**Zurn Launches Zurn Wilkins 20XL Pressure Reducing Valve**  
*Compact Design, Universal Connections*

**MILWAUKEE, WI** – Zurn Industries, LLC announces the release of the 20XL Zurn Wilkins Pressure Reducing Valve. Pressure reducing valves protect pipes and plumbing fixtures from high water pressure, while also using less water. The 20XL meets the requirements of NSF/ANSI 61 and is ASSE listed 1003, IAPMO listed, and CSA certified.

“Dependable and easy to install, the 20XL meets both the contractor’s and building owner’s needs,” said John Mankins, Zurn Product Manager, Water Control. “Its compact, short lay length fits into tight spaces, making it ideal for residential applications. Plus, with multiple connection types, the contractor can install following their preferred method.”

The new valve is available in a single union, double union, and integral PEX connections for F1960 expansion and F1807 crimp in ¾-inch and 1-inch sizes. Zurn’s complete line of pressure reducing valves is available at [zurn.com](http://zurn.com).

**About Zurn Industries**
