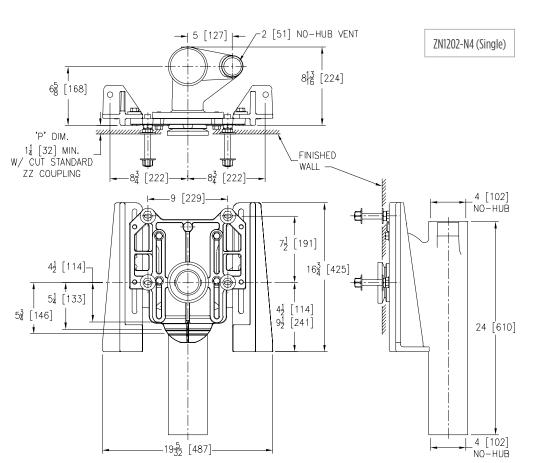

Zurn ZN1202-N()4 EZCarry<sup>®</sup> narrow wall vertical siphon jet water closet carrier system features high performance Dura-Coated cast iron main fitting with hydromechanically optimized sweep, 4" no-hub connections, and extended 2" vent. Corrosion resistant adjustable 3" diameter x 6" coupling with integral test cap is designed to increase flow velocity and line carry. Labor saving Neo-Seal bonded gasket optimizes flow performance while reducing installation steps. Complete system includes an adjustable faceplate, QuickFit™ faceplate gasket, floor mounted foot supports, fixture bolts, trim, and stud protectors. EZCarry<sup>®</sup> narrow wall system complies with all applicable requirements of ASME A112.6.1M up to a 500 lb maximum static load.

### NOTES

- 1. Cut 4" adjustable coupling minimum 'P' dimension obtainable = 1-1/4".
- 2. Carrier floor anchors must each be able to withstand a pull-out force of 1741 lb.
- 3. Pull-out forces are calculated values with standard coupling assembly. No safety factor has been applied. See Form #C38 for more information.
- 2" no-hub vent connection regularly furnished on right-hand side. Left hand available when specified (Suffix -VL).
- Auxiliary inlet available right (-JR) or left (-JL) or both sides (-JJ) when specified.

# © **ZE1203-H** ADJUSTABLE HORIZONTAL SIPHON JET WITH ELONGATED FITTING – HUB AND SPIGOT SERIES

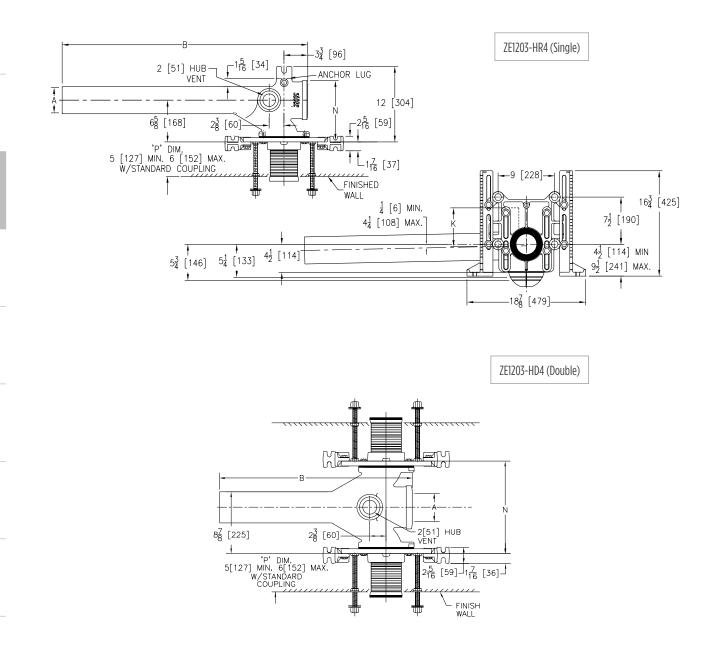

### ENGINEERING SPECIFICATION

Zurn ZE1203-H() adjustable, horizontal siphon jet water closet provides a rigid system with () size hub and spigot connections. Comes complete with Dura-Coated cast iron right-hand, left-hand, or double main elongated fitting, 2" vent, adjustable gasketed faceplate, universal floor mounted foot supports, corrosion resistant adjustable polymer coupling with integral test cap, fixture bolts, trim, and stud protectors. Includes rear anchor tie down and bonded Neo-Seal gasket.

### NOTES

- 1. 13-1/2" minimum space required between front of foot and rear of anchor to install ZE1203 Series.
- 2. Minimum "P" dimension attainable = 2"
- 3. Feet anchored to floor using minimum 1/2'' diameter anchors through rear slots on carrier feet.
- 4. Rear anchor foot required for secure installation. (Not on HD series)

NOTES

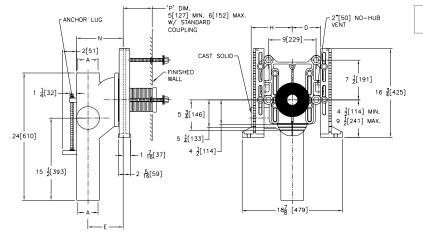

### ENGINEERING SPECIFICATION

Zurn Z1204-() adjustable, vertical siphon jet water closet provides rigid system with () size no-hub connections and () side inlets. Comes complete with Dura-Coated cast iron, right-hand, left-hand, or double main fitting, 2" vent, adjustable, gasketed faceplate, universal floor mounted foot supports, corrosion resistant, adjustable polymer coupling with integral test cap, fixture bolts, trim and stud protectors. Includes rear anchor tie down and bonded Neo-Seal gasket.

- 1. Minimum "P" dimension obtainable = 2".
- 2. 2" no-hub vent connection regularly furnished on right-hand side. Left hand available when specified (Suffix-VL)
- 3. Auxiliary inlet available right (-JR) or left (-JL) or both sides (-JJ) when specified.
- 4. Feet bolted to floor using min. 1/2" diameter bolts and back slots on carrier feet.
- 5. Back anchor foot required for secure installation. (For single carrier only)

### ENGINEERING SPECIFICATION

Zurn Z1207-N() adjustable, horizontal, high rough-in siphon jet water closet provides a rigid system with 4" size no-hub connections. Comes complete with Dura-Coated cast iron right-hand, left-hand, or double main fitting, with 2" vent, adjustable gasketed faceplate, universal floor mounted foot supports, corrosion resistant adjustable ABS coupling with integral test cap, fixture bolts, trim, and stud protectors. Rear anchor tie down and bonded "Neo-Seal" gasket.

### NOTES

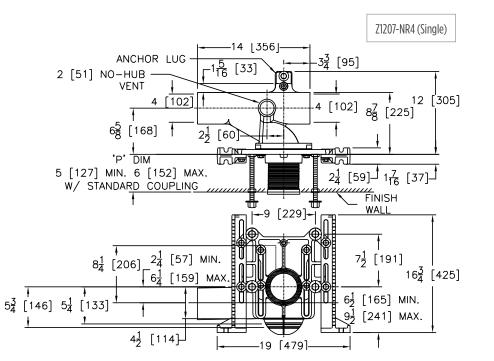

- 1. 13-1/2" minimum space required between front of foot and rear of anchor to install Z1207-N4 Series.
- 2. Minimum "P" dimension obtainable = 2".
- 3. Feet anchored to floor using minimum 1/2" diameter anchors through rear slots on carrier feet.
- 4. Rear anchor foot required for secure installation.

# ENGINEERING SPECIFICATION

Zurn Z1375 encased, moderate climate ground hydrant is designed for flush with grade or finished floor installation. Comes complete with all bronze interior parts, replaceable bronze seat and seat washer, and non-turning operating coupling with free-floating compression closure valve. Includes Dura-Coated cast iron box and hinged, scoriated cover with "WATER" cast on cover.

# **Z1385** POST HYDRANT – EXPOSED HEAD, NON-FREEZE

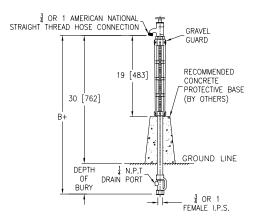

# ENGINEERING SPECIFICATION

Zurn Z1385 exposed, non-freeze post hydrant features galvanized steel casing and cast aluminum casing guard, all bronze interior parts, bronze seat and replaceable seat washer, and non-turning operating rod with free-floating compression closure valve with 3/4" or 1" connection. Includes operating key. Hydrant is equipped with a tapped 1/4" NPT drain port in valve housing.

# NOTES

- 'B' dimension based on outlet connection 30" above ground.
- 2. Important: Hydrant must be opened one turn minimum to seal drain port during use.
- Non-Freeze feature will not automatically function when (-VB suffix) vacuum breaker is specified. The vacuum breaker must be manually tripped to facilitate drainage of hydrant.

# WATER HAMMER ARRESTORS

Z1700 SHOKTROL WATER HAMMER ARRESTORS	290
Z1712 ACCUMUTROL	290

### **Z1700** SHOKTROL WATER HAMMER ARRESTORS

#### ENGINEERING SPECIFICATION

Zurn Z1700 Shoktrol Water Hammer Arrestors are regularly furnished in all stainless steel construction. Pipe threads are accurately machined to assure tight connection. 3/4" [19mm] male I.P.S. inlet is standard for the 100 size units, while 1" [25mm] male I.P.S. inlet is standard for sizes 200 thru 600.

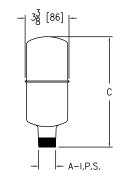

#### NOTE:

Res and a second second

Where required in piping systems, properly sized water hammer arrestors shall be Zurn Z1700 (specify size) with nesting type bellows contained within a casing having sufficient displacement volume to dissipate the calculated kinetic energy generated, in the piping system. Both casing and bellows constructed of Type 304 stainless steel.

All sizes of Zurn Z1700 Shoktrol water hammer arrestors comply with the following specifications: PDI WH-201 ASSE 1010

	Dimensions in inches [mm]		Approximate		
Size	А	с	Weight lb [kg]	Fixture Unit Capacity

SANI-FLOR

TECH INFO

A.R.C. Acid Resisting Epoxy Coating is a baked-on powder coating which produces a smooth, hard, high gloss finish. This epoxy based coating offers high impact resistance and excellent life expectancy in all drainage applications.

A.R.E. Acid Resisting Porcelain Enamel is a substantially vitreous inorganic coating bonded to metal by fusion at a high temperature above 800°F. This coating offers excellent acid, abrasion, and wear resistance. The coating is extremely hard and is the ultimate for sanitation in drainage application.

# **SANI-FLOR RECEPTORS – OPTIONS AND VARIATIONS**

Zurn Sani-Flor Receptor options are specified as a PREFIX and/or SUFFIX letter or number added to the series designation. Each floor sink in the catalog is listed with its individual Prefix/Suffix variation.

PREFIXE	S
Z	Cast iron body with white acid resisting porcelain enamel (A.R.E.) interior and top.
ZN	Cast iron body with white acid resisting porcelain enamel (A.R.E.) interior and nickel bronze top.
SUFFIXE	5
-C	Clamp Collar
-DX	Dex-O-Tex Flange
-HD	Stainless Steel Frame with Extra-Heavy-Duty Stainless Steel Grate - Specify in areas where working load exceeds 2000 pounds or where extreme chemica resistance properties are required.
-HP	Heel-Proof Grate
-K	Anchor Flange
-KC	Anchor Flange with Seepage Holes and Clamp Collar
-LD	Less Internal Bottom Dome Strainer
-LS	Less Secondary Strainer
-P	1/2" Threaded Trap Primer Connection (See Z1023)
-S	Secondary Strainer
-T	Square Nickel Bronze Top
-TC	Neo-Loc Test Cap Gasket 2"-4" NL Bottom Outlet Only
-VPS	Vandal-Proof Strainer
-WB	Water Supply Control Box
-1	Less Grate - Receives multiple indirect wastes from either condensate lines air conditioners or other indirect drainage equipment specifically located in non-traffic areas.
-2	Half Grate - Receives indirect waste as with Suffix $-1$ , but with $1/2$ grate opening to easily accept waste from a single direction while providing a finished floor drain top on the opposite side.
-3	Three-Quarter Grate - Receives indirect waste as with Suffix $-1$ , but with $3/4$ grate and $1/4$ opening to easily accept waste from a single source.
-4	Full Grate with Center Opening - Receives indirect waste as with Suffix -1, but with square center opening to accept waste from multiple directions.
-5	Grate with 4" Diameter x 3-3/4" High Funnel
-6	Grate with 6" Diameter x 6" High Funnel - Receives indirect waste from single pipe using round funnel which is centrally located on grate. Prevents splashing of waste around entire receptor. Can be relocated at job site to mee project requirements.
-7	Grate with 6-3/4" x 3" x 1" High Oval Funnel
-8	Grate with 8-7/8" x 3-5/8" x 3-3/4" High Oval Funnel - Receives indirect waste from a series of pipe discharges using oval funnel which is centrally located on grate. Can be relocated at job site to meet project requirements
-9	Angle Frame and Grate - Used in food handling facilities incorporating a two-fold purpose. An angle drain provides a sanitary floor drain in an oper service area where open half of grate is hidden inside cabinetry to receive an indirect waste discharge. Two-piece construction further enhances the ultimate in sanitation standards.
-11	Vandal-Proof Secured Grate - Prevents removal of grate by unauthorized individuals.
-12	Depressed Aluminum Grate - Specified for areas in restaurants, food markets, taverns, and many non-traffic areas. Grate recess accumulates food particles rather than let them fall into receptor.
-15	Solid Loose Set Cover - Specified when receptor is to be inactive a majority of the time.
-16	Half Solid Loose Set Cover - Same as Suffix –15, but with 1/2 cover open to accept indirect waste.

SUFFIX	ES Three-Quarter Solid Loose Set Cover - Same as Suffix –16, but with 3/4
-17	cover inactive.
-18	Solid Loose Set Cover with Square Center Opening - Same as Suffix –16, but with center opening and balance of cover inactive.
-19	Full Hinged Grate - Specified in light traffic areas where grate removal is prohibited for any length of time.
-23	Aluminum Sediment Bucket - Specified when interception and retention of solids is necessary. Used in food preparation areas.
-25	White Acid Resisting Sediment Bucket - Same as Suffix -23, but with acid resisting finish.
-31	Stainless Mesh Liner for Sediment Bucket - Specified when retention of fine particles is required. Provided with screen having 331 holes per square inch.
-32	Aluminum Dome Strainer
-33	White Acid Resisting Anti-Splash Dome Strainer - Use in areas where harsh chemicals or substances enter receptor.
-34	Nickel Bronze Anti-Splash Dome Strainer

-1 Less Grate

-3 Three-Quarter Grate

-5, -6 Grate with Round Funnel

-9 Angle Frame and Grate

-2 Half Grate

-4 Full Grate with Center Opening

-7, -8 Grate with Oval Funnel

-12 Depressed Aluminum Grate

# C Z1903 SANI-FLOR RECEPTOR INSTALLATION STABILIZER

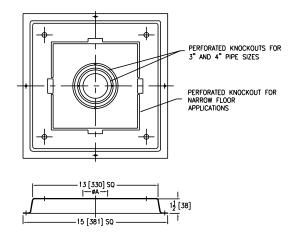

#### ENGINEERING SPECIFICATION

Zurn Z1903 Sani-Flor receptor installation stabilizer features a 16-gage, galvanized steel plate with variable pipe opening, four support stud holes, and four nail holes. Comes complete with hardware bag containing four 3/8"-16 x 12" long studs, eight 3/8"-16 flange locknuts and coverplate with hole for standard 2" pipe size and perforated knockouts for 3" and 4" pipe connections. (For use with Z1900, Z1901, and Z1902 Sani-Flor receptors.)

#### NOTE

Stabilizer plate may be used without coverplate for narrow floor applications where the drain body will be recessed into stabilizer plate.

# TECHNICAL INFORMATION

TECHNICAL INFO - ZURN OUTLET PIPE CONNECTIONS	328
TECHNICAL INFO - TOP LOADING CLASSIFICATION	329
TECHNICAL INFO - ZURN MATERIALS AND FINISHES	330
ALPHANUMERIC INDEX	332

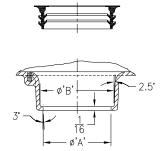

# **TECHNICAL INFO - ZURN OUTLET PIPE CONNECTIONS**

# **INSIDE CAULK (IC)**

Often specified where drain body is positioned on pipe, bottom of outlet is sealed with oakum and connection is then completed according to local plumbing codes.

# **INSIDE GASKET (IG)**

The IG connections utilize an inside caulk drain body and a Zurn "Sealtrol" gasket. This connection is only recommended for basement or ground floor applications.

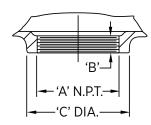

I.C. with Sealtrol Gasket (IG) Inside Caulk (IC)

OUTLETS	'A'	'B'	'C'
2. [51] I.C. Outlet	2-5/8 [67]	3-1/16 [78]	-
3. [76] I.C. Outlet	3-3/4 [95]	4-3/16 [106]	-
4. [102] I.C. Outlet	4-3/4 [121]	5-3/16 [132]	-
5. [127] I.C. Outlet	5-3/4 [146]	6-3/16 [157]	-
6. [152] I.C. Outlet	6-3/4 [172]	7-3/16 [183]	-
8. [203] I.C. Outlet	8-7/8 [226]	9-1/2 [241]	-

# **IRON PIPE (IP)**

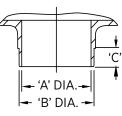

Zurn Iron Pipe Threaded connection is an old industry standard. The female (NPT) threaded outlet is often specified on industrial and institutional applications.

I.P. (Threaded/N.P.T.)					
OUTLETS	'A'	'B'	'C'		
2. [51] N.P.T. Outlet	2 [51]	9/16 [14]	3-1/4 [83]		
3. [76] N.P.T. Outlet	3 [76]	3/4 [19]	4-1/2 [114]		
4. [102] N.P.T. Outlet	4 [102]	15/16 [24]	5-5/8 [143]		
5. [127] N.P.T. Outlet	5 [127]	15/16 [24]	6-11/16 [170]

6. [152] No-Hub Outlet	5-15/16 [151]	6-5/16 [160]	2-1/16 [52]		
8. [203] No-Hub Outlet	8 [203]	8-3/8 [213]	2-1/16 [52]		
10. [254] No-Hub Outlet	10 [254]	10-9/16 [268]	2-1/16 [52]		
12. [305] No-Hub Outlet	12 [305]	12-9/16 [319]	2-1/16 [52]		

# NEO-LOC (NL)

Zurn Neo-Loc is a unique labor-saving compression gasketed connection designed to simply push on the stub end of the pipe. The Neo-Loc drain body and gasket can be utilized with plastic, steel, No-Hub and service weight soil pipe. A unique pipe stop cast in each Zurn Neo-Loc drain body ensures a proper fit.

**Note:** Not recommended for roof drain applications due to the watertight integrity of the Neo-Loc connection to the leader pipe being dependent upon adequate leader pipe support and accurate perpendicularity of leader pipe into Neo-Loc gasket.

"Neo-Loc" (NL)

OUTLETS	'A'	'B'	'C'
2. [51] Neo-Loc Outlet	2 [51]	3-3/8 [86]	3 [76]
3. [76] Neo-Loc Outlet	3 [76]	4-3/8 [111]	4 [102]
4. [102] Neo-Loc Outlet	4 [102]	5-1/2 [140]	5-1/8 [130]

# **TECHNICAL INFO - TOP LOADING CLASSIFICATION**

Selection of a Zurn Floor Drain should be based on the load factor and the anticipated traffic. Many of Zurn's cast iron grates may be furnished in Duresist iron when increased working load requirements are necessary. Specify Duresist grate (-DG) when required or contact your Zurn representative when special applications are necessary.

Zurn drains are rated as follows: (Reference ASME Standard A112.6.3M)

#### **6.1 – LOADING CLASSIFICATIONS**

Grates and top rims shall be designed to meet the following loading classifications.

#### 6.1.1 - LIGHT DUTY

All grates having safe live load (as calculated in para. 6.2.5) under 2000 lb. [900 kg].

#### 6.1.2 - MEDIUM DUTY

All grates having safe live load (as calculated in para. 6.2.5) between 2000 lb. [900 kg] and 4999 lb. [2250 kg].

#### 6.1.3 - HEAVY DUTY

All grates having safe live load (as calculated in para. 6.2.5) between 5000 lb. [2250 kg] and 7499 lb. [3375 kg].

#### 6.1.4 - EXTRA HEAVY DUTY

All grates having safe live load (as calculated in para. 6.2.5) between 7500 lb. [3375 kg] and 10,000 lb. [4500 kg].

#### 6.1.5 - SPECIAL DUTY

Grates having safe live load (as calculated in para. 6.2.5) over 10,000 lb. [4500 kg] shall be considered special and treated accordingly.

#### 6.2 - TEST PROCEDURE FOR GRATE LOADING

Live Load – Requirements listed in 6.1 through 6.1.5 shall be determined as follows:

<sup>+</sup>Safe live load rating of grates is for general classification purposes only. For the actual safe live load of any given grate, contact your Zurn representative.

Note: ZB and ZN 400 Series drain head assemblies are rated for light-duty applications only.

## 6.2.1 – LOAD CLASSIFICATIONS

Load classifications as stated in 6.1 shall be determined by laboratory tests.

#### 6.2.2 - PLATEN SIZE

A 3.5 in. [89 mm] diameter platen shall be applied to the center of the grate specimen.

#### 6.2.3 - LOADING

Loading shall be applied slowly so that point of failure can be observed.

## 6.2.4 - POINT OF FAILURE

(a) Brittle Materials (Cast Iron). The load (in pounds or kilograms) at which the first fracture on any part of the specimen appears.

(b) Ductile Material. The load which the permanent set (at the point of loading) is greater than 2% of the longest transverse dimension of the specimen.

## 6.2.5 - GRATE CLASSIFICATION

The maximum safe live load is computed by dividing the load at failure by two.

CARRIERS

# **ZURN CAST IRON**

Conforms to ASTM Specification for Gray Iron Castings A48, Class 25. It is produced utilizing the latest equipment and newest developed foundry techniques. Zurn cast iron castings are characterized by a high degree of strength, corrosion-resistance, workmanship, and finish.

# **ZURN DURESIST**

A ductile iron complying with ASTM Specification A536, Grade 60-45-10. Its physical properties make it ideal for grates and drain components that are subjected to severe and heavy duty service. Its chemical characteristics make possible a degree of corrosion-resistance far superior to that of cast iron. Zurn Duresist exhibits remarkable stress qualities, possessing a yield strength in the same range as that of cast carbon steel, while its ability to absorb the shock loading of traffic areas is unequalled, making its use ideal for all areas where extra heavy duty service is a requirement – whether indoors or outdoors – in chemical and metal processing plants or other industrial applications.

# **ZURN DURA-COAT**

A specially formulated paint designed to resist cracking and chipping. Dura-Coat is a latex-based coating developed to be used with cast iron substrate. Dura-Coat is designed, per ASME standards, to protect the product "during normal handling and warehousing prior to installation".

# **ZURN GALVANIZED CAST IRON**

A process of applying heavy zinc coating to a thoroughly cleaned iron casting. This coating contains 95% zinc. Zurn galvanizing can be supplied on all cast iron parts. It increases longevity and is recommended wherever the discoloration caused by oxidation of cast iron is objectionable. Galvanize should be used in industrial areas where corrosive atmosphere may be encountered.

# **CADMIUM PLATED CAST IRON**

A process of applying a heavy cadmium coating to a thoroughly cleaned iron casting. This coating contains 95% cadmium in a cold applied process. Cadmium plating can be supplied on all cast iron parts. It increases longevity and is recommended wherever the discoloration caused by oxidation of cast iron is objectionable.

#### PROPERTIES OF BASIC DUCTILE VERSUS CAST IRON

METAL	CAST IRON	DUCTILE IRON
Specification	Class 25	60-45-10
Tensile Strength (PSI)	25/30,000	60/80,000
Yield Strength (PSI)	NIL	45/60,000
Elongation	NIL	10% to 25%
Modules of Elasticity	16 x 10	24 x 10

## **ZURN BRONZE**

A semi-red brass conforming to ASTM Specification for Copper Alloy Sand Casting B584, Copper Alloy No. 844. The exposed surface is normally supplied possessing a satin sheen texture which allows it to blend unobtrusively with surrounding finishes. When the application requires, Zurn Bronze can be polished to a high gloss.

# **ZURN NICKEL BRONZE**

A unique material that is ideally suited to traffic-bearing grates and strainers in finished floor areas. It affords the combined advantage of greater strength, better appearance, and longer service life at the same price as chrome plated brass. Superior ductility and shock resistance are the result of a copper nickel alloy (Copper Alloy 997) having a wearing surface similar in appearance to satin chrome plate; however, because it does not have a plated surface it cannot chip, peel, crack, or wear off. It is highly resistant to corrosion; however, the process of oxidation will naturally occur over time with most metals. Methods have been developed to prevent, preserve, and restore metals affected by oxidation.

# CHROME PLATED BRONZE

Ideal for installation in walls, gutters, and other areas where a bright decorative finish is desired, and is not subject to the abrasive action of foot and other traffic. It is not recommended for installations where the abrasion will eventually wear through and cause peeling. It should always be specified for swimming pool fittings due to its high resistance to the halogens (chlorine, etc.), encountered in swimming pool sanitation.

# ALUMINUM

Casting grade 319. This is an alloy containing both silicon and copper. It is a solid cast metal in a pleasing light gray color. The light weight, coupled with its exceptional strength and corrosion resistance, makes it ideal for drain components such as sediment buckets and strainers. When used with acid-resisting porcelain enamel coated drains, the possibility of chipping is minimized.

## ZURN STAINLESS STEEL

Castings are normally produced in Type CF8 (304) which is an 18-8 Austenitic Stainless possessing excellent corrosion resistant qualities. For some applications where conditions demand, Type CF8M (316) stainless steel can be supplied. Items formed from stainless steel sheet and other stainless steel products are regularly furnished in Type 304 with 316 as an optional material.

## A.R.C.

Acid Resisting Epoxy Coating is a baked-on powder coating, which produces a smooth, hard, high gloss finish. This epoxy based coating offers high impact resistance and excellent life expectancy in all drainage applications.

## A.R.E.

Acid Resisting Porcelain Enamel is a substantially vitreous or glassy inorganic coating bonded to metal by fusion at a high temperature above 800°F. This coating offers excellent acid, abrasion, and wear resistance. The coating is extremely hard and is the ultimate for sanitation in drainage applications. Zurn A.R.E. coating conforms to the requirements of F.D.A. (Food and Drug Administration) Regulation 21-CFR5 117.1360.
